| 0009 | <p>Base Period: Contract Access Fee</p> <p>The Contract Access Fee (CAF) is 0.75% to be applied to the total price for contractor performance as billed to the government on each Task Order. The CAF is paid by the Ordering Agency, but remitted to GSA by the Contractor. Based on the established CAF rate, the Contractor shall include the CAF in each proposal. The Contractor shall include the CAF as a separate cost element per year on all quotes to the government, regardless of contract type. The CAF shall never be treated as a negotiable element between the Contractor and the Ordering Agency. The CAF Rate, effective at time of the Task Order award, shall remain the same for that Task Order for the full term of the Order.</p> <p>Period of Performance: 09/01/2026 - 01/31/2027</p> | 1 Job | \$ _____ | \$ _____ |

***The contractor will be paid only for the services provided by the contractor and received and accepted by the Government.***

## **SECTION C – PERFORMANCE WORK STATEMENT**

### **Performance Work Statement (PWS) Customer Information Technology Support**

#### **SECTION 1 – INTRODUCTION**

##### **1.1 Mission**

The Centers for Disease Control and Prevention (CDC) is the leading public health agency in the United States, working to prevent and control disease, injury, and disability. CDC collaborates with states, local agencies, and partners worldwide to promote health and improve quality of life.

The Office of the Chief Information Officer (OCIO) at CDC has a vision to put public health science into action through IT innovation and modernization. The CDC is currently undergoing a digital transformation to enhance mission enablement, operational efficiency, and workplace safety through the adoption of modern technology solutions.

To maintain its scientific credibility and service excellence in an era of information explosion, CDC has developed strategies to effectively use IT while safeguarding data integrity and confidentiality. The infusion of innovative technologies, human-centered design, cloud infrastructure, and advanced analytics capabilities enables CDC to drive efficiencies across mission areas more rapidly and securely.

Overall, CDC's focus on IT innovation aligns with its mission to protect public health and improve the well-being of people in the United States and around the world.

##### **1.2 Background**

The OCIO has been developing, coordinating, and executing plans, budgets, policies, and procedures for IT customer services, and delivering those services CDC-wide since its inception in 2003. OCIO will use this new Customer Information Technology Support (CITS) contract to modernize services at the agency to better respond to customer needs, collaborate across OCIO, and deliver outstanding IT customer service support to ~28,000 personnel who are putting public health science in action across the globe. OCIO personnel currently consist of ~375 Federal employees and ~1,275 contractors.

CDC currently achieves IT customer support using a tiered, Information Technology Service Management (ITSM) service delivery model; Level 1 (IT Service Desk Services such as the contact center), Level 2 (Deskside Support Services), and Level 3 (specialists). In addition, CDC uses Information Technology Infrastructure Library (ITIL) as the standard for its IT operations. ServiceNow is our platform for tracking, managing, documenting, and streamlining IT customer support and knowledge management.

#### **SECTION 2 – OBJECTIVE**

The objective of this acquisition is to deliver an integrated and comprehensive task order that:

1. Provides timely, effective, and high-quality customer support to meet evolving IT needs.
2. Leverages emerging technologies and lessons learned to continuously enhance the end-to-end service experience.

3. Applies industry best practices in IT service management, including ITIL and the Project Management Body of Knowledge (PMBOK).
4. Reduces the Office of the Chief Information Officer (OCIO) total cost of ownership in a sustainable and consistent manner.
5. Ensures full compliance with all Centers for Disease Control and Prevention (CDC) security requirements.
6. Delivers customer support, IT management and administration, and specialized services across all CDC CONUS and OCONUS locations.
7. Evaluates, recommends, and implements innovative technology solutions to improve operational efficiency and mission effectiveness.

## SECTION 3 – SCOPE OF WORK

### 3.1 Scope of Work

This task order is to acquire IT customer support and IT management services to accomplish CDC's mission. This support is outline in table 1 below.

*Table 1 Contract Line Item Number (CLIN)/Task No./Task Service Area*

| <b>Task1: Customer Support Services</b>                  |                                                                                                         |
|----------------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| <b>Task No.</b>                                          | <b>Task Service Area Title</b>                                                                          |
| Task 1.1                                                 | CDC IT ServiceDesk Services (ITSDS)                                                                     |
| Task 1.2                                                 | Deskside Support Services (DSS)                                                                         |
| Task 1.3                                                 | Emergency Preparedness Services (EPS) and Field Site Services (FSS)                                     |
| <b>Task 2: Global Customer Support Services</b>          |                                                                                                         |
| <b>Task No.</b>                                          | <b>Task Service Area Title</b>                                                                          |
| Task 2.1                                                 | Global Activities (GA) Services                                                                         |
| <b>Task 3: IT Management, Analysis, and Reporting</b>    |                                                                                                         |
| <b>Task No.</b>                                          | <b>Task Service Area Title</b>                                                                          |
| Task 3.1                                                 | Program Management Services (PMS)                                                                       |
| <b>Task 4: (Optional) Specialized Support Services *</b> |                                                                                                         |
| <b>Task No.</b>                                          | <b>Task Service Area Title</b>                                                                          |
| <i>Task 4.1<br/>(Optional)</i>                           | <i>Special IT Projects Services (SITPS)</i>                                                             |

| Task 10.4                                               | Process Automation and Visualization Services                                                                                                             |
| Task 10.5                                               | Reporting Services                                                                                                                                        |
| Task 11: OCIO Communications Support Services           |                                                                                                                                                           |
| Task No.                                                | Task Service Area Title                                                                                                                                   |
| Task 11.1                                               | IT Communications Services                                                                                                                                |

*\*Public Health Emergencies, Unknown Federal Mandates, Technology Refreshments, and Building Moves may be addressed via modifications if required (Task 4.1).*

### 3.2 Requirements for All Tasks

For all tasks performed under this contract, the Contractor shall ensure customer service, quality control, knowledge management, reporting, innovative technology, and continuous improvement.

#### 3.2.1 Customer Service

The Contractor shall ensure all Contractor personnel handle all contacts with tact and diplomacy,

demonstrate good listening skills, and accurately record information. CDC may implement a customer service survey process to measure the satisfaction with, and the effectiveness of services provided. If implemented, the survey results will be used by CDC to measure the Contractor's performance as outlined in the performance quality assurance section.

### **3.2.2 Quality Control**

The Contractor shall ensure the accuracy and quality of all work done by Contractor personnel. CDC may also perform quality control monitoring and evaluation in accordance with the performance metrics outlined in the performance quality assurance section. Quality equates to consistency, accuracy, and customer satisfaction and shall include the following:

1. Effective listening and communication skills; ability to read, write, and speak fluent English.
2. Courteous and professional customer service.
3. Clear, detailed documentation of all inquiries/requests received including steps taken to resolve any problems or complaints encountered.
4. Professional skills including, but not limited to, patience, tact, accuracy, and courtesy to accurately update information and provide instructions.

### **3.2.3 Knowledge Management**

The Contractor shall use ServiceNow to document and create a knowledge database of common IT support topics for the technicians and customers to use for self-service searches.

### **3.2.4 Reporting**

Contractor shall provide reports on an ongoing basis for all tasks. See *Table 12 Contract Deliverables*.

### **3.2.5 Innovative Technology to Improve Operations and Customer Experience**

Contractor shall leverage innovative and emerging technology to improve operations and customer experience (CX) such as artificial intelligence, robotic process automation, and automation through ServiceNow and other technologies.

### **3.2.6 Continuous Improvement and Change Management**

Contractor monitors and analyzes performance and CX. Based on these findings, the Contractor develops structure to foster continuous, incremental improvement for CX and performance and executes these improvements to reduce total cost of ownership consistently over time. Contractor creates a structure for change management.

## **3.3 Information Technology Service Priority**

The Contractor must be knowledgeable of CDC IT Service Priority definitions and related matrix as defined in table 2 below.

Table 2 Priority Definition Matrix

| Impact  |                                                                                          |          | Complete outage      | Partial outage      | Partial outage      | Partial outage     |
|---------|------------------------------------------------------------------------------------------|----------|----------------------|---------------------|---------------------|--------------------|
|         |                                                                                          |          | 75-100% of all users | 50-75% of all users | 25-50% of all users | 1-25% of all users |
|         |                                                                                          |          | Critical             | High                | Medium              | Low                |
| Urgency | Complete outage on networks, all critical applications, and services.                    | Critical | Priority 1 (*)       | Priority 2 (**)     | Priority 3          | Priority 3         |
|         | Complete outage on one or more networks, critical applications, and services.            | High     | Priority 2           | Priority 2          | Priority 3          | Priority 3         |
|         | Partial outage on one or more network, application, or service.                          | Medium   | Priority 3           | Priority 3          | Priority 4          | Priority 4         |
|         | Degraded performance of a network, application, or service impacting a facility or area. | Low      | Priority 3           | Priority 3          | Priority 4          | Priority 4         |

(\*) – Network outages effecting all international sites, or an international region equates to a Priority 1. (\*\*) – Network outages effecting a single international country equates to a Priority 2.

|                 |                                                                                                                                                   |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Impact</b>   | Measure of the effect of an incident.                                                                                                             |
| <b>Urgency</b>  | Defines what constitutes a Priority 1, 2, 3 or 4 which drives how long resolution can take before the incident has a significant business impact. |
| <b>Priority</b> | Priority is based on impact and urgency                                                                                                           |

## SECTION 4 – TASKS TO BE PERFORMED

### Task 1: Customer Support Services

#### Task 1.1 CDC Information Technology ServiceDesk Services (ITSDS)

The objective is to provide efficient and customer-focused IT support to CDC users, resolving technology issues quickly. The Contractor will take ownership of the resolution process from initial contact until the issue is resolved, even if external organizations are involved. Users can reach out through various channels like ServiceNow, phone, email, or chat.

Although fluctuating somewhat, a snapshot of recent ticket volume by type of customer service requests is summarized in tables 3 and 4 below.

Table 3 IT Services/Support Top Incidents Period (October 2023 through December 2024)

| Service Offering | Incident Count | Percentage |
|------------------|----------------|------------|
| (empty)          | 9,846          | 23.32%     |
| Outlook          | 4,357          | 10.32%     |
| Laptop           | 3,590          | 8.50%      |

|                             |               |             |
|-----------------------------|---------------|-------------|
| Smart Card                  | 3,172         | 7.51%       |
| CITGO Virtual Desktop       | 2,335         | 5.53%       |
| Teams                       | 2,278         | 5.40%       |
| Listed in SRT               | 1,903         | 4.51%       |
| MFA                         | 1,704         | 4.04%       |
| ZScaler Zero-Trust Services | 1,466         | 3.47%       |
| OneDrive                    | 1,029         | 2.44%       |
| Mailbox                     | 1,015         | 2.40%       |
| PRINTER                     | 888           | 2.10%       |
| Other                       | 8,630         | 20.44%      |
| <b>Total</b>                | <b>42,213</b> | <b>100%</b> |

*Table 4 IT Services/Support Top Tasks Period (October 2023 through December 2024)*

| Task Short Description                                      | Task Count    | Percentage  |
|-------------------------------------------------------------|---------------|-------------|
| Network Password Reset                                      | 11,459        | 41.82%      |
| Provision UserID if requirements are met for Network Access | 6,137         | 22.40%      |
| Complete PIV Card Exception Request                         | 3,087         | 11.27%      |
| other                                                       | 1,605         | 5.86%       |
| Request                                                     | 1,363         | 4.97%       |
| PIV Exception - Verification Required                       | 698           | 2.55%       |
| Fulfillment for OCIO Tools Out Processing SD                | 641           | 2.34%       |
| Mailbox Fulfillment                                         | 475           | 1.73%       |
| Temporary Admin Rights                                      | 216           | 0.79%       |
| Inquiry                                                     | 206           | 0.75%       |
| Setup                                                       | 169           | 0.62%       |
| AMS LOGIN                                                   | 84            | 0.31%       |
| Other                                                       | 1,262         | 4.61%       |
| <b>Total</b>                                                | <b>27,402</b> | <b>100%</b> |

***The Contractor shall:***

1. Provide Level 1 IT customer support for all CDC Personnel.
  - a. Deliver courteous and professional customer service using a knowledge base of pre-approved responses to respond to inquiries/requests consistently and accurately.
  - b. Use CDC's ITSM platform (e.g., ServiceNow) to track, respond to, document details of the issue (issue type, issue symptom, and work notes), and resolve all Level 1 customer IT incidents, requests, and interactions.
  - c. Triage phone calls, emails, chats, and ServiceNow portal-based tickets in ServiceNow.
  - d. Perform initial diagnosis and analysis of incidents and provide immediate resolution and recovery if possible.
  - e. Immediately report any known, reported, or suspected security incidents to Cybersecurity Incident Response Team, following all required incident response activities and reporting.
  - f. Use remote control tools to assist and resolve customer incidents.
  - g. Provide warm handoff escalation of incidents that cannot be addressed by the initial contact.
  - h. Maintain a monthly average speed to answer phone calls and chats in less than 2 minutes.
  - i. Use flexible work strategies such as virtual agents to account for peak and off-peak times and surge requirements.
  - j. Verify ticket closure with the requester to ensure that the user agrees that the issue has been fully resolved and the service has been restored. CDC requires confirmation from the user before closing any ticket.
  - k. Escalate tickets as required by the service level agreements (SLAs).
2. Evaluate and improve the customer support experience.
  - a. Follow-up on resolved tickets to check quality, get user concurrence of ticket closure, and report customer satisfaction.
  - b. Review the ITSD contact channels/tickets weekly for quality assurance and training of ITSD personnel. Findings along with recommendations shall be reported to the Contracting Officer's Representative (COR) and/or CDC identified Technical Monitor (TM) for Task 1.1 upon request. Maintain a less than 3% error rate.
3. Document and improve processes.
  - a. Conduct a continuous and thorough review of existing processes and identify improvements to reduce inefficiencies and modernize the ITSD.
  - b. Identify trends and update reference materials for the ITSD (such as manuals, scripts, guides, procedures, work instructions, reports, etc.) to ensure proper procedures are followed.
  - c. Use ServiceNow to document and create a knowledge database of common IT support topics for the technicians and customers to use for self-service searches.
4. The Contractor shall provide a mechanism to roll/forward technicians phone line over to another number in the event of a SD phone outage. (E.g. currently utilizing NICE CXOne Virtual Contact Center system (VCC).
5. The contractor shall use this product or any new product in the future selected by CDC. Service Now Analysts (3 positions) to include VCC Systems Administrator (1 position) are required to possess a Public Trust Level 5 clearance. The contractor's system must be capable of providing customized reports by

organization, problem, customers, or equipment/software. The system shall maintain an on-line database of all requests for hardware and software repair, maintenance, installation, and configuration support which shall include, at a minimum, the following:

- Customer name
- Organization
- Telephone number
- Date and time of request
- Warranty status of applicable equipment
- Date and time of work completed
- Serial and property number of the component or parent system
- Parts and/or labor involved in the work

#### 6. Virtual Contact Center (VCC) Subscription Service

The contractor shall use the VCC systems which is a cloud based Automatic Call Distributor/ Interactive Voice Response service desk tool that provides enhanced customer management support services. Key features include the ability to configure, scale, implement and administer next generation customer service desk features. The VCC product integrates enhanced features and functionality such as virtual queueing, call back, complex skill-based routing, integrated management dashboards, enhanced reporting capability, real time call status display and facilitate integrated call operational support. Subscription services are performed by agents and supervisor per month. Subscription services will be procured by the CDC.

#### TASK 1.2 DESKSIDE SUPPORT SERVICES

The DSS provides Level 2 customer support for Government-provided computer hardware and software via the Customer Support Center (CSC) team, depending on equipment location, following the SLA incident requirements defined below in table 5. Contractor must be knowledgeable of CDC IT Service Priority definitions and related matrix defined in table 2.

**Table 5 OCIO SLA Incident Assignment and Resolution Targets and Measures by Priority**

|                   | Assignment                       | Resolution Time                   | Measures        |
|-------------------|----------------------------------|-----------------------------------|-----------------|
| <b>Priority 1</b> | 15 Minutes (24/7)                | 2 hours (24/7)                    | Meet targets    |
| <b>Priority 2</b> | 30 Minutes (24/7)                | 4 hours (24/7)                    | 95% of the time |
| <b>Priority 3</b> | 1 hour (M-F, 8 AM – 4 PM Local)  | 16 hours (M-F, 8 AM – 4 PM Local) |                 |
| <b>Priority 4</b> | 2 hours (M-F, 8 AM – 4 PM Local) | 40 hours (M-F, 8 AM – 4 PM Local) |                 |

#### SLA Rating Levels

- Level 1 – Achieve Unsatisfactory Results (UR) = 0 – 69.99%
- Level 2 – Partially Achieved Expected Results (PA) = 70% - 94.99%
- Level 3 – Achieved Expected Results (AE) = 95%
- (a) Level 4 – Achieved More Than Expected Results (AM) = 96% - 97.99%
- Level 5 – Achieved Outstanding Results (AO) = 98% - 100%

The CSC team provides Level 2 desktide computer hardware and software support on Government owned equipment (GOE) and Government furnished equipment (GFE) computers and laptops to all Atlanta and non-Atlanta personnel. Additionally, CSC provides audio-visual (AV) support to customers at non-Atlanta locations.

Service Desk Liaisons (SDLs) are Project Managers dedicated to each CSC team, the Field Site Services (FSS) Team and the Emergency Preparedness (EP) Team. They serve as the lead contractor working directly with the Campus Leads, Backup Campus Leads, FSS and EP Team Lead and contract management. They do not require PM certification but must possess advanced technical skills and the ability to provide technical support to customers.

*Table 6 CSC Supported Sites/Personnel\**

| Atlanta Locations                 | Non-Atlanta Locations                                                                         |
|-----------------------------------|-----------------------------------------------------------------------------------------------|
| Century Center                    | Anchorage, AK                                                                                 |
| Chamblee                          | Cincinnati, OH                                                                                |
| Corporate Square                  | Ft. Collins, CO                                                                               |
| Lawrenceville (Non-Response Area) | Hyattsville, MD (includes Research Triangle, NC)                                              |
| Roybal                            | Morgantown, WV                                                                                |
|                                   | Pittsburgh, PA                                                                                |
|                                   | San Juan, PR                                                                                  |
|                                   | Spokane, WA                                                                                   |
|                                   | Denver, CO                                                                                    |
|                                   | Washington, DC (CDCW) <i>*Note: Staff are DSS techs assigned to Task 1.3 (EPFSS) not 1.2.</i> |

*\*See Subtask 1.2.1 for detail support requirements for CSC Contractor personnel.*

### **Subtask 1.2.1 Customer Support Center (CSC)**

The DSS provided by the CSC Level 2 technicians include desktide computer hardware and software support on GOE and GFE computers and laptops to all Atlanta and non-Atlanta personnel and telework and remote personnel. CSC provides AV support to customers at non-Atlanta locations. When necessary, incidents are escalated from Level 1 (ITSD) to the CSC technicians who shall perform DSS described below. Once a ticket is received from the ServiceDesk, the assignment of tickets to Level 2 technicians or the reassignment of a ticket if required is the responsibility of the campus-based Service Desk Liaison (SDL). The SDLs serve as the Lead Contractor and work directly with the CSC Campus Lead and CSC Campus Lead Backup.

### ***The Contractor shall:***

- Provide desktide computer hardware and software support at all CSC locations to install, repair, and maintain all IT equipment, including new and emerging technologies. Troubleshoot and resolve hardware and software problems, perform installations, and upgrades according to technical specifications.
- Escalate unresolved Level 2 incidents to higher levels for review and resolution.
- Document all incidents in CDC's ServiceNow with status updates and customer communications.

- d. Properly document tickets with issue details, troubleshooting steps, resolution, and any additional actions needed.
  - e. Ensure open tickets are updated daily unless a current, stated reason exists (for example, a customer out of office until specific date, awaiting parts, and so on). Tickets placed “on hold” must contain a valid justification following established guidelines.
  - f. Generate CSC incident reports for analysis.
  - g. Provide remote or on-site service for telework equipment at customer's workspace or CSC workspace.
  - h. Install, troubleshoot, and support Level I/II software for approved systems/devices, collaborate with DSO for basic network troubleshooting.
  - i. Support emergency events like virus remediation or equipment disconnect/reconnect for continued operations.
  - j. Collaborate with System Security and Privacy Officer (SSPO) and Software Distribution Team to test patches and evaluate impact on infrastructure within CSPO timeframes.
  - k. Facilitate access to data center rooms for network hardware repairs when requested.
  - l. Ensure all systems running the Government standard image are fully updated and compliant prior to deployment. Technicians must confirm that there are zero missing software or system patches, and that all applicable BIOS, driver, and software updates have been applied. This verification shall be performed using CDC-approved tools such as Microsoft Endpoint Configuration Manager (MECM), Software Center, and device-specific update utilities (e.g., Dell Command Update Tool or equivalent). Compliance must be validated using the SDT Info Tool or other designated diagnostic tools, as specified by the Government, prior to issuing the system to the end user
  - m. Support equipment disconnect/reconnect during office relocations within/outside core hours of operation.
  - n. Issue IT equipment to new employees and reclaim from departing employees.
  - o. Manage Laptop Loaner Program following OCIO procedures.
  - p. Arrange pick-up and processing of end-of-life computer equipment using standard OCIO procedures.
2. Conduct required IT asset management, adhering to official CDC Property Management procedures outlined under Task 1.5 for all equipment installs, moves, loans, or excessing as defined by the Government.
3. Provide AV support at CSC Non-Atlanta locations.
- a. Use CDC's ServiceNow to manage audio-visual requests within SLA.
  - b. Escalate AV service resolution with third-party vendors and conference support personnel.
  - c. Monitor AV support schedules and handle last-minute requests using CDC's conference room scheduling application.
  - d. Troubleshoot and resolve issues with conference equipment during events.
  - e. Recommend upgrades for conference rooms and AV systems to MMT management.
  - f. Provide support and troubleshooting for conference room computer and server hardware/software.
  - g. Adhere to MMT policies, processes, and procedures while meeting OCIO SLA metrics.

- h. Deliver training on media presentation, environmental functionality, and AV systems/services to customers/partners.
- i. Maintain digital signage system connectivity in all conference rooms and lobbies.

### **TASK 1.3 Emergency Preparedness (EP) and Field Site Services (FSS)**

The EP team provides Level 2 and 3 support to deployed CDC personnel involved in emergency response efforts worldwide and to the Office of Readiness and Response (ORR), Division of Emergency Operations (DEO). ORR operates continuously, including holidays.

Approximately 400 tickets per month are handled by the EP team in person, via telephone or email. Support incidents are tracked in CDC's ServiceNow system and handled according to the OCIO SLA (see Table 5 OCIO SLA). Routine support requests are addressed during core hours of operation (8 am - 4 pm EST), while emergency support calls outside of these hours are managed through an On-Call rotation schedule maintained by the Contractor. In the case of declared events or exercises, the Emergency Operations Center (EOC) operates 24/7 with rotating shifts for IT Support. DEO conducts around five or six exercises per year, with declared events occurring randomly throughout.

Once a ticket is received at the ServiceDesk, it is assigned to the Level 2 EP Support queue in ServiceNow. The EP SDL is responsible for assigning tickets to appropriate EP technicians. To ensure efficiency, EP tickets are not routed to the campus Service Now support queues.

The Field Site Services (FSS) team provides a full range of Level 2 support, over the phone and/or occasionally on-site, to customers at Port Health Stations (PHS) and non-CDC domestic public health partner locations. During a CDC-declared public health event (for example, Zika or Ebola) staffing levels at some PHS locations may increase to support the event. This increase in staffing may require the need for daily onsite support until the event ends. It is expected that support staff will travel to these locations and remain onsite until the support needs decrease or ends completely.

The FSS team provides remote support to the locations in table 7 below, with occasional travel. There are around 1,900 tickets per year for these locations.

The DSS provided by the FSS Level 2 technicians provide desktide computer hardware and software support on Government property at PHSs with direct access to CDC via dedicated circuit (10mb, T1, and so on). If the number of PHSs increases in the future and requires additional support, such support shall be made via modification.

Incidents are escalated from ITSD Level 1 to the FSS technicians who shall perform work described below. Once a ticket is received from the Service Desk, the assignment of tickets to Level 2 FSS technicians or the reassignment of a ticket if required is the responsibility of the FSS SDL.

Table 7 Field Site Services Locations

| CDC PHSS<br>(4-12 customers per station) |                   | Non-CDC Locations                                |
|------------------------------------------|-------------------|--------------------------------------------------|
| Anchorage, AK                            | Miami, FL         | BIDS program                                     |
| Atlanta, GA                              | Minneapolis, MN   | Bio-Watch                                        |
| Boston, MA                               | New York, NY      | Division of Diabetes Translation (Remote Office) |
| Chicago, IL                              | Newark, NJ        | EPA offices 11 regional offices                  |
| Dallas, TX                               | Philadelphia, PA  | Health department labs and clinics               |
| Detroit, MI                              | San Diego, CA     | Indian Health Services offices                   |
| El Paso, TX                              | San Francisco, CA | Regional public health offices                   |
| Honolulu, HI                             | San Juan, PR      | Vessel Sanitation Program                        |
| Houston, TX                              | Seattle, WA       | Other small non-CDC locations                    |
| Los Angeles, CA                          | Washington, DC    |                                                  |

*\*See Subtask 1.3.4 for detail support requirements for FSS Contractor personnel.*

### Subtask 1.3.1 Emergency Preparedness Services Customer Support

#### ***The Contractor shall:***

1. Provide support for desktop workstations, laptops, tablets, portable communications devices, network file share access, print server access, remote access, remote communications (such as BGAN or LogMeIn), communication gateways (such as deployable secure wireless LAN or MiFi), RAID enabled scientific workstations and other processors, via phone, email, remote, and in-person support within required SLA times.
2. Support multiple operating systems including Microsoft, MAC, and Linux.
3. Document all support incidents in ServiceNow following proper procedures and provide customer updates, in writing.
4. Escalate incidents to appropriate OCIO Level 3 support personnel.
5. Provide 24 hours/7 days IT support to the EOC during declared events or exercises.
6. Provide IT support to EOC team locations and Continuity of Operations Program (COOP) sites, when activated. Some locations and sites may be activated at other campuses and will require travel to those locations. When activated, COOP sites may support as many as 200 personnel.

### **Subtask 1.3.2 Field Site Services**

#### ***The Contractor shall:***

1. Provide remote desktide computer hardware and software and workstation and server support at FSS locations.
  - a. Monitor PHS servers for necessary updates and upgrades.
  - b. Conduct periodic visits to perform system upgrades at PHS.
  - c. Provide SDL support from Atlanta to monitor, track, and triage FSS service incidents across all locations, escalating Level 3 incidents via ServiceNow when needed.
  - d. Travel to FSS locations to provide on-site IT support in the absence of an on-site technician, with approval from the FSS Team Lead and COR.
  - e. Collaborate with ITSD and to ensure timely resolution of FSS incidents and active management of alerts.
  - f. Perform Property Custodial Officer (PCO) duties at FSS locations, following CDC and OCIO Property Management policies, and as referenced under Task 1.5.
  - g. Assist FSS personnel with remote connectivity via local LAN systems using tools like Zscaler or CITGO.
  - h. Handle movement, shipping, and transportation of CDC IT equipment, coordinating deliveries and repairs according to property management procedures defined by the Government.
  - i. Research, develop, and configure workstations and laptop operating systems for optimal performance, memory management, application access, multitasking, task switching, and adherence to network cabling hardware and CDC standards.
  - j. Install, configure, upgrade, operate, and administer LAN operating systems based on OCIO standards including account creation on Windows file servers at FSS locations.
  - k. Provide comprehensive IT support for FSS personnel and special projects involving various devices such as servers, email systems, routers, switches, laptops, modems tablets, cellular phones, etc.
  - l. Install, maintain troubleshoot GOE or GFE used by FSS customers including servers, backup systems, desktops, laptops, tablets, wireless devices, peripherals, and emerging technologies.
  - m. Facilitate access to data center rooms for network hardware repairs upon request.
  - n. Perform basic network troubleshooting tasks like patching/connecting workstations/servers into the CDC network or locating operational ports on routers/switches.
2. Produce documentation and reports to track, monitor, and support customers.
  - a. Provide “on call” contact to respond to downed critical systems outside core hours of operation.
  - b. Coordinate staffing during emergencies and system upgrade/maintenance cycles that may require overtime and weekend hours.

### **Subtask 1.3.3 Emergency Preparedness Services Deployment and Emergency Response**

#### ***The Contractor shall:***

1. Be deployed in response to emergencies declared by the CDC Director as a part of the EOC. Deployments may require departure in less than 2 hours. Deployment may be for extended periods of time and involve primitive resources in adverse locations, such as conditions that exist in disaster areas.
2. Participate in emergency training and drills throughout the year and at various locations.
3. Provide and maintain an on-call rotation schedule. The schedule shall be delivered to the COR and TM and maintained on a quarterly basis, with updates due 10 days prior to the close of each quarter.
4. Update on-call rotation schedule to support remote IT CDC personnel at locations worldwide 24 hours/365 days, including holidays. When in an on-call status, the Contractor shall be required to respond to phone calls within 15 minutes and be prepared to report to duty site within 90 minutes, in the event CDC Director declares an agency-wide emergency response event requiring response teams to be onsite.
5. Provide emergency IT staffing to meet the infrastructure needs of the CDC, such as virus outbreak remediation 24 hours/7 days IT support for pandemic outbreaks and so on.

### **Subtask 1.3.4 Emergency Preparedness Services Local Area Networks Administration**

#### ***The Contractor shall:***

1. Install and provide maintenance of LAN and LAN-related standard workstation components for CDC's COOP locations.
2. Perform COOP server and workstation connection, configuration, integration, and testing.
3. Upgrade standard workstation setup and as requested system components as required by OCIO.
4. Manage Active Directory, system center configuration manager, mailbox creation, mobile device management (such as Intune and Azure), EP Print Servers queues, PrinterLogic, mobile device infrastructure, and cloud services.

### **Subtask 1.3.5 Emergency Preparedness Services Asset Management and Tracking**

#### ***The Contractor shall:***

1. Ensure that Government IT assets are maintained in accordance with CDC IT policies.

2. Repair Government hardware and warranty and non-warranty equipment currently owned or acquired throughout the course of this contract period of performance. This includes desktops, laptops, scientific workstations, tablets, servers, and all other IT devices. The contractor will notify EP Team Lead when it is not technically possible to repair or when the cost exceeds 25% of the original replacement cost.
3. Provide maintenance, tracking, and accountability through the Government property system for a pool of laptop and desktop computers, deployable LAN Kits, and other communications devices that are used for emergency operations as required.
4. Adhere to official CDC Property Management procedures outlined under Task 1.5 for all equipment installs, moves, loans, or excessing as defined by the Government.

#### **Subtask 1.3.6 Emergency Preparedness Services Documentation and Reporting**

##### ***The Contractor shall:***

1. Track Government asset status in EPFSS storage areas, including availability and condition.
2. Generate a report for customers not contacted within SLA using data from ServiceNow.
3. Create a report showing escalated Level 3 incidents, open or closed, using data from ServiceNow.
4. Generate Event reports and calculate incident response and closure times using data from ServiceNow for specified date range and event.
5. Create a report of responder problems using data from ServiceNow for specified date range.

#### **Task 2: Global Activities Customer Support Services**

##### **TASK 2.1 Global Activities Services (GA)**

GA Services include IT support services for Global Health Center (GHC) customers located in ~60 international locations (such as US Embassies, other non-US Government partners, and others) across the globe. This is around 1,800 staff. GA supports approximately ~60 LANs that include workstations, network infrastructure, file servers, satellite communications, and video conferencing.

Level 2 and 3 support is provided to Global Health Center (GHC) Staff for administration, maintenance, and problem-solving of systems. Workstations and file servers are configured in a Microsoft Server environment. GA upgrades computers and IT infrastructure, connecting all locations to Atlanta through WAN links for access to CDC core services like Microsoft Azure, Office 365, VPN, and SD-WAN technologies. Contractor personnel will be heavily involved in installations/configurations related to these technologies.

The Contractors assigned to this task must work out of a CDC site in Atlanta, GA, and be US citizens. Contractors must be knowledgeable of CDC IT Service Priority definitions and related matrix defined in

[Table 2: Priority Definition Matrix](#) for the four (4) IT Support Priority classifications for network, IT applications, and service outages. Contractors must meet GA Incident SLA requirements as defined in table 8 below. The GA Incident SLA below is different than the OCIO Incident SLA.

**Table 8: GA Services SLA Incident Assignment and Resolution Targets and Measures by Priority.**

|                   | Assignment Time                        | Resolution Time                    | Measures                        |
|-------------------|----------------------------------------|------------------------------------|---------------------------------|
| <b>Priority 1</b> | 15 Minutes (24/7)                      | 4 hours (24/7)                     | Meet targets<br>95% of the time |
| <b>Priority 2</b> | 30 Minutes (24/7)                      | 4 hours (24/7)                     |                                 |
| <b>Priority 3</b> | 1.5 Hours (M-F, 7 AM – 11 PM<br>Local) | 18 hours (M-F, 7 AM – 11 PM Local) |                                 |
| <b>Priority 4</b> | 3 Hours (M-F, 7 AM – 11 PM<br>Local)   | 44 hours (M-F, 7 AM – 11 PM Local) |                                 |

#### **Subtask 2.1.1 Global Activities Branch Information Technology Support**

***The Contractor shall:***

1. Provide Level 2 and Level 3 network and computer support to global customers, including CDC headquarters staff traveling for international missions, within established GA Services SLA.
2. Document all incidents in CDC's ServiceNow system with status updates, customer communications, and detailed descriptions of the problem and resolution steps taken.
3. Install, upgrade, operate, administer, and monitor operating systems and servers in CDC-approved environments.
4. Configure file servers to install and implement applications and software while ensuring efficient storage utilization and backup.
5. Maintain network management utilities and audit trails.
6. Research, develop, and configure workstation operating systems for optimal memory management, application access, multitasking, task switching, considering network cabling hardware.
7. Support GHC and other international customers with LAN/WAN resources installation, integration, upgrades, operation, administration (e.g., archiving services, internet services).
8. Administer site-to-site VPN tunnels/Cloud service/SD-WAN to maintain consistent network connectivity for international CDC offices on the CDC WAN.
9. Implement internet connectivity with IP routing (IPv4/IPv6) for workstations and infrastructure hardware network access.
10. Implement CDC security procedures for virus protection, file security, data integrity following all CDC standards.

11. Install/configure/manage MECM and Anti-Virus Services for global infrastructure.
12. Collaborate with ISSO to test patches' impact on global infrastructure or remediate issues.
13. Provide technical assistance in designing networks according to CDC policy using multiple routing protocols/network IOS configurations; seek further direction if standards cannot be used.
14. Configure firewall/SD-WAN devices in LANs/WANs with single ingress/egress points.
15. Troubleshoot networks designed by others or troubleshoot own networks to provide timely solutions during outages.
16. Resolve terrestrial/satellite network issues as needed.
17. Be prepared for deployments in emergency situations declared by GA management within 24-48 hours; deployments may involve adverse locations with limited resources for extended periods of time (e.g., underdeveloped countries/disaster areas).
18. Report events within seven (7) days in ServiceNow system; provide regular updates every 24-48 hours until incident resolution is achieved.

#### **Subtask 2.1.2 Global Logistics and Asset Management**

The CDC requires full visibility of IT assets from acquisition to disposal. GA is responsible for managing international IT assets, including desktops, laptops, printers, servers, and peripherals. The CDC needs to assess current asset information for tracking and updating. The contractor will provide asset management services for all international CDC offices and remote locations. GA works with OSSAM/LPMSO to securely ship and handle international equipment at a centralized location for processing Government IT equipment.

#### ***The Contractor shall:***

1. Provide comprehensive logistics services for CDC Global sites. This logistics support includes staging packages for shipping, package handling, coordinating delivery to required global areas, and supply chain management for inventorying assets.
2. Adhere to official CDC Property Management procedures outlined under Task 1.5 for all equipment installs, moves, loans, or excessing as defined by the Government.
3. Perform provisioning and forecasting, staging packages, tracking history, and making recommendations as necessary to improve OCIO property management model.
4. Develop and maintain a supply chain management process for inventorying all GA assets, ensuring timely management of actions to minimize CDC equipment loss.
5. Maintain an integrated logistics support program with emphasis on provisioning and forecasting.

### **Subtask 2.1.3 Global Information Technology Asset Refresh Services**

#### ***The Contractor shall:***

1. Follow established CDC procedure to image and encrypt target computers.
2. Perform personal computer imaging and laptop encryption for all CDC laptops, servers, and desktops prior to shipment overseas.
3. Perform network device imaging, upgrading, and encryption for all CDC network devices prior to shipment overseas.

### **Subtask 2.1.4 Global Information Assurance and Security**

#### ***The Contractor shall:***

1. Create draft change requests (CR) for network infrastructure modifications based on SA&A package.
2. Upload completed, signed Change Request forms to the designated SharePoint folder and CDC SGRC.
3. Meet SA&A submission requirements as per CSPO SA&A SOP documentation.
4. Submit "low" availability Non-Recovery BCP form when required.
5. Submit system-specific scan requests for SA&A package and POA&M resolution.
6. Submit web page security scan requests to CSPO as needed.
7. Update country-specific inventory quarterly via CDC SGRC.
8. Perform daily review of Cisco DNA Center inventory scan and update records accordingly.
9. Respond to significant vulnerabilities upon notification by ISSO/CSPO representative, coordinating with Business and Technical Stewards using CDC IRP guidelines.

### **Task 3: IT Management, Analysis, and Reporting**

#### **TASK 3.1 Program Management Services**

The Program Management Services outlined below support CEO in maintaining performance and services across contracted task service areas. Effective administrative and management support is crucial for the success of this contract and OCIO's transformation process. The Contractor must provide well-designed reports and metrics to ensure efficient management of the program.

### **Subtask 3.1.1 Program Management Services**

The contractor shall provide Program Management to facilitate Government –Contractor communications and to maintain a high level of performance and service across all offices where contracted services are provided. The Program Manager shall be the primary technical and managerial interface between the Contractor and Contracting Officer (CO) and the Contracting Officer’s Representative, (COR).

A post-award/kick-off meeting shall be conducted within five (5) business days following the task award date to review the task order goals and objectives. The meeting shall be attended by all contractor identified Key personnel, Contracting Officer (CO), and Contracting Officer Representative (COR). The Government will determine the meeting location and time.

#### ***The Contractor shall:***

1. The contractor shall identify by name a Program Manager and alternate(s) to be the primary technical and managerial interface between the Contractor, CO, and COR.
2. Attend post-award/kick-off meeting to discuss the technical requirement, administrative matters, Government Furnished Information/Equipment (GFI/GFE), milestone schedule, review cycles, and invoicing.
3. Record detailed minutes of post-award/kick-off meeting and provide a completed copy to the CO and COR within five (5) business days after the post award/kick-off meeting is held.
4. Meet with the COR and Technical Monitors as necessary to maintain satisfactory performance and to resolve other issues pertaining to Government Contractor procedures.
5. Promptly respond to inquiries and requests made by the COR and CO.
6. Notify the COR when absences and travel are required and identify on call personnel to provide coverage for information needed by the Government.
7. Produce a Quality Control Plan (QCP).
8. Closely track and report Quality Assurance Surveillance Plan (QASP) and Quality Control Plan (QCP) metrics to confirm that TO is on track for success.
9. Produce reports according to the deliverables schedule (see *Table 12 Contract Deliverables*).
10. Closely track project financials and produce financial reports showing budgeted, actual, and projected costs for all tasks and projects across all CLINs.

Submit a Transition Plan describing the transition of this project as well as transition out (phase out) plan. The plan shall include a technical and management transition approach that is clear and concise. The plan shall include a timeline and resources required for the transition. The transition plan shall detail the planned transition methodology in logical sequence to ensure a smooth transition of all tasks and subtasks (if any) of the resulting Performance Work Statement without interruption or degradation of service levels. The plan shall include an approach that

ensures the successful achievement while limiting the impact to existing projects or programs. The plan shall also include a complete description of risks (cost, technical and performance to both the Offeror and the Government), issues and risk mitigation strategies.

11. Plan, implement, and complete Transition-Out activities with the incoming Contractor/Government personnel at the expiration of the contract to allow for a seamless and smooth transition.

### **Subtask 3.1.2 Transition Services**

Transition and succession services will ensure a smooth transition with current contracts and/or successor contracts with a minimum disruption to customer services. The contractor shall work with the follow-on Contractor(s) to ensure a smooth transition.

#### ***The Contractor shall:***

1. Transition Planning
  - a. Submit a Transition Plan with initial proposal and shall be included within the page limitations of the proposal and may be adjusted based on Government input.
  - b. Ensure Transition Plan uses the same positions and labor categories as described in the Contractor's Staffing Plan.
  - c. Ensure Transition Plan includes a Transition-Out section detailing Contractor's procedures for a seamless transition of services to a new service provider at the end of the contract.
2. Transition-In Support
  - a. Identify an overall Transition-In Project Manager and Transition-In support personnel.
  - b. Provide CDC Transition-In Project Manager with overall responsibility for CDC Transition In tasks.
  - c. Show evidence of adherence to plans and milestones, including documentation showing successful completion of knowledge transfer activities, documentation, agreement from CDC that Contractor can perform responsibilities of the PWS, and other demonstration of tasks completion as may be required by the project plan.
3. Transition-Out Support
  - a. Show evidence of adherence to Contractor's risk reduction methodology, procedures for transition of historic data, technical documentation, inventory, and the transfer of any Government Furnished Equipment (GFE) and Government Furnished Information (GFI).

### **Task 4 (Optional): Specialized Support Services**

#### **TASK 4.1 Optional Special IT Projects Services**

CDC's demands and requirements for the application of IT projects are constantly changing. Since OCIO was established in 2003, there has been a recurring need to quickly respond to various types of Special IT projects, such as public health emergencies (\*), unknown Federal mandates (\*\*), technology refreshes, and building moves. Each situation is unique and may result in a significant workload increase as it pertains to the contractor staffing and hours worked. This may include increased workload in any of the Task Service Areas listed in this PWS. Special projects are invoked through award of a task order

modification issued by the CO, at the discretion of the Government. The Contractor will be provided thirty (30)-days' notice from the required effective date.

*(\*) In the event of a public health emergency (such as pandemic flu, natural disasters, and terrorist activities), the contractor shall provide IT support services. This type of surge is not known in advance, and there have been instances of multiple public health emergencies being supported at the same time. Typically, the emergencies last ninety (90) days and require travel and/or additional personnel.*

*(\*\*) Unknown Federal mandates (such as encryption of all laptops or implementing new Federal desktop configuration standards) are unpredictable and can have significant workload increases and Contractor staffing implications. Typically, projects for Federal mandates surge 8 to 12 personnel positions and last ~12 to 24 months in duration for the implementation. Some Federal mandate projects require specialized skills to be retained to support the ongoing mandate.*

At the time of notification, the Government will further define requirements, where necessary, to:

1. Provide technical direction necessary to clearly delineate the extent of services and nature of work to be performed, deliverables, and required timeframes.
2. Identify places of performance requirements (if any).
3. Define the business hours in which support is required and specify requirements, if any, for supporting extended work weeks, recall during non-business hours, or 24-hour coverage.
4. Identify required performance standards.

#### **TASK 4.2 Optional Project Management**

Project management may be required of the Contractor. Project Managers (PMs) are required to manage projects varying across a small-to-large size spectrum, such as smaller scale projects impacting a single OCIO Business Office, to larger scale projects supporting enterprise-wide cross-cutting strategic initiatives. PMs are required to use a collection of industry best practices, Federal standards/policies, and CDC/OCIO established project management processes and tools to track and manage project activities and deliverables.

##### **Subtask 4.2.1 Optional Project Management Services**

###### ***The contractor shall:***

1. Provide personnel for a cross-skilled team of PMs and technical writers as directed by the Government.
2. Skilled PMs proficient in Microsoft Office365 Suite tools and other project management software.
3. Develop and manage full project lifecycle, including requirements, communication plans, risk plans, and project plans.
4. Manage multiple projects following OCIO Project Management and EPLC standards.

5. Create various project documents such as status reports, requirements documents, project plans, and risk tracking spreadsheets.
6. Proactively review deliverables, identify risks/issues, and resolve them.
7. Support projects by facilitating meetings and tracking action items to completion.
8. Present executive-style briefings on project status to OCIO Senior Managers.

### **Task 5: DSO Operations Support Services**

#### **TASK 5.1 IT Project Management Services**

The Project Management Team (PMT) within DSO OD manages large, enterprise-wide, or cross-cutting infrastructure projects using a collection of processes, tools, and techniques to structure, track, and manage project activities and deliverables. The PMT has defined a clear approach to successful project delivery and document development through a consistent and repeatable integration of practices and processes that comply with OCIO standards, industry best practices, and CDC and HHS policies.

##### **Subtask 5.1.1 Project Management Services**

#### ***The contractor shall:***

1. Develop and manage the full project lifecycle from initiation through closeout, including gathering requirements and developing Charters, Communication Plans, Risk Plans, and Project Plans.
2. Manage the full project lifecycle from initiation through closeout for technical implementation projects such as, but not limited to, Cloud Migrations, Network Access Control, Government Accountability Office remediation activities, Microsoft 365.
3. Create multiple types of project documents using full MS Office Suite, including Project and Visio.
4. Develop and review work products for correctness in accordance with PMT best practices and standards.
5. Proactively review project deliverables, identify project risks, and resolve project issues.
6. Review OCIO and CDC strategic and tactical business plans.
7. Provide support to the DSO programs for multiple projects, including meeting facilitation, creating meeting agendas and minutes, and action item tracking using DSO PMT standards and best practices.
8. Present executive style briefings to DSO Senior Managers on project status throughout any identified project life cycle.

9. Present projects to critical partners, OCIO Governance Council, OD/OCOO Governance Council, and the CDC Enterprise Project Overview committee in accordance with HHS and CDC EPLC Stage Gate review requirements.

#### **Subtask 5.1.2 Technical Writer Services**

##### ***The contractor shall:***

1. Create documents using full MS Office Suite, including Project and Visio.
2. Collect, write, edit, track, finalize, and organize information required for developing user and technician guides, scripts, processes, procedures, work instructions, reports, and associated project deliverables.
3. Support the project teams to gather information from both Government and Contractor subject matter experts and develop initial technical content for document deliverables.
4. Create process flow diagrams and spreadsheets for project documents and document tracking.
5. Post 508 compliant project-related content to ServiceNow Knowledge, SharePoint, and OCIO web pages for use by customers and OCIO staff.
6. Create process flow diagrams and spreadsheets for project documents and document tracking.

#### **TASK 5.2 (Optional) Data Analysis and Services**

##### ***The contractor shall:***

1. Develop stringent quality controls processes for analyzing performance metrics.
2. Recommend business data analyst tools for enhancing reporting structures in all branches in DSO.
3. Develop and manage data mining processes for performance management reporting.
4. Analyze and track organizational performance through metrics. Advise DSO Senior management on solutions that are supported by the data where cost savings can be recognized and/or pursued (for example, a Single Computer Model which could result in saving millions of dollars to the agency).
5. All analyses created by Contractor shall adhere to the scientific principles of data management so that data sets created, and analyses performed have clear procedures that are findable, accessible, interoperable, and reusable and are available for audit and reuse within DSO, as appropriate.
6. Collect data and coordinate from various data sources including SQL connections, complex tables from network monitoring tools, and large/complex reports and spreadsheets.
7. Analyze large data sets using statistical methods and best practices.

8. Develop and manipulate complex Microsoft Excel workbooks, SQL, and cloud-based tools such as Microsoft PowerBI to analyze data.
9. Provide quarterly and annual business reports that describe IT metrics.
10. Schedule, distribute, and develop reports for established reporting cycles and ad-hoc reports.

### **TASK 5.3 (Optional) IT Communications Services**

#### ***The contractor shall:***

1. Identify and develop communication mechanisms and vehicles to keep stakeholders and CDC staff informed of activities, services, and accomplishments of the organization, including but not limited to, web content, newsletter articles, road shows, roundtable sessions, lunch and learns emails, and presentations. All deliverables must be Section 508 compliant and meet all CDC, OCIO, and DSO standards.
2. Establish and maintain relationships with various points of contact within DSO, OCIO, and the CDC community to aid in determining appropriate communications for a variety of audiences.
3. Work with all DSO branches and the CDC community (such as CDC Connects), to develop articles and schedule events and post them to the CDC Event Calendar and develop Connects and Business Service Articles.
4. Coordinate the scheduling of standard messages, appropriate media for communications, and frequency of communications and desired impact of communications.
5. Develop and implement communication policies, procedures, and other communication tools, and prepare manuals with practices and guidelines.
6. Maintain the records library and/or official archive of all presentation materials, announcements, and so on that are developed as part of OCIO communications and marketing. Active records shall be maintained and archived as required by CDC.
7. Develop a variety of communications to DSO and OCIO customers based on the requirements, including but not limited to newsletter articles, Connects articles, web content, posters, training materials, flyers, brochures, PowerPoint presentations, and email announcements. All deliverables must be Section 508 compliant and meet all CDC or OCIO standards.
8. Design professional presentations by selecting typographic style and conventions and defining layout and visuals to enhance information content and usability. Provide detailed specifications to OCIO staff and management. Ensure the accuracy of scientific terminology, completion of procedural steps, and effective presentation of textual, tabular, and graphic materials. All web material deliverables must be Section 508 compliant.

9. Research, recommend, and implement industry best practice marketing and communications methodologies.
10. Analyze and interpret feedback from customers to ensure that communication mechanisms and the information communicated are effective (for example, Communications Roundtable or focus group).
11. Analyze communication deficiencies and offer alternate solutions and process improvements.
12. Provide input to DSO staff for the development and implementation of project plans which include communications and marketing for rollout of new technologies, infrastructure changes, staff changes, and so on, and perform other project management responsibilities for communications and marketing.
13. Develop and maintain the DSO Service Outage Communication Protocol and distribute to appropriate staff and ensure that the protocol is updated as required.
14. Serve as a key member of the DSO Web Team, DSO Customer Satisfaction Team, and DSO Educational Offerings Team by attending the meetings, offering input and ideas to improve services and offerings, completing action items as assigned, developing reports for meetings as needed, and serving as speaker on various communication and marketing topics at meetings as requested. All deliverables must be Section 508 compliant and meet all CDC or OCIO standard.
15. Serve as backup webmaster for the OCIO website. In this capacity, the Contractor shall create web content, modify existing content, and remove content as requested. All requests must be delivered within two (2) hours. Resolution must occur within two (2) business days, unless otherwise specified.
16. Upload documents to the web, converting documents to HTML and PDF and providing information and alternatives for the display/design of information for the CDC Intranet. All content must be 508 compliant.
17. Provide support in the following areas: design page layouts and graphics, development of multimedia presentation, JavaScript, XML, and other more advanced web activities.
18. Develop a variety of materials for web, posters, announcements, training material and more as the lead communications/marketing specialist supporting OCIO's communications with internal and external customers.

#### **Task 6: Business Automation Support Services**

Primary requirement is to develop, enhance, and support a suite of web-based application databases called 'OCIO Tools' that are used to gather and manage customer information related to IT infrastructure management.

## **TASK 6.1 Application Web Development Services**

### ***The contractor shall:***

1. Adhere to OCIO and CDC common architectural principles for software development and data management in the design, implementation, and support of the web development described in the below tasks. The contractor is expected to collaborate with DevSecOps communities within OCIO and CDC to reuse accepted practices and standards for web development, data design, creation of application programming interfaces (API), and system interoperability.
2. Make proficient use Visual Studio .Net and ServiceNow App Engine Studio to develop and support the suite of OCIO Tools web based and ServiceNow applications.
3. Make use of Microsoft SQL and associated services as part of web- based application development and support.
4. Use advanced programming techniques and principles to design and support efficient and secure application code.
5. Use established techniques and templates to diagram business processes, document business requirements, document functional requirements, and document code in Visual Studio .Net.
6. Possess advanced knowledge of techniques for developing, planning, installing, and maintaining an Internet, Intranet, or ServiceNow web site and database applications using Microsoft Visual Studio .Net, SQL Server Management Studio, ServiceNow App Engine Studio and including but not limited to, expertise in Web Services (REST/SOAP), HTML, HTML5, Java, JavaScript, VB .Net, CSS, CSS3, MVC, AJAX, JQuery, XML, APIs, Bootstrap and ASPX, Azure Data Factory, Azure Synapse and Azure SQL.
7. Possess advanced knowledge of techniques for developing, planning, installing, and maintaining relational databases using SQL Server Management Studio including but not limited to, expertise in T-SQL (DDL, DML, TCL, and DCL), views, stored procedures, BIDS, SSDT, and SSIS.
8. Have experience administering websites using Internet information services.

### **Task 8: Identity and Access Management Support Services**

The Identity and Access Management Branch (IAMB) develops and maintains CDC's identity and access management (IAM) strategy; designs and deploys identification standards for Federal employees, Contractors, and external partners; designs, implements, and deploys IAM services; performs identity attribute management; and manages identity governance for the enterprise.

The Contractor shall provide shared services across the entire OCIO organization, including endpoint management and remote access services (RAS), project and configuration management, and technical writing. The IAMB provides services that enable the OCIO branches and teams to perform more effectively, efficiently, and securely.

Since Endpoint Management and RAS involve production enterprise services, maintenance and support must be performed after normal business hours as required. Contract staff must obtain Public Trust Level for Task8.

## **TASK 8.1 End Point Management Services**

### **Subtask 8.1.1 Infrastructure Hardware**

#### ***The contractor shall:***

1. Where possible, create automation programs and routines to accomplish administration tasks in accordance with OCIO and CDC DevSecOps common practices. The Contractor is expected to participate in cross-OCIO DevOps collaborations and to contribute to and reuse methods developed by the DevSecOps community in meeting the required activities below.
2. Install, configure, and manage systems in support of MECM, HCL BigFix, and related services, including but not limited to, MS SQL Server, Windows Server Update Service (WSUS), Microsoft Defender, and Anti-Virus Services.
3. Build application packages for deployment to CDC Enterprise systems, including workstations, laptops, and servers, local and remote which are running the CDC standard desktop configuration.
4. Create and manage scripts (for example, PowerShell or other scripting tools) to create the infrastructure required by MECM and facilitate MECM operations on systems distributed across CDC.
5. Create, manage, and deploy MECM for software installation and update packages to systems running the CDC standard desktop.
6. Backup and restore MECM/BigFix databases as required.
7. Ensure High Availability (99.9%) of all Software Distribution Services Hardware/Software infrastructure.
8. Conduct systems analysis of MECM/BigFix infrastructure and systems to troubleshoot issues and improve performance.
9. Support and guide architectural development and upgrades within this service area.
10. Make recommendations regarding improvements to the existing architecture as necessary to maintain superior performance and availability of MECM/BigFix infrastructure and systems.
11. Possess experience and demonstrated knowledge of techniques for developing, planning, installing, and maintaining MS SQL Server(s) in support of MECM/BigFix infrastructure and systems, including but not limited to, managing SQL Server database management, permissions, and performance using SQL Server Management Studio.

### **Subtask 8.1.2 Patch Management**

#### ***The contractor shall:***

1. Facilitate the distribution of operating systems and application patches to all enterprise systems including desktop and server operating systems, using MECM Software Updates for rapid distribution to the enterprise. A WSUS environment will also be managed and maintained to be used as a secondary patch mechanism to MECM in the event of an emergency, and to patch key (MS Windows) systems that are unable to be patched by MECM. A BigFix environment shall also be managed and maintained in support of the Federal Government Dashboard under the Continuous Diagnostics and Mitigation program.
2. Collaborate with the ISSO to test and evaluate patches to determine impact on the infrastructure and/or to remediate the problem.
3. Provide operations and maintenance support for BigFix infrastructure and systems.
4. Make recommendations regarding MECM and BigFix integration, including process integration and integrated dashboards, to achieve more robust and complete security patching for the CDC enterprise.

### **Subtask 8.1.3 Hardware and Software Management**

#### ***The contractor shall:***

1. Provide OCIO with complete and regularly updated reports of hardware and software configuration for all Windows workstations, servers, and laptops.
2. Create and manage workstation and server images for installation on new or re-purposed hardware. The images will be maintained with software and patch updates for installation on many client hardware platforms.
3. Provide the tools used to support Windows Remote Desktop and MECM Remote Control of client workstations and laptops.
4. Support and develop standard processes for the installation and updating of client systems and server systems, including standard image development and maintenance.

### **Subtask 8.1.4 Anti-Virus Management**

#### ***The contractor shall:***

1. Manage pattern files including automated updates for all CDC Enterprise systems.
2. Manage anti-virus pattern updates, schedule anti-virus scans and virus reports.
3. Manage OS and application patches and security updates.

4. Manage anti-virus servers for the enterprise to ensure timely pattern and software updates, centralized reporting, and automated notifications to administrators.

#### **Subtask 8.1.5 Processes and Reporting**

##### ***The Contractor shall:***

1. Establish standard processes and reports for enterprise systems, including desktops, laptops, and servers.
2. Provide technical support and advanced troubleshooting for software distribution, hardware installation and image processes, patch management, anti-virus management, and enterprise security settings.
3. Provide CDC with managed, process-based access to applications, data, and tools.
4. Provide designated OCIO staff with access to detailed, timely reports on all aspects of the CDC Desktop environment.
5. Schedule, automate, execute, and monitor MECM, WSUS, and anti-virus system performance.
6. Design all processes and systems with fault tolerance methodology appropriate to support a large Government agency.
7. Conduct research and development and testing of new software distribution technologies.

#### **Subtask 8.1.6 Mobile Device Management**

##### ***The Contractor shall:***

1. Provide mobile device management and troubleshooting, working with CDC Customers with GOE devices using Microsoft Intune.
2. Provide mobile device infrastructure administration tasks, including but not limited to, deploying mobile device IT policies, removing, and adding customers to the mobile device management system (Microsoft Intune), and assisting customers with activating mobile phone and tablet devices.
3. Participate in cross-OCIO DevOps collaborations and o contribute to and reuse methods developed by the DevSecOps community in meeting the required MDM activities.
4. Conduct systems analysis of Intune infrastructure and systems to troubleshoot issues and improve performance.
5. Support and guide architectural development and upgrades within this service area.

#### **TASK 8.2 Remote Access Services**

The scope of RAS includes but is not limited to, the Virtual Desktop Infrastructure Services Team, which provides virtual desktop services, and the Extranet Services Team, ensuring secure remote access

through Zscaler and external file sharing using ShareFile. Services extend to comprehensive reporting, analytics, monitoring, and alerting for all RAS activities. The engineering team operates from 6:00 am to 6:00 pm EST, Monday through Friday, with an expectation for after-hours maintenance and support, covering both planned and emergency situations.

#### **Subtask 8.2.1 Collaboration and Availability**

##### ***The Contractor shall:***

1. Demonstrate high availability commitment by ensuring a minimum of 99.9% uptime for all RAS components.
2. Maintain unified communication through consistent and coordinated communication with RAS Team management regarding all VDI and related services, preferably through a designated Contractor engineering lead.
3. Promote inter-team collaboration to share knowledge and exchange best practices and technical insights.

#### **Subtask 8.2.2 Security and Performance**

##### ***The Contractor shall:***

1. Implement and enforce multi-factor authentication methods, including Microsoft Multi-factor Authentication and Smartcard, following Federal Information Processing Standards (FIPS) 140-2 Level 3 standards or Government specifications.
2. Conduct thorough network traffic analyses to identify and resolve performance issues to support network integrity.
3. Provide guidance and support for architectural advancements and updates within RAS domains.
4. Offer strategic advice and recommendations to enhance architectural resilience and modernize High Availability frameworks.
5. Conduct security agent installation and auditing.
  - a. Ensure the installation of appropriate security agents as required by the CDC's operational security framework.
  - b. Regularly conduct audits to verify the presence and proper functioning of security agents across all systems within the RAS environment, ensuring compliance with CDC security policies and standards.
6. Conduct vulnerability management.
  - a. On receiving reports of identified vulnerabilities from the customer, the Contractor shall prioritize and address these issues swiftly and efficiently. This includes applying patches, configuring changes, or implementing protective measures to mitigate the risks associated with these vulnerabilities.

- b. Work closely with the CDC's IT security teams to report on vulnerability resolution progress, share insights on potential security enhancements, and ensure that all remediation efforts are documented in accordance with CDC's IT security and governance protocols.

#### **Subtask 8.2.3 Maintenance and Support**

##### ***The Contractor shall:***

1. Ensure software management with diligent patch management, antivirus updates, and software agent maintenance in line with CDC policies.
2. Develop and maintain scripts and Group Policies for efficient system administration.
3. Facilitate data recovery through database backups and restorations beyond the scope of OCIO Infrastructure Services.
4. Collaborate with the Endpoint Management Team and OCIO ISSO to test patches, assessing their impact and addressing any issues.

#### **Subtask 8.2.4 Policies and Procedures**

##### ***The Contractor shall:***

1. Strictly follow CDC IT security, patch management, and software protocols as outlined by OCIO.
2. Align with CDC IT security frameworks and security best practices, incorporating change management, security assessment and authorization, and control reviews.
3. Offer comprehensive after-hours assistance for urgent break/fix situations, ensuring 24 hours/7 days service availability.
4. Provide expert consulting on technical problems, administrative policies, and prioritization strategies.

#### **Subtask 8.2.5 Vendor and Software Management**

##### ***The Contractor shall:***

1. Coordinate with and manage communications and resolutions with vendors for technical challenges beyond the engineering team's capacity.
2. Maintain detailed records of prolonged or recurring issues, available for customer review.
3. During outages, promptly communicate status updates through the designated channels to keep all stakeholders informed.

### **Subtask 8.2.6 Audits and Testing**

#### ***The Contractor shall:***

1. Execute regular audits of server systems, documenting RAS environments and dependencies according to industry standards.
2. Conduct annual load testing of RAS production environments, with additional tests surrounding major upgrades.

### **Subtask 8.2.7 Cloud and Virtual Desktop Services**

#### ***The Contractor shall:***

1. Demonstrate cloud expertise through proficiency in managing and architecting solutions in diverse datacenter settings, including on-premises and cloud (Azure, AWS) environments.
2. Deliver level 3 support across all virtual desktop configurations and application delivery on Government and personal CDC-supported devices.
3. Develop virtual desktop application packages, leveraging OCIO-provided platforms and maintaining expertise in application provisioning technologies.
4. Develop architecture and manage external cloud-based environments for virtual desktop access, supporting both scientific and administrative workstations.

### **Subtask 8.2.8 Leveraging Automation for Efficiency and Accuracy**

#### ***The Contractor shall:***

1. Employ automation technologies to optimize resource allocation and management. This includes the use of automated tools for deploying solutions, managing system configurations, and orchestrating workflows across the RAS environment. Automation aims to enhance operational efficiency, reduce deployment times, and allow for scalable management of resources.
2. Deploy solutions and updates with a focus on minimizing deployment timelines and reducing the likelihood of human error. Automation scripts and tools should be used to standardize deployment processes, ensuring consistency and reliability across the environment.
3. Implement automated checks and balances to significantly reduce the risk of human error in system configurations, patch management, and other critical operations. This approach not only increases system reliability but also ensures that best practices are consistently applied across all managed services.
4. Use automation to accelerate the resolution of system issues and vulnerabilities. Automated monitoring tools should be in place to detect anomalies and potential security threats, with predefined response actions to address these issues promptly. This proactive stance on system health and security ensures a robust defense mechanism against emerging threats and vulnerabilities while providing for the best customer experience.

### **Subtask 8.2.9 Custom-Coding, Reporting, Analytics, Monitoring, and Alerting**

#### ***The Contractor shall:***

1. Develop and maintain custom software solutions to support RAS activities, including database-driven applications.
2. Generate accurate and timely reports from various data sources, including databases, to provide insights into the organization's operations.
3. Conduct data analysis using data stored in databases to support decision-making processes.
4. Implement monitoring solutions for IT systems and databases to ensure their availability and performance.
5. Develop and maintain an alerting system for IT and database issues.
6. Manage databases through:
  - a. Database design, implementation, and maintenance. Design, create, and maintain efficient, reliable, and secure databases. Perform regular database maintenance tasks, including backups, indexing, and performance tuning to ensure optimal database performance and integrity.
  - b. Data security. Implement robust security measures to protect databases from unauthorized access and data breaches and to ensure compliance with data protection laws.
  - c. Data migration and integration. Assist in data migration efforts and integrate databases with other IT systems as required.

### **Subtask 8.2.10 Weekly Progress Reporting**

***The Contractor shall provide*** weekly progress reports to ensure transparency and keep the customer informed about the ongoing activities, achievements, and any potential issues or delays. These reports should include but are not limited to updates on ongoing projects and tasks, including any deviations from the planned timeline. Identification of any issues, challenges, or risks encountered and the proposed or taken actions to address them. Plan for the upcoming week, including key tasks and objectives.

### **TASK 8.3 Directory Services**

#### ***The Contractor shall:***

1. Write C# rule extensions on the Forefront Identify Manager (FIM) servers to support brokering data to and from several data sources, including SQL, Lightweight Directory Access Protocol and Active Directory.
2. Configure FIM rule extensions to add, delete, and modify data brokerage between CDC Atlanta and CDC International Offices.
3. Create documentation to show architectural design, configuration, and business logic data flow for the CDC FIM servers and their processes.

4. Collaborate with the CDC Active Directory Team and CDC Messaging Team to facilitate the flow of information to and from CDC and the HHS Border Directory using FIM.
5. Perform all FIM server administration tasks only via a CDC approved remote method including CITGO and VPN.
6. Review in-house scripts used to broker data within CDC and develop code to perform the same data sync tasks using FIM to replace the CDC in-house scripts.
7. Perform administration tasks on the CDC FIM servers to back-up the code extensions and ensure that all scheduled FIM jobs are completed successfully. Any job that did not complete needs to be successfully completed within 48 hours after the failure.
8. Provide install and support for the Microsoft Active Directory environment, including Domain Name Systems and Dynamic Host Configuration Protocol.
9. Install, configure, and support Microsoft Distributed File System, File Replication Services, and File Quota/Resource Management.
10. Schedule routine server system audits and maintain server system inventory and documentation, which includes upper-level support.
11. Provide support to various software and hardware for ongoing support and maintenance of the systems.
12. Provide Level 2 and Level 3 troubleshooting support of Exchange and investigate user escalation calls, finding optimum solutions for both users and the organization.
13. Perform script administration tasks and report using PowerShell or other script technology, developing scripts for automating processes within the environment.
14. Participate in defined team projects and activities (such as new deployments and mailbox load balancing).
15. Maintain performance levels which meet or exceed standards as defined in the performance metrics.
16. Maintain and administer third party OCIOs, including but not limited to, mobile device infrastructure and Exchange online productivity enhancements. The Contractor shall create appropriate documentation for application deployment, configuration, and related processes.
17. Adhere to and enforce change management and compliance processes.
18. Provide support and assist in performing administration of the Microsoft Active Directory environment at the direction of the CDC.
19. Research, recommend, and assist in the implementation of state-of-the-art computing technologies related to Active Directory at the direction of the CDC.
20. Install, maintain, upgrade, and tune the Microsoft Active Directory environment at the direction of the CDC.
21. Provide ad-hoc reports related to the Microsoft Active Directory environment.

22. Resolve problems relevant to the Microsoft Active Directory infrastructure. The Contactor may be required to work with 3<sup>rd</sup> party vendors and other OCIO technical support experts in the execution of this task. The Contractor shall be proficient in the use of the OCIO Service Desk software in order to receive, process, and respond to service requests escalated to the Active Directory Team.
23. Maintain current Microsoft Active Directory documentation, including diagrams and host characterization worksheets for all Microsoft Active Directory environment at the direction of the CDC.

### **Task 9: Infrastructure Support Services**

The Infrastructure Services Branch (ISB) maintains and monitors all IT infrastructure for network, security, data centers, storage, telecommunications, and computer systems; works with CSPO to detect and respond to incidents that affect network performance and availability, and security of information assets; coordinates approved changes and upgrades to the CDC infrastructure environment; develops and maintains backup and recovery processes to maintain continuity of operations; and collaborates with CEO to facilitate appropriate help desk support capabilities.

#### **TASK 9.1 Networking Support Services**

##### ***The contractor shall:***

1. Provide Level 2 and Level 3 network and computer support/services to CDC Domestic Locations.
2. Provide staff that are required to be on-site at a designated CDC facility. Current physical locations are Atlanta, GA; Hyattsville, MD, Washington, DC area; Ft Collins, CO and Pittsburgh, PA.
3. Ensure a minimum of one engineer is physically present at CDC Atlanta HQ (Roybal campus) on weekdays between the hours of 3 pm and 11 pm, and on weekends between 8 am and 4:30 pm.
4. Ensure additional staff are provided to work outside of core hours (7:30 am – 4:00 pm) and on weekends when required, including but not limited to, when upgrades are in progress or service outages require it.
5. Ensure all incidents are documented in CDC's ServiceNow with current status, customer communications, and full description of the problem/resolution. Ensure proper documentation of all tickets, to include the issue, attempts to reach the customer, steps taken to troubleshoot, resolution of issue, and if unable to resolve, a list additional actions needed to resolve.
6. Configure, install, and implement applications and software available on the file server. Configure disk subsystems to ensure efficient storage utilization and backup.
7. Maintain software utilities for network management and audit trails.

8. Provide support to install, integrate, upgrade, operate, and administer LAN/WAN resources, such as archiving services, internet services, infrastructure devices, computers/workstations, and software/distribution servers.
9. Administer and manage site-to-site VPN tunnels/cloud service/SD-WAN to ensure domestic and international CDC offices maintain consistent network connectivity on the CDC WAN for internal (email, VoIP, video, etc.) and external (internet) based system access.
10. Implement internet connectivity with IP routing (Ipv4 and Ipv6) to workstations and infrastructure hardware for network access.
11. Implement CDC security procedures to ensure computer virus protection, file security, and data integrity. Network access is limited to authorized accounts, and passwords are enforced following all CDC security standards.
12. Collaborate with the SPPO to test and evaluate patches to determine impact on the infrastructure and/or to remediate the problem.
13. Provide technical assistance in designing networks in accordance with CDC policy and standards using multiple routing protocols and network IOS configurations. Notify Government immediately when standards cannot be used and seek further direction.
14. Configure firewall and SD WAN devices in environments in accordance with CDC approved requirements.
15. Troubleshoot the networks or the networks designed by others and provide effective and timely solutions to network outages.
16. Resolve all network issues.
17. Be prepared to deploy in response to emergency situations or network outages when declared by CDC management. Deployments may require departure within 8 hours. Deployments will also encompass campus and site upgrades for the CDC enterprise.
18. Provide a weekly status report of accomplishments to the Operations Team Lead. Report will include events/incidents worked, problem/resolution, and status of projects.
19. Ensure event reporting within seven (7) days in current ServiceNow system. Following event reporting, provide regular updates to incidents every 24 to 48 hours until incident is resolved.

## **TASK 9.2 Data Center Technician Support Services – Optional**

### ***The Contractor shall:***

1. Install infrastructure within CDC-managed facilities at a cabinet density within the parameters defined and ensure all labeling is to CDC standards.
2. Coordinate and control all physical assets being installed\removed from CDC Data Centers and Non-Atlanta computer rooms.
3. Implement and coordinate all change management activities to the infrastructure components that may affect any Service Levels or Services to CDC.
4. Ensure that all changes to the hardware assets are included and updated in the configuration management database system and/or other appropriate asset management system.
5. Use CDC-provided documentation on ITSM interface for workflows, change management, reporting, and maintenance windows.
6. Ensure all changes to CDC's environment that is anticipated to or creates the potential for an impact on services for CDC follow the Change Management procedure, engaging CDC no later than 72 hours in advance. Approved changes shall take place during regularly scheduled maintenance windows or at a time mutually agreeable to CDC and its stakeholders.
7. Provide timely notification of the availability of service or security patches or antivirus updates necessary to fix or repair environment vulnerabilities. Time measurement starts upon discovery of assessed vulnerability from third-party vendors or other authorized means in accordance with the standard operating procedures.
8. When installing equipment procured by CDC, ensure CDC data is protected and not cross-contaminated or virus infected. The Contractor may remove hardware upon CDC request, but storage arrays shall not be removed from the premises without following secure wiping procedures per standards.
9. Deploy and maintain hardware infrastructure as required to support Service Level Requirements.
10. Manage hardware consumables inventory (Spares) levels to meet CDC's requirements in accordance with applicable Service Levels.
11. Within CDC managed data center facilities, collect, store, and securely dispose of hardware-generated documents, media (including disk drives, flash memory, etc.) and assets per CDC guidelines.
12. Ensure all changes to the hardware assets are initiated in the appropriate change management system and are included and updated in the configuration management and/or other appropriate asset management system for reporting purposes.

13. Install, use, manage, and maintain hardware management tools and associated hardware required to proactively monitor the hardware. In addition, Contractor shall:
  - a. Respond to console messages and alerts.
  - b. Identify and correlate alerts and take corrective actions.
  - c. Report and resolve incidents and problems as required in accordance with applicable Service Levels and integrate with CDC ITSM tools.
14. Maintain Management and Monitoring infrastructure software.
15. Identify, coordinate, and apply all firmware and patching requirements for the infrastructure and software (for example, hypervisor, operating systems, monitoring tools, etc.) contracted for as part of this PWS.
16. Install appropriate and approved firmware and software patching of the infrastructure when directed by CDC's change management process, including timely installation of any "emergency" security patches.
17. Provide on-site and remote technical support for installation and troubleshooting CDC infrastructure hardware and operating systems, including but not limited to, the following:
  - a. Conduct hardware installations, upgrades, and replacements.
  - b. Keep all hardware and firmware at current revisions except where a deviation has been approved.
  - c. Monitor server, storage, storage switch, production job, backup job, database reindexing job, and other hosted asset and process health and performance. Network health and performance is excluded.
18. Provide after-hours support as required for both scheduled and unscheduled break/fix issues to ensure a 24 hours/7 days per week highly available enterprise infrastructure.

### **TASK 9.3 Virtual Services Engineer (VMware, Other) Support Services - Optional**

#### ***The Contractor shall:***

1. Perform storage capacity management, reporting, and planning for growth/refresh in coordination with OCIO.
2. Be responsible for deploying, patching, and administering all aspects of performance, capacity, and security management of virtual environment hypervisors, including VMware Vsphere, ESX, and other hypervisor systems.
3. Maintain processes and documentation with the goal of continuous improvement of hosting solutions.

4. In coordination with CDC, project, plan for, and update any change in IT resources necessary to fulfill CDC commitments in the following areas:
  - a. Hardware (central processing unit, storage, memory, storage area network (SAN), tape library, network/telecommunications within the environment, peripherals, and any other needed hardware peripherals).
  - b. Facilities (floor space, rack space, power, and any other facility needs).
  - c. Software, including license tracking for software used. In relation to storage, processor, and memory in the physical and hypervisor hosting environments, the Contractor shall:
    - (1) Define capacity-related alerts.
    - (2) Respond to capacity alerts.
    - (3) Define capacity report formats.
    - (4) Collect, trend, and track capacity statistics.
    - (5) Strategically plan system capacity.
    - (6) Proactively balance resources/workloads.
    - (7) Analyze changes to determine capacity impacts.
    - (8) Define the optimal capacity plan by minimizing the cost of providing sufficient resources and maximizing the use of these resources.
5. Adhere to CDC standards and guidance on Software Defined Network (SDN) for network segmentation and micro-segmentation requirements using NSX.
6. Adhere to CDC's segmentation scheme to meet security needs using firewalls or SDN.
7. Support the ability to take an existing running instance or a copy of an instance and export the instance into CDC required image format (for example, a VMDK, OVF, or VHD).
8. Continually recommend and tune infrastructure environments to meet Service Level Requirements.
9. Manage and monitor storage systems including all SAN Arrays, vSAN, and network attached storage (NAS) devices and switches located in on-premises data centers and CDC remote sites. Manage and monitor any direct attached storage on any hosted or infrastructure systems.
10. Perform storage capacity management, reporting, and planning for growth/refresh in coordination with OCIO.
11. Maintain a list of problems and action items, including those from OCIO management, and track each to closure for the duration of this task order. While providing support under this task, the contractor shall follow established CDC processes and procedures.
12. Be responsible for identifying and mitigating risks in OCIO's environment, especially risks that could potentially impact availability of OCIO-hosted applications and systems.
13. Install and maintain storage infrastructure.

14. Monitor and control storage performance according to CDC requirements and perform tuning as required.
15. Provide after-hours support as required for both scheduled and unscheduled break/fix issues to ensure a 24 hours/7 days per week highly available enterprise infrastructure.

#### **TASK 9.4 Operation Support Services - Optional**

***The contractor shall:***

1. Provide an Operations Support team staffed 24 hours a day, 7 days a week, including weekends and holidays, that provides data center monitoring, Tier II Network and App Support, customer help, problem triage, event escalation, and a communication conduit to OCIO groups as well OCIO customers.
2. Provide an Operations Support team staffed 24 hours a day, 7 days a week, including weekends and holidays, to provide escalation for Tier II App Support for managed service provider (MSP)-managed applications.
3. Adhere to CDC operations and administration requirements and policies.
4. Develop, document, and maintain standard operating procedures that meet CDC requirements and adhere to CDC-defined policies.
5. Develop, document, and maintain operational documentation (for example, run books, contact lists, operations scripts, etc.) that meets Contractor requirements for on-premises private cloud services.
6. Perform event management monitoring of IT Services to detect abnormal conditions or alarms, log abnormal conditions, analyze the condition, and take corrective action.
7. Manage infrastructure tools or applications, software, and services to meet SLAs, minimizing downtime and CDC resource requirements.
8. Develop and provide monthly operational reports and real-time dashboards that provide the status of operational activities, production issues, and key operational metrics.
9. Operate and manage the network infrastructure including compute, storage, software, and applications.
10. In coordination with CDC, resolve or assist in resolving issues, incidents, and problems in accordance with applicable infrastructure Service Levels and escalate to the appropriate resolver group (for example, Contractor Level 2 Support), Third Party Contractors (including public cloud service providers and MSPs), or CDC, as applicable and as required.
11. Create change request tickets in the OCIO change management system and follow established OCIO processes and procedures.

12. Respond to all incidents per SLA via CDC ITSM tool. Escalate these issues as needed.
13. Maintain required OCIO communications including ITSM and change management queues, Major Incident Management (MIM) procedures, email, and telephone communications procedures, and prescribed written communications (for example, analytical reports, after action reports (AAR), and customer correspondences).
14. Ensure OCIO Operations Support communications follow established guidelines for consistent and precise communications with the CDC Network Operations and Security Center (NOSC), OCIO Service Desk, OCIO systems engineers and administrators, and other OCIO and CDC customers.
15. Follow up with OCIO systems administrators and engineers during a service outage and provide hourly MIM communications status updates for the full duration of a service outage as needed or during MOC non-duty hours.
16. Participate in conference bridge activities during service outage events as needed or during NOSC non-duty hours.
17. Facilitate Technical Bridges and gather all required information for Major Incidents if applicable.
18. Provide input to AARs/PIRs (Post Incident Responses) as required for MIM service outage events to correctly identify and record root cause analysis, corrective actions, service restoration, and recommendations for improved performance or stability.
19. Provide CDC with a copy of, or access to, any Contractor or third party-supplied documentation and data (including updates thereto) as it applies to private cloud operations and administration.
20. Provide knowledge transfer sessions and verify run books and as-builts are up to date, reflecting current conditions post go-live and as requested, no more frequently than semi-annually.
21. Manage problem management functions, including the ability to troubleshoot and resolve, along with other CDC personnel, events, incidents, and performance issues with CDC infrastructure, both hardware and software, and help with hosted system troubleshooting and performance evaluation.
22. Develop and maintain documentation and knowledge base to support CDC technical knowledge.
23. Provide after-hours support as required for both scheduled and unscheduled break/fix issues to ensure a 24 hours/7 days per week highly available enterprise infrastructure.

#### **TASK 9.5 Data Backup Engineer Support Services - Optional**

##### ***The contractor shall:***

1. Ensure backups are taken according to the standard SLA or application's SLA where present offsite backups will be managed per SLA.

2. Perform restores as requested by an application owner within times specified in an application's SLA in the event of data loss, if any, according to system service level category and agreements.
3. Audit the environment, including all currently deployed servers and NAS infrastructure, on a quarterly basis to ensure they are backed up.
4. Once a month, perform a test restore (where a routine restore has not been done) at each campus, for each hosting platform or backup type (server operating system agent, infrastructure agent, other).
5. Report on backup success rates and reruns of backup job failures.
6. Require encryption and perform key escrow and tracking for backups.
7. Rebuild one server per site (if routine restores have not met this requirement) monthly to demonstrate ability to recover an entire application from scratch.
8. On-site at CDC locations, remove end of life tapes from service and wipe data using FIPS compliant methods to ensure that retired tapes contain no data.
9. Perform server and storage backups and restores for on-premises private cloud workloads.
10. Provide after-hours support as required for both scheduled and unscheduled break/fix issues to ensure a 24 hours/7 days per week highly available enterprise infrastructure.

#### **TASK 9.6 Software Installation Support Services - Optional**

##### ***The contractor shall:***

1. Maintain a complete electronic asset inventory of all software and operating systems, with versions, within the private cloud service areas required of the Contractor. This inventory is to be used for reporting purposes and shall be made available in real-time or on demand by CDC.
2. Configure and maintain Continuous Infrastructure Automation and Continuous Configurations Automation tools in accordance with Federal Information Security Management Act (FISMA) guidelines that are agnostic to both the Contractor and hardware.
3. Deploy pre-defined virtual machines, configurations, and operating systems, using a mutually developed Golden Image, network segmentation, and security profile, to the private cloud.
4. Configure and install virtual systems in accordance with the CDC Data Center security zones and firewall rules required for appropriate segregation and meet National Institute of Standards and Technology (NIST) 800-53 moderate baseline controls to support FISMA compliance.
5. Secure hardware and software environments to meet CDC security guidelines.

6. Maintain current patches and versions of all virtualizations, replications, and operating systems.
7. Deploy service/security patches/antivirus updates contracted for as part of this PWS.
8. Support SAS 9.4 in a legacy configuration using SAS Grid.
9. Have experience with LSF scheduler or similar scheduling software.
10. Have experience working in a secure environment to include understanding how firewalls interact with the different SAS component machines. The Contractor must possess the ability to write complete firewall requests.

#### **TASK 9.7 Application Hosting and Customer Interface Support Services – Optional**

##### **Subtask 9.7.1 Quality Assurance Team Services**

###### ***The contractor shall:***

1. Use the ServiceNow Change Management module using established change control procedures and document changes and only implement approved changes.
2. Be experienced in using ServiceNow to be able to assist non-ITIL users with their ServiceNow experience.
3. Manage the configuration management process and maintain the existing configuration management database for the ISB environment.
4. Work with the ServiceNow configuration management implementation team to transition ISB's configuration database information and requirements.
5. Manage the configuration management process and maintain configuration information about the ISB environment.
6. Be fully conversant in and understand ITIL process management. The Contractor shall oversee the overall process and manage all changes to it and all linkages with other processes affecting it.
7. Identify, document, capture, organize, validate, and maintain readily accessible, accurate, and up-to-date configuration information of hardware and software in centralized repositories, including baselines and auditing information. Captured information will be based upon existing ISB configuration management database and future state of the ServiceNow configuration management data base.
8. Maintain the configuration management process with standard documentation and reporting methods. Manage and document process standards, plans, and procedures.

### **Subtask 9.7.2 Project Team Services**

#### ***The contractor shall:***

1. Work with customers to gather requirements, availability, security requirements, and other inputs necessary to effectively deploy and host the customer system.
2. Track and manage a project from the beginning to the end of the full project lifecycle. This includes but is not limited to, initial discovery through deployment, operations, and retirement. The Contractor shall schedule builds, patches, enhancements, and sizing changes with other groups in ISB and the customer.
3. Manage projects related to implementing IT server assets, enterprise telecommunication, and enterprise data networking efforts.
4. Assist the ServiceNow development team in implementing the ServiceNow Project module, which will be used by the project team once deployed. Prior to that, the Contractor shall use the existing ISB project management process.
5. Be responsible for approximately 50 to 80 concurrent projects.
6. Follow and maintain established OCIO processes and procedures for application hosting and customer interface.

### **Task 10: Workplace Productivity Support Services**

The Workplace Productivity Branch (WPB) is responsible for supporting Enterprise Workplace Productivity tools and Collaboration. The Branch:

1. Maintains and optimizes CDC digital work tools such as communications (for example, Outlook Email, Stream, and InTune), collaboration (for example, Teams, SharePoint, and OneDrive) and process automation (for example, Dynamics 365 (DY365), Power Apps, Power Automate, and Power BI).
2. Provides business and technology capabilities that enable the development of enterprise-specific products and services.
3. Manages the vision and strategy for the Workplace Productivity platform and products to ensure alignment to customer needs and modernization goals.
4. Works across CIOs to define current and future platform and product capabilities and requirements.
5. Establishes and maintains platform and product lifecycle roadmaps.
6. Coordinates cross-platform and cross-product collaboration.

This task is responsible for overseeing and satisfying the Communication and Collaboration requirements for the CDC. In support of this responsibility, this task provides direct support of the Email/Messaging Services, Enterprise Collaboration Services, and Low-Code DY365 and Power Platform Services, which contribute to and support CDC's workplace productivity tools which operate on a continuous basis, 24 hours/7 days. Rigorous change management, configuration management, in-depth knowledge, and strong discipline is required with all work. The infrastructure associated with these services is expected to continue to provide communications, collaboration, and process automation services for CDC with potential to support data modernization initiatives for migration to the cloud, intranet, and extranet platforms.

#### **TASK 10.1 General Requirements**

1. Conduct network analysis of network traffic to troubleshoot reported issues and monitor performance.
2. Support architectural development and upgrades within this service area.
3. Make recommendations regarding improvements to the existing architecture as necessary.
4. Maintain and support the current platform patch management and antivirus services.
5. Maintain and/or create new APIs, scripts, and group policies to maintain robust system automation and administration the infrastructure.
6. Backup and restore databases beyond services where applicable.
7. Support Government cybersecurity requirements to test and evaluate patches to determine any adverse impact on the infrastructures and/or to remediate any issues that arise.
8. Follow CDC IT security policies and processes, including change management processes, SA&A, CRs applying industry standards, available technologies, and security best practices.
9. Provide after-hours support as required for both scheduled and unscheduled break/fix issues to ensure a 24 hours/7 days per week highly available enterprise infrastructure.
10. Develop and maintain information systems assurance programs and controls to meet Government requirements.
11. Recommend and take action to direct the analysis and solutions of highly complex problems related to enterprise systems within the Teams or SharePoint Infrastructure Service Team, including but not limited to, network and security components.
12. Follow all Government and CDC policies and standards and use only software authorized for use in the CDC environment, as authorized by the OCIO CSPO, may be loaded on assigned GOE or enterprise systems. All software installed and/or used within the environment shall be located on the designated team share under configuration

management control.

13. Open and close cases with vendor's technical support for technical issues relating to systems managed in this section when the engineering team is unable to resolve the issue within an acceptable time as determined by SLAs.
14. In situations where resolution of an issue is elusive and extends over a long period of time and/or reoccurs frequently, create, and maintain a consolidated log of the event and record all troubleshooting and mitigation efforts. This documentation will be subject to review by the customer.
15. During a service outage, provide regular OCIO ENL communications status updates either to the MOC during its hours of operation, or to the ENL distribution list to ensure timely updates are provided to interested parties on the ENL.
16. Work with the CSPO to test and evaluate patches to determine if there are any adverse impacts on the infrastructure and/or to remediate any issues that arise from such.
17. Adhere to strict patch, update, and software management policies as defined by Government Cybersecurity policies and procedures.
18. Monitor, assess, and recommend storage levels and hierarchical storage requirements for the products managed.
19. Engage in routine server system audits. Maintain, monitor, and document the environment and associated dependencies, such the network, firewalls, domain controllers, etc. using industry best practices and standards.
20. Adhere to business requirements, change control as well as Government standards of security as outlined and mandated by the Office of Management and Budget (OMB) and the NIST, and as posted on those Government websites for definition and review.
21. Conduct, at a minimum twice a year, load testing of the Process Automation and Visualization production environments.

#### **TASK 10.2 Communications Email/Messaging Services**

Communication Email/Messaging Services team is responsible for the infrastructure for Enterprise Email and Microsoft (MS) Exchange servers supporting associated products and services. Additional vendor product support for integrated API monitoring, fax services, and list services is also required.

##### ***The contractor shall:***

1. Provide high-level technical support to other OCIO technical support staff such as Network Engineers and Level 1/Level 2 Technical Support Technicians.
2. Provide support to vendor technical support to open and close cases for technical issues relating to Messaging software.
3. Provide support to other CDC Contractors to resolve problems relating to Microsoft

Exchange Online and Microsoft Outlook, to include all versions (for example, Desktop, Web, and Mobile).

4. Provide support for Microsoft Exchange Online, Exchange Productivity Suite (and other O365 peripherals for Exchange Online), eFAX for Business, LSoft Listserv, and identity management integration (for example, Microsoft Active Directory).
5. Research, recommend, and implement state-of-the-art computing technologies related to Messaging, such as email security solutions.
6. Provide message tracking and generate reports on messages sent and delivered.
7. Perform technical analysis related to issues or problems in the creation of new mailboxes, movement of mailboxes between servers, and deletion of mailboxes/data.
8. Create new Exchange distribution lists, contacts, and mailboxes using PowerShell (or similar product) commands. The Contractor shall create PowerShell scripts to automate day-to-day tasks, such as creating mailboxes, distribution lists, and mail-enabled contacts.
9. Use approved scripting technology (for example, PowerShell, C++, C#, JavaScript, and JSON) and scripting software to support in-house applications. Examples include adding, changing, and deleting Active Directory objects based on data from other systems or deploy/remove services and/or applications. All scripts must use an approved Development, Security and Operational (DevSecOps) environment to develop, scan, and configuration manage script and application deployment.
10. Provide high-level technical support and troubleshooting for support of mobile device infrastructure (for example, servers, gateways, etc.).
11. Troubleshoot, escalate, and resolve email problems relating to the Enterprise email messaging system in conjunction with the OCIO Service Desk. Act as the technical liaison with vendors and other OCIO technical experts for Email and Messaging system issues and resolve problems originating from customers using the OCIO Service Desk helpdesk software.
12. Maintain current messaging security documentation, including diagrams and host characterization worksheets for all messaging systems.
13. Support integration and maintenance of email messaging exchange services with other integrated CDC collaboration tools.

### **TASK 10.3 Enterprise Collaboration Services**

The Enterprise Collaboration Services team is responsible for the infrastructure and administration for Microsoft 365 services and apps such as MS Teams, SharePoint, MS Project, Planner, Azure DevOps Server, Forms, Bookings, Stream, MS 365 Office Suite (M365), OneDrive, etc.

#### ***The contractor shall:***

1. Provide site collection administration services for one or more MS SharePoint and MS

Teams site collections.

2. Ensure High Availability (99.9%) of all on premise and MS Azure Cloud Services listed above.
3. Coordinate and communicate with Teams and SharePoint Services Team management on all matters related to all Teams and SharePoint services. Each Teams and SharePoint service area listed above should communicate with Government management through a contract engineering lead.

#### **TASK 10.4 Process Automation and Visualization Services**

The Process Automation and Visualization Services team is responsible for supporting the infrastructure and administration of Dynamics 365, MS Power Automate, MS Power Apps, MS PowerBI, and CDC Enterprise Azure DevOps server. This team provides support services giving customers the ability to create next generation workflows, low-code application, data modeling, robust dashboards, and reporting capabilities.

##### ***The contractor shall:***

1. Provide support services for Microsoft low-code process automation and visualization platforms such as Dynamics 365, MS Power Automate, MS Power Apps, MS PowerBI, and MS DevOps services.
2. Coordinate and communicate with WPB Leads on all matters related to all Process Automation and Visualization services. Each service area listed above should communicate with Government management through a contract engineering lead.
3. Evaluate and provide recommendations of new low-code platform releases and applications, participate in plans for their implementation, and remain current with the low-code platform administrative best practices and roadmaps.
4. Monitor performance and scalability and refactor existing sub-optimal features with support teams.
5. Work closely with the low-code, cloud and CDC Enterprise Data Analytics and Visualization engineers to ensure that customers' requests are managed to meet program and project deadlines.

#### **TASK 10.5 Reporting Services**

Primary requirement is to develop and maintain the reporting and event correlation infrastructure and the associated dashboards and reports used by the various teams within OCIO.

##### ***The contractor shall:***

1. Ensure reporting system availability and generate reports, alerts, and dashboards as needed, so that they reflect real-time system information and provide notification alerts as specified by the customer.

2. Maintain and provide the reporting services deliverables, including all identified metrics for all systems within the SharePoint Services Team, to accurately report usage and performance data that show the system's current status and historical trends.
3. Ensure that the reporting environment is flexible and can integrate into other performance management systems (for example, ServiceNow, etc.).

**Task 11: OCIO Communications Support Services**

The OCIO Communications Team provides coordination and oversight for internal and external OCIO communications.

**TASK 11.1 IT Communications Services**

***The contractor shall:***

1. Identify and develop communication mechanisms and vehicles to keep stakeholders and CDC staff informed of activities, services, and accomplishments of the organization, including but not limited to, web content, newsletter articles, road shows, roundtable sessions, lunch and learns, emails, and presentations. All deliverables must be Section 508 compliant and meet all CDC or OCIO standards.
2. Establish and maintain relationships with various points of contact within OCIO and the CDC community to aid in determining appropriate communications for a variety of audiences.
3. Work with all OCIO departments and the CDC community, such as CDC Connects, to develop articles and schedule events and post them to the CDC Event Calendar and develop Connects and Business Service Articles. The Contractor shall coordinate the scheduling of standard messages, appropriate media for communications, and frequency of communications and desired impact of communications.
4. Develop and implement communication policies, procedures, and other communication tools, and prepare manuals with practices and guidelines.
5. Maintain the records library and/or official archive of all presentation materials, announcements, etc. that are developed as part of OCIO communications and marketing. Active records shall be maintained and archived as required by CDC.
6. Develop a variety of communications to OCIO customers based on the requirements of the OCIO organization, including but not limited to, newsletter articles, Connects articles, web content, posters, training materials, flyers, brochures, PowerPoint presentations, and email announcements. All deliverables must be Section 508 compliant and meet all CDC or OCIO standards.
7. Design professional presentations by selecting typographic style and conventions and defining layout and visuals to enhance information content and usability. The Contractor shall provide detailed specifications to OCIO staff and management. The Contractor shall ensure the accuracy of scientific terminology, completion of procedural steps and effective presentation of textual, tabular, and graphic materials. All web material deliverables must be Section 508 compliant.

8. Research, recommend, and implement industry best practice marketing and communications methodologies.
9. Analyze and interpret feedback from customers to ensure that communication mechanisms and the information communicated are effective (for example, Communications Roundtable or focus group).
10. Analyze communication deficiencies and offer alternate solutions and process improvements.
11. Provide input to OCIO staff for the development and implementation of project plans that include communications and marketing for rollout of new technologies, infrastructure changes, staff changes, etc. and perform other project management responsibilities for communications and marketing.
12. Provide maintenance and oversight of the OCIO Announcements mailbox, ensuring all requests submitted are responded to within one (1) business day. The Announcement mailbox shall be kept and maintained under mailbox size limits.
13. Develop and maintain the OCIO Service Outage Communication Protocol, distribute to appropriate staff, and ensure that the protocol is updated as required.
14. Serve as a key member of the OCIO Web Team, OCIO Customer Satisfaction Team, OCIO Educational Offerings Team, OCIO SharePoint Team, and the OCIO Newsletter Team by attending the meetings, offering input and ideas to improve services and offerings, completing action items as assigned, developing reports for meetings as needed, serve as speaker on various communication and marketing topics at meetings as requested. All deliverables must be Section 508 compliant and meet all CDC or OCIO standard.
15. Serve as backup webmaster for the OCIO website. In this capacity the Contractor shall create web content, modify existing content, and remove content as requested. All requests must be delivered within two (2) hours. Resolution must occur within two (2) business days, unless otherwise specified.
16. Upload documents to the web, converting documents to HTML and PDF and providing information and alternatives for the display/design of information for the CDC Intranet. All content must be 508 compliant.
17. Provide support in the following areas: design page layouts and graphics, development of multimedia presentation, JavaScript, XML, and other more advanced web activities.

18. Develop a variety of materials for the web, posters, announcements, training material, and more as the lead communications/marketing specialist supporting OCIO's communications with internal and external customers.

## **SECTION 5 – GOVERNMENT FURNISHED PROPERTY/EQUIPMENT/ INFORMATION**

The Government will furnish or make available to the Contractor certain facilities, equipment, supplies and materials, and services. Government Furnished Property (GFP) consists of Government Furnished Facilities, GFE, Government Furnished Supplies and Material, and Government Furnished Services. The Contractor shall not use GFP or services for any other purpose than execution of work under this contract. GFE shall consist of computers/laptops.

### ***The Contractor shall:***

1. Ensure contract personnel take personal custody and maintain assigned equipment.
2. Work with the COR to create a dedicated Property Custodial account for GFE assigned to contract personnel.
3. Inventory all equipment in personal custody as requested and when required by the Government (at minimum annually) via the COR.

## **SECTION 6 - PLACE OF PERFORMANCE AND CONTRACT SUPPORT HOURS**

### **6.1 Place of Performance**

*Table 9 Place of Performance*

| <b>Atlanta Locations</b>          | <b>Non-Atlanta Locations</b>                     |
|-----------------------------------|--------------------------------------------------|
| Century Center                    | Anchorage, AK                                    |
| Chamblee                          | Cincinnati, OH                                   |
| Corporate Square                  | Ft. Collins, CO                                  |
| Lawrenceville (Non-Response Area) | Hyattsville, MD (includes Research Triangle, NC) |
| Roybal                            | Morgantown, WV                                   |
| Depot                             | Pittsburgh, PA                                   |
|                                   | San Juan, PR                                     |

## 6.2 Telework

Contractors are required to use GFE that has been properly configured for security controls by OCIO. The Government's inability to provide IT GFE for telework will preclude the use of telework and shall not constitute an excusable delay. The Government shall provide maintenance and technical support for IT GFE used by teleworkers.

The Contractor or Contractor employee is responsible for providing high-speed Internet connectivity for teleworking. A Contractor teleworker's use of GFE and Government information shall be for contractual performance only and shall be protected from unauthorized access, disclosure, sharing, transmission, or loss. The Contractor shall conform to CDC policy "Use of CDC Information Technology Resources" while working, either on site or teleworking. All GFE used for teleworking shall be removed from and returned to CDC facilities in accordance with CDC policy "Controls for Government Property and Guidance on Removing Government Property from CDC Facilities."

Teleworkers must exercise due care in transporting and storing all non-public information, ensuring it is safeguarded. Controlled unclassified information (formerly called sensitive but unclassified), including personally identifiable information and Privacy Act information shall be transported and stored only in encrypted form using CDC approved hardware and software encryption solutions. Non-public Government information shall NOT be stored on personally owned equipment, devices, or storage media. Teleworkers will apply approved safeguards to protect Government equipment, records, and

non-public information from unauthorized access, disclosure, sharing, transmission, or damage, and will comply with the Privacy Act requirements set forth in the Privacy Act of 1974, Public Law 93-579, codified at Section 552a, Title 5 of the United States Code. Violation can result in adverse action, fines, and/or criminal prosecution.

Prior to removing Government property or equipment from CDC facilities, written approval by the CDC property custodian is required with concurrence from the Contractor's management. This is accomplished using the CDC property system personal custody procedures to document Government property removed from and returned to CDC facilities. The Contractor teleworker will return all equipment provided by the agency upon separation from the agency contract or when participation in the Contractor's telework program ceases.

### 6.3 Contract Support Hours

Core hours of operation are from 8 am - 4 pm local time, Monday through Friday, excluding Federal holidays.

*Table 11 Contract Support Hours*

| <b>TASK</b>                  | <b>Hours</b>                                                                                          | <b>Days</b>                                                         |

## SECTION 7 - TRAVEL

Domestic (Non-global) or International (Global) travel may be required to support technology implementations. Travel will be in accordance with and not to exceed the Federal Travel Regulation rates. Travel costs need to be approved in advance by the COR. The Contractor shall be required to provide their travel policy to the Government for review.

The Contractor may be deployed in response to emergency situations declared by GA or Infrastructure Services management. Deployments may require departure within 24-48 hours. Deployments may be for extended periods of time and involve primitive resources in adverse locations such as conditions that exist in underdeveloped countries and/or disaster areas.

### Travel Estimates (Based on Historical Data)

- **For CEO Non-Global travel (CLINs 0004, 1003, 2003, 3003, and 4003)** – The Government estimates 1 contractor per trip, for up to 10 trips per year. Travel is to any CDC Port Health Station or CDC domestic regional office.
- **For CEO Global travel (CLINs 0007, 1006, 2006, 3006, and 4006)** – The Government estimates 4 contractors per trip, for up to 15 trips per year. Travel is to any CDC international location.
- **For DSO Non-Global travel (CLINs 0005, 0006, 1004, 1005, 2004, 2005, 3004, 3005, 4004, and 4005)** - The Government estimates 2 contractors per trip, for up to 5 trips per year. Travel is to any CDC Domestic location or Port of Health Station.

## SECTION 8 – DELIVERABLES/REPORTING SCHEDULE

In fulfillment of this effort, the Contractor shall provide the deliverables listed in table 12 below. All deliverables shall be submitted electronically to the COR and identified CDC TM, unless otherwise agreed upon.

Unless otherwise specified, the Government will have a maximum of ten (10) working days from the day the draft deliverable is received to review the document, provide comments back to the contractor, and approve or disapprove the deliverable(s). The contractor will also have a maximum of ten (10) working days from the day comments are received to incorporate all changes and submit the final deliverable to the Government. All days identified below are intended to be business/working days unless otherwise specified.

All deliverables shall be submitted to the COR. The COR is responsible for tracking and acceptance. The contractor shall conduct Progress Reviews as required by the COR. These reviews shall provide, at a minimum, written summaries of the cost, schedules, and performance status of the task order activities. All reports shall reference and cite the contract number.

Table 12 Contract Deliverables

| Task No.      | Deliverable Title                                                | Format & Description                                                                                                                                                                                                                                                                                                                                                                      | Due Date                                                                                                                                                                                                                 | Deliver To                                                     |

## SECTION 9 – PERFORMANCE/QUALITY ASSURANCE

### 9.1 Quality Control Plan

The contractor shall develop and maintain an effective quality control program to ensure services are performed in accordance with this PWS. The contractor shall develop and implement procedures to identify, prevent, and ensure non-recurrence of defective services. The contractor's quality control program is how the contractor assures that the work complies with the requirements of the contract. The Contractor shall prepare and submit a Quality Control Plan (QCP) to the Contracting Officer for

review and acceptance within 30 calendar days after award. The CO will review and notify the Contractor of acceptance or identify of any required changes. If changes are required, the Contractor shall make the necessary changes and resubmit the revised QCP within five (5) business days to the CO when changes are made thereafter. The Contractor shall maintain this QCP throughout the life of this requirement (all periods of performance). After acceptance of the quality control plan the Contractor shall receive the Contracting Officer's acceptance in writing of any proposed changes to the accepted QCP.

## 9.2 Quality Assurance Surveillance Plan

The Government shall evaluate the contractor's performance under this contract in accordance with the QASP. The QASP is the Government's internal plan for monitoring and measuring performance to ensure that the contractor has performed in accordance with the performance standards. It defines how the performance standards will be applied, the frequency of surveillance, and the minimum acceptable defect rate(s). Performance will be measured in accordance with table 13 below.

*Table 13 Performance Requirements Summary (Matrix)*

| <b>Deliverable/<br/>Specification Item</b>                                                       | <b>Performance<br/>Standard</b>                                                                                                                                                                  | <b>Target Metric /<br/>Performance<br/>Requirement</b>                                                                                                                                 | <b>Surveillance<br/>Methods</b> | <b>Incentives/<br/>Disincentives</b>                                                                               |
|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|--------------------------------------------------------------------------------------------------------------------|
| Personnel<br>Qualified staff<br>provided with the<br>timeframes specified<br>in the task orders. | Perform all<br>tasks assigned                                                                                                                                                                    | Qualified staff<br>available for<br>tasking within<br>seven (7) days<br>after task<br>order, or<br>option period<br>start date.                                                        | Verification by<br>the COR      | Favorable/unfavorable past<br>performance ratings in the<br>Contractor Performance<br>Assessment Reporting System. |
| IT Asset Management<br>Services                                                                  | Task 1.5<br>Contractor shall<br>ensure IT asset<br>management<br>services                                                                                                                        | Achieve a 95%<br>on-time<br>delivery rate<br>for all shipped<br>IT equipment.                                                                                                          | 100% inspection                 | Favorable/unfavorable past<br>performance ratings in the<br>Contractor Performance<br>Assessment Reporting System. |
| Contractor personnel<br>Availability                                                             | Task 1.1<br>Contractor shall<br>ensure staff is<br>available to<br>always accept<br>service requests<br>when not on<br>scheduled<br>breaks, lunch, or<br>other<br>acceptable<br>auxiliary codes. | Contractor<br>shall ensure<br>that<br>Contractor<br>personnel<br>maintain a<br>daily<br>minimum of<br>80%<br>availability<br>to take<br>service<br>requests in<br>any shift<br>period. | 100% Inspection                 | Favorable/unfavorable past<br>performance ratings in the<br>Contractor Performance<br>Assessment Reporting System. |

|                                       |                                                                                                                                   |                                                                                                                      |                                                                                                                                                |                                                                                                           |
|---------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|
|                                       |                                                                                                                                   | Calculated by: (Talk Time + Hold Time + ACW + Wait Time) - (Not Ready Time + Break Time + Lunch Time) / Staffed Time |                                                                                                                                                |                                                                                                           |
| Customer Service                      | Contractor shall always ensure professional customer service during the period of performance.                                    | Contractor shall ensure Customer Service Survey Scores are 96% or greater.                                           | CDC may conduct random surveys of a number of tickets completed by Contractor personnel and by using ServiceNow customer satisfaction surveys. | Favorable/unfavorable past performance ratings in the Contractor Performance Assessment Reporting System. |
| Quality of Service                    | Contractor shall always ensure accuracy of data entry and effective service request performance during the period of performance. | Contractor shall ensure Contractor personnel receive successful service ratings.                                     | CDC may randomly monitor Contractor employees for quality assurance using Technical Representatives and other options as deemed necessary.     | Favorable/unfavorable past performance ratings in the Contractor Performance Assessment Reporting System. |
| Missed Calls (Task 1.1)               | All calls shall be answered when routed to Contractor personnel.                                                                  | Contractor shall have no missed calls for personnel in Available Status.                                             | CDC and Contractor provided reports                                                                                                            | Favorable/unfavorable past performance ratings in the Contractor Performance Assessment Reporting System. |
| Reporting (see Table 12 Deliverables) | All reports shall be submitted timely and accurately.                                                                             | Contractor shall submit all reports when due and with no gross errors.                                               | 100% review by COR                                                                                                                             | Favorable/unfavorable past performance ratings in the Contractor Performance Assessment Reporting System. |

The Government will use a QASP throughout the life of the contract to ensure the Contractor is performing the services required by this PWS in an acceptable manner. The Government reserves the right to alter or change the surveillance methods in the QASP at its own discretion.

The COR shall be responsible for the oversight of the Task Order's QASP.

Metrics will be defined in greater detail finalizing QCP via coordination with the CITS COR.

The following listing provides various types of surveillance methods that will be performed throughout the life of this requirement.

- Method of Surveillance:
  - 100% Inspection: Appropriate for tasks that occur infrequently. Inspect and evaluate performance each time task is performed.
  - Periodic Inspection: Evaluation of samples selected on other than 100% or statistically random basis (e.g., monthly, quarterly, semi-annually).
  - Random Sampling: Appropriate for frequently recurring tasks. Evaluate randomly selected samples of the lot to determine the acceptability of the entire lot. Clearly identify relevant components if applicable, including a random inspection guide, lot size, sample size, performance requirement, sampling procedure, and inspection procedure.

## SECTION 11 – TRAINING

The Contractor and Contractor's training staff are responsible for all training and costs associated with training beyond the single registration intake, security awareness, or additional training offered by CDC.

## SECTION 12 – ADDITIONAL REQUIREMENTS

### Information Security and Privacy

#### 1. Baseline Security Requirements:

- a. **Applicability.** The requirements herein apply whether the entire contract or modification (hereafter "contract"), or portion thereof, includes either or both of the following:

- i. **Access (Physical or Logical) to Government Information:** A Contractor (and/or

any subcontractor) will have or will be given the ability to have, routine physical (entry) or logical (electronic) access to government information.

- ii. **Operate a Federal System Containing Information:** A Contractor (and/or any subcontractor) will operate a federal system and information technology containing data that supports the CDC mission. In addition to the Federal Acquisition Regulation (FAR) Subpart 2.1 definition of "information technology" (IT), the term as used in this section includes computers, ancillary equipment (including imaging peripherals, input, output, and storage devices necessary for security and surveillance), peripheral equipment designed to be controlled by the central processing unit of a computer, software, firmware and similar procedures, services (including support services), and related resources.

b. **Safeguarding Information and Information Systems.** All government information and information systems must be protected in accordance with HHS/CDC policies and level of risk. At a minimum, the Contractor (and/or any subcontractor) must:

- i. Protect the:

- **Confidentiality**, which means preserving authorized restrictions on access and disclosure, based on the security terms found in this contract, including means for protecting personal privacy and proprietary information;
- **Integrity**, which means guarding against improper information modification or destruction, and ensuring information non-repudiation and authenticity; and
- **Availability**, which means ensuring timely and reliable access to and use of information.

- ii. Categorize all information owned and/or collected/managed on behalf of CDC and information systems that store, process, and/or transmit CDC information in accordance with FIPS 199 and National Institute of Standards and Technology ([NIST Special Publication \(SP\) 800-60, Volume II: Appendices to Guide for Mapping Types of Information and Information Systems to Security Categories.](#)

Based on information provided by the System Security and Privacy Officer (previously referred to as ISSO), CISO, CDC CPO, or other representative, the impact level for each Security Objective (Confidentiality, Integrity, and Availability) and the Overall Impact Level, which is the highest watermark of the three factors of the information or information system are the following:

- **Confidentiality:**      ☐ Low ☐ Moderate ☒ High
- **Integrity:**            ☐ Low ☐ Moderate ☒ High
- **Availability:**        ☐ Low ☐ Moderate ☒ High
- **Overall Impact Level:** ☐ Low ☐ Moderate ☒ High

- iii. Based on the agreed-upon level of impact, implement the necessary safeguards to protect all information systems and information collected and/or managed on behalf of CDC regardless of location or purpose.
  - iv. Report any discovered or unanticipated threats or hazards by either the agency or contractor, or if existing safeguards have ceased to function immediately after discovery, **within one (1) hour or less**, to the government representative(s).
  - v. Adopt and implement all applicable policies, procedures, controls, and standards required by the CDC Information Security Program to ensure the confidentiality, integrity, and availability of government information and government information systems for which the Contractor is responsible under this contract or to which the Contractor may otherwise have access under this contract. Obtain all applicable security and privacy policies by contacting the CO/COR or CDC security and/or privacy officials.
- c. **Privacy Act.** Comply with the Privacy Act requirements (when applicable), and tailor FAR and HHSAR clauses as needed.
- d. **Privacy Compliance.** Comply with the E-Government Act of 2002, NIST SP 800-53, and applicable CDC Component privacy policies and complete all the requirements below:
- i. Per the Office of Management and Budget (OMB) Circular A-130, Personally Identifiable Information (PII), is "information that can be used to distinguish or trace an individual's identity, either alone or when combined with other information that is linked or linkable to a specific individual." Examples of PII include, but are not limited to the following: Social Security number, date and place of birth, mother's maiden name, biometric records, etc.
  - ii. To ensure that the public's personal information is protected in a manner commensurate with the privacy risks, CDC uses a privacy analysis process to assess the risks associated with CDC's collection and maintenance of PII and to ensure information is handled in accordance with applicable legal, regulatory, and policy requirements. PTAs analyze how information is handled in IT systems and electronic information collections and determines if the IT system or electronic information collection collects, disseminates, maintains, or disposes of PII. PIAs are used to assess the privacy risks of IT systems and electronic information collections that collect, disseminate, maintain, or dispose of PII about members of the public. PIAs also provide transparency into how CDC collects, disseminates, maintains, or disposes of the public's PII.
  - iii. The Contractor must support the agency with conducting a Privacy Threshold Analysis (PTA) for the information system and/or information handled under this contract to determine whether PII is collected, disseminated, maintained, or disposed as part of the contract. The PTA will

determine if a full Privacy Impact Assessment (PIA) needs to be completed.

- If the results of the PTA show that a full PIA is needed, the Contractor must support the agency with completing a PIA for the system or information within timeline specified in *CDC Assessment and Authorization (A&A) Standard Operating Procedure* after completion of the PTA and in accordance with CDC policy and OMB M-03-22, *Guidance for Implementing the Privacy Provisions of the E-Government Act of 2002*.
- The Contractor must support the agency in reviewing the PIA at least every **three years** throughout the system development lifecycle (SDLC)/information lifecycle, or when determined by the agency that a review is required based on a major change to the system, or when new types of PII are collected that introduces new or increased privacy risks, whichever comes first.

e. **Controlled Unclassified Information (CUI). Executive Order 13556** defines CUI as "information that laws, regulations, or Government-wide policies require to have safeguarding or dissemination controls, excluding classified information." The Contractor (and/or any subcontractor) must comply with *Executive Order 13556, Controlled Unclassified Information, (implemented at 3 CFR, part 2002)* when handling CUI. 32 C.F.R. 2002.4(aa) As implemented the term "*handling*" refers to "...any use of CUI, including but not limited to marking, safeguarding, transporting, disseminating, re-using, and disposing of the information." 81 Fed. Reg. 63323. The requirements below apply only to nonfederal systems that process, store, or transmit CUI, or that provide security protection for such components. All sensitive information that has been identified as CUI by a regulation or statute, handled by this solicitation/contract, must be:

- i. Marked appropriately;
- ii. Disclosed to authorized personnel on a Need-To-Know basis;
- iii. Protected in accordance with NIST SP 800-53, *Security and Privacy Controls for Information Systems and Organizations* applicable baseline if handled by a Contractor system operated on behalf of the agency, or NIST SP 800-171, *Protecting Controlled Unclassified Information in Nonfederal Information Systems and Organizations* if handled by internal Contractor system; and,
- iv. Returned to HHS/CDC control, destroyed when no longer needed, or held until otherwise directed. Information and/or data must be disposed of in accordance with NIST SP 800-88, *Guidelines for Media Sanitization*.

f. **Protection of Sensitive Information.** For security purposes, information is or may be sensitive because it requires security to protect its confidentiality, integrity, and/or availability. The Contractor (and/or any subcontractor) must protect all government

information that is or may be sensitive by securing it with a solution that is validated with current FIPS 140 validation certificate from the NIST CMVP.

- g. **Confidentiality and Nondisclosure of Information.** Any information provided to the Contractor (and/or any subcontractor) by CDC or collected by the Contractor on behalf of CDC must be used only for the purpose of carrying out the provisions of this contract and must not be disclosed or made known in any manner to any persons except as may be necessary in the performance of the contract. The Contractor assumes responsibility for protection of the confidentiality of Government records and must ensure that all work performed by its employees and subcontractors must be under the supervision of the Contractor. Each Contractor employee or any of its subcontractors to whom any CDC records may be made available or disclosed must be notified in writing by the Contractor that information disclosed to such employee or subcontractor can be used only for that purpose and to the extent authorized herein.

The confidentiality, integrity, and availability of such information must be protected in accordance with HHS/CDC policies. Unauthorized disclosure of information will be subject to the HHS/CDC sanction policies and/or governed by the following laws and regulations:

- i. 18 U.S.C. 641 (Criminal Code: Public Money, Property or Records);
- ii. 18 U.S.C. 1905 (Criminal Code: Disclosure of Confidential Information); and
- iii. 44 U.S.C. Chapter 35, Subchapter I (Paperwork Reduction Act).

- h. **Internet Protocol Version 6 (IPv6).** All procurements using Internet Protocol must comply with OMB Memorandum M-05-22, *Transition Planning for Internet Protocol Version 6 (IPv6)*.

- i. **Information and Communications Technology (ICT).** ICT products and services from prohibited entities/sources must not be used/acquired in compliance with Public Law 115- 232, Section 889 Parts A and B, FAR 4.21, FAR 52.204.23, FAR 52.204.24, and FAR

52.204.25. The Contractor (and/or any subcontractor) must notify the government if they identify prohibited ICT products and/or services are used during the contract performance.

- j. **Government Websites.** All new and existing public-facing government websites must be securely configured with Hypertext Transfer Protocol Secure (HTTPS) using the most recent version of Transport Layer Security (TLS). In addition, HTTPS must enable HTTP Strict Transport Security (HSTS) to instruct compliant browsers to always assume HTTPS to reduce the number of insecure redirects and protect against attacks that attempt to downgrade connections to plain HTTP. For internal-facing websites, HTTPS is not required, but it is highly recommended. Consult HHS/CDC Policy for Internet and Email Security for additional information. According to the CDC Web policy, all CDC web content must reside on a CDC.gov domain and must be hosted on CDC or CDC-authorized information systems.

- k. **Contract Documentation.** The Contractor must use CDC-provided templates, policies,

forms, and other agency documents to comply with contract deliverables as appropriate.

**l. Standard for Encryption.** The Contractor (and/or any subcontractor) must:

- i. Comply with the *HHS Standard for Encryption of Computing Devices and Information* to prevent unauthorized access to government information.
  - ii. Encrypt all sensitive federal data and information (i.e., PII, protected health information [PHI], proprietary information, etc.) in transit (i.e., email, network connections, etc.) and at rest (i.e., servers, storage devices, mobile devices, backup media, etc.) with encryption solution that is validated with current FIPS 140 validation certificate from the NIST CMVP.
  - iii. Secure all devices (i.e.: desktops, laptops, mobile devices, etc.) that store and process government information and ensure devices meet CDC and CDC Component-specific encryption standard requirements. Maintain a complete and current inventory of all laptop computers, desktop computers, and other mobile devices and portable media that store or process sensitive government information (including PII).
  - iv. Verify that the encryption solutions in use have been validated under the Cryptographic Module Validation Program to confirm compliance with current FIPS 140 validation certificate from the NIST CMVP. The Contractor must provide a written copy of the validation documentation to the COR.
  - v. Use the Key Management system on the CDC personal identification verification (PIV) card or establish and use a key recovery mechanism to ensure the ability for authorized personnel to encrypt/decrypt information and recover encryption keys <http://csrc.nist.gov/publications/>. Encryption keys must be provided to CSPO.
- m. **Contractor Non-Disclosure Agreement (NDA).** Each Contractor (and/or any subcontractor) employee having access to non-public government information under this contract must complete the CDC non-disclosure agreement. Contractors (and/or subcontractors) must submit a copy of each signed and witnessed NDA to the Contracting Officer (CO) and/or CO Representative (COR) prior to performing any work under this acquisition.

**2. Training Requirements:**

- a. **Mandatory Training for All Contractor Staff.** All Contractor (and/or any subcontractor) employees assigned to work on this contract must complete the applicable CDC Contractor Information Security Awareness, Privacy, and Records Management training (provided upon contract award) before performing any work under this contract. Thereafter, the employees must complete CDC Information Security Awareness, Privacy, and Records Management training at least **annually**, during the life of this

contract. All provided training must be compliant with CDC training policies.

- b. **Role-based Training.** All Contractor (and/or any subcontractor) employees with significant security responsibilities (as determined by the program manager) must complete role-based training **annually** commensurate with their role and responsibilities in accordance with HHS/CDC policy and the *CDC Role-Based Training (RBT) of Personnel with Significant Security Responsibilities*.
- c. **Training Records.** The Contractor (and/or any subcontractor) must maintain training records for all its employees working under this contract in accordance with CDC policy. A copy of the training records must be provided to the CO and/or COR within **30 days** after contract award and **annually** thereafter or upon request.

### 3. Rules of Behavior:

- a. The Contractor (and/or any subcontractor) must ensure that all employees performing on the contract comply with the *CDC Implementation of the HHS Rules of Behavior for Use of HHS Information Technology Resources*.
- b. All Contractor employees performing on the contract must read and adhere to the Rules of Behavior before accessing agency data or other information, systems, and/or networks that store/process government information, initially at the beginning of the contract and at least **annually** thereafter, which may be done as part of annual CDC Information Security Awareness Training. If the training is provided by the Contractor, the signed ROB must be provided as a separate deliverable to the CO and/or COR per defined timelines above.

### 4. Incident Response:

- a. The Contractor (and/or any subcontractor) must respond to all alerts/Indicators of Compromise (IOCs) provided by CDC Computer Security Incident Response Center (CSIRC) IRT teams **within 24 hours**, whether the response is positive or negative. In accordance with FISMA and OMB M-17-12, *Preparing for and Responding to a Breach of Personally Identifiable Information (PII)*<sup>29</sup>, an incident is "an occurrence that (1) actually or imminently jeopardizes, without lawful authority, the integrity, confidentiality, or availability of information or an information system; or (2) constitutes a violation or imminent threat of violation of law, security policies, security procedures, or acceptable use policies" and a privacy breach is "the loss of control, compromise, unauthorized disclosure, unauthorized acquisition, or any similar occurrence where (1) a person other than an authorized user accesses or potentially accesses personally identifiable information or (2) an authorized user accesses or potentially accesses personally identifiable information for an other than authorized purpose." For additional information on the CDC breach response process, please see the *CDC Standard for Responding to Breaches of Personally Identifiable Information (PII)*.<sup>30</sup>
- b. Contracts with entities that collect, maintain, use, or operate Federal information or information systems on behalf of CDC must include in the following

requirements:

- i. The Contractor shall cooperate with and exchange information with CDC officials, as deemed necessary by the CDC Breach Response Team, to report and manage of a suspected or confirmed breach.
- ii. All contractors and subcontractors shall properly encrypt PII in accordance with OMB Circular A-130 and other applicable policies, including CDC-specific policies, and comply with HHS-specific policies for protecting PII. To this end, all contractors and subcontractors shall protect all sensitive information, including any PII created, stored, or transmitted in the performance of this contract, with encryption solution that is validated with the current FIPS 140 validation certificate from the NIST CMVP.
- iii. All contractors and subcontractors shall participate in regular training on how to identify and report a breach
- iv. NOT notify affected individuals unless so instructed by the Contracting Officer or designated representative. If instructed by the Contracting Officer or representative, the Contractor must send CDC-approved notifications to affected individuals in accordance with CDC privacy breach response policies, including the *CDC/OCIO Standard for Responding to Breaches of Personally Identifiable Information (PII)*.
- v. Report all suspected and confirmed information security and privacy incidents and breaches to the CSPO Incident Response Team (IRT) at csirt@cdc.gov or telephone at 1-866-655-2245, COR, CO, CDC CPO (or his or her designee), and other stakeholders, including breaches involving PII, in any medium or form, including paper, oral, or electronic, as soon as possible and without unreasonable delay, no later than **one**  
**(1) hour**, and consistent with the applicable CDC Component and CDC policy and procedures, NIST standards and guidelines, as well as US-CERT notification guidelines. The types of information required in an incident report must include at a minimum: company and point of contact information, impact classifications/threat vector, and the type of information compromised. In addition, the Contractor must:
  - Cooperate and exchange any information, as determined by the Agency, necessary to effectively manage or mitigate a suspected or confirmed breach;
  - Not include any sensitive information in the subject or body of any reporting e-mail; and
  - Encrypt sensitive information in attachments to email, media, etc.
- vi. Comply with OMB M-17-12, *Preparing for and Responding to a Breach of Personally Identifiable Information*, and CDC privacy breach response policies

when handling PII breaches.

- vii. Provide full access and cooperate on all activities as determined by the Government to ensure an effective incident response, including providing all requested images, log files, and event information to facilitate rapid resolution of sensitive information incidents. This may involve disconnecting the system processing, storing, or transmitting the sensitive information from the Internet or other networks or applying additional security controls. This may also involve physical access to contractor facilities during a breach/incident investigation.
- viii. All contractors and subcontractors shall be able to determine what Federal information was or could have been accessed and by whom, construct a timeline of user activity, determine methods and techniques used to access Federal information, and identify the initial attack vector.
- ix. Cloud service providers shall use guidance provided in the FedRAMP Incident Communications Procedures when deciding when to report directly to US-CERT first or notify CDC first.
- x. Acknowledge that CDC will not interpret report of a breach, by itself, as conclusive evidence that the Contractor or its subcontractor failed to provide adequate safeguards for PII.

#### 5. Position Sensitivity Designations:

All Contractor (and/or any subcontractor) employees must obtain a background investigation commensurate with their position sensitivity designation that complies with Parts 1400 and 731 of Title 5, Code of Federal Regulations (CFR). The following position sensitivity designation levels apply to this solicitation/contract.

☐ Not Applicable

X Level 1: Non-sensitive

☐ Level 2: Non-critical Sensitive

☐ Level 3: Critical Sensitive

☐ Level 4: Special Sensitive

X Level 5: Public Trust/Moderate Risk

☐ Level 6: Public Trust/High Risk

#### 6. Homeland Security Presidential Directive (HSPD)-12:

The Contractor (and/or any subcontractor) and its employees must comply with Homeland Security Presidential Directive (HSPD)-12, *Policy for a Common Identification Standard for*

*Federal Employees and Contractors; OMB M-05-24; OMB M-19-17; FIPS 201, Personal Identity Verification (PIV) of Federal Employees and Contractors; HHS/CDC HSPD-12 policy; and Executive Order 13467, Part 1 §1.2.*

#### 7. Roster:

The Contractor (and/or any subcontractor) must submit a roster by name, position, e-mail address, phone number and responsibility, of all staff working under this acquisition where the Contractor will develop, have the ability to access, or host and/or maintain a government information system(s). The roster must be submitted to the COR and/or CO by the effective date of this contract. Any revisions to the roster as a result of staffing changes must be submitted immediately upon change. The COR will notify the Contractor of the appropriate level of investigation required for each staff member.

If the employee is filling a new position, the Contractor must provide a position description and the Government will determine the appropriate suitability level.

#### 8. Contract Initiation and Expiration:

- a. **General Security Requirements.** The Contractor (and/or any subcontractor) must comply with information security and privacy requirements, Enterprise Performance Life Cycle (EPLC) processes, CDC Enterprise Architecture requirements to ensure information is appropriately protected from initiation to expiration of the contract. All information systems development or enhancement tasks supported by the Contractor must follow the CDC EPLC framework and methodology and in accordance with the CDC Office of Financial Resources (OFR) Contract Closeout Guide and *HHS Closeout Guide: Contracts and Orders*.
- b. **System Documentation.** Contractors (and/or any subcontractors) must follow and adhere to CDC System Development Life Cycle requirements, at a minimum, for system development and provide system documentation at designated intervals (specifically, at the expiration of the contract) within the EPLC that require artifact review and approval.
- c. **Sanitization of Government Files and Information.** As part of contract closeout and at expiration of the contract, the Contractor (and/or any subcontractor) must provide all required documentation to the CO and/or COR to certify that, at the government's direction, all electronic and paper records are appropriately disposed of and all devices and media are sanitized in accordance with NIST SP 800-88, *Guidelines for Media Sanitization*.
- d. **Notification.** The Contractor (and/or any subcontractor) must notify the CO and/or COR and System Security and Privacy Officer (previously referred to as ISSO) before an employee stops working under this contract.
- e. **Contractor Responsibilities upon Physical Completion of the Contract.** The Contractor (and/or any subcontractors) must return all government information and IT resources (i.e., government information in non-government-owned systems, media, and backup

systems) acquired during the term of this contract to the CO and/or COR. Additionally, the Contractor must provide a certification that all government information has been properly sanitized and purged from Contractor-owned systems, including backup systems and media used during contract performance, in accordance with HHS and/or CDC policies.

- f. The Contractor (and/or any subcontractor) must perform and document the actions identified in the CDC Out-Processing Checklist when an employee terminates work under this contract. All documentation must be available to the CO and/or COR upon request.

9. Records Management and Retention:

- a. The Contractor (and/or any subcontractor) must maintain all information in accordance with Executive Order 13556 -- Controlled Unclassified Information, National Archives and Records Administration (NARA) records retention policies and schedules and *CDC Records Management Policy* and must not dispose of any records unless authorized by CDC.
- b. If a Contractor (and/or any subcontractor) accidentally disposes of or destroys a record without proper authorization, he/she must document and report the incident in accordance with CDC policies.

10. High Value Asset (HVA):

If a system is identified as HVA, the Contractor must comply with the HHS Policy for the High Value Asset (HVA) Program and the Department of Homeland Security (DHS) HVA Control Overlay in addition to the above requirements.

11. Security Requirements for GOCO and COCO Resources:

- a. **Federal Policies.** The Contractor (and/or any subcontractor) must comply with applicable federal laws, directives and CDC policies that include, but are not limited to, HHS Information Security and Privacy Policy (IS2P), the CDC IT Security Program Implementation

Standards, *Federal Information Security Modernization Act (FISMA) of 2014, (44 U.S.C. 101)*; National Institute of Standards and Technology (NIST) Special Publication (SP) 800-53, latest revision, *Security and Privacy Controls for Information Systems and Organizations*; Office of Management and Budget (OMB) Circular A-130, *Managing Information as a Strategic Resource*; and other applicable federal laws, regulations, NIST guidance, and agency policies.

- b. **Security Assessment and Authorization (SA&A).** A valid authority to operate (ATO) certifies that the Contractor's information system meets the contract's requirements to protect the agency data. If the system under this contract does not have a valid ATO, the Contractor (and/or any subcontractor) must work with the agency and supply the deliverables required to complete the ATO prior to any use of the system in a

production capacity, i.e., its intended users able to collect, store, process or transmit data to fulfill the system's function. The Contractor must conduct the SA&A requirements in accordance with HHS IS2P/CDC *IT Security Program implementation standard and Appendix K: CDC Organizationally Defined Minimum Numbers and Time Periods Derived from NIST SP 800-53 Revision 5*, NIST SP 800-37, *Guide for Applying the Risk Management Framework to Information Systems: A Security Life Cycle Approach* (latest revision), NIST SP 800-53B, *Control Baselines for Information Systems and Organizations*, and the NIST SP 800-53A (latest revision).

CDC acceptance of the ATO does not alleviate the Contractor's responsibility to ensure the system security and privacy controls are implemented and operating effectively.

i. **SA&A Package Deliverables** - The Contractor (and/or any subcontractor) must provide an SA&A package *timeline, process, and formats prescribed for a* Full system authorization in the CDC Security Assessment and Authorization Standard Operating Procedure (CDC SA&A SOP). The following SA&A deliverables are required to complete the SA&A package:

- **Baseline System Information (BSI)** – The Contractor will document a system overview, in accordance with the timeline, process and formats described in the CDC SA&A SOP. The BSI will include information concerning system identification and ownership; system data, information types, impact levels and system categorization; system functional description / general purpose; system authorization boundary and environment; system user descriptions; and system interconnections and dependencies. The Contractor shall update the BSI at least annually thereafter.
- **Privacy Threshold Analysis / Privacy Impact Analysis** – The Contractor (and/or any subcontractor) shall provide a PTA/PIA (as appropriate), in accordance with the timeline, process and formats described in the CDC SA&A SOP, if applicable. Also see the sections of this contract concerning “Privacy Threshold Analysis (PTA)/Privacy Impact Assessment (PIA)” and “Requirements for Procurements Involving Privacy Act Records.” NOTE: If social security numbers (SSN) are expected to be handled by the system, the program and Contractor must include an SSN Elimination or Usage Approval Request along with the PTA/PIA. That request will be processed in accordance with the CSPO Standard for Limiting the Use of Social Security Numbers in CDC Information Systems.
- **System Security Plan (SSP)** – due in accordance with the timeline prescribed in the *CDC A&A SOP*. The SSP must comply with the NIST SP 800- 18, *Guide for Developing Security Plans for Federal Information Systems*, the Federal Information Processing Standard (FIPS) 200, *Recommended Security Controls for Information Systems*, and NIST SP 800-53, *Security and Privacy Controls for Federal Information Systems and Organizations* applicable baseline requirements, and other

applicable NIST guidance as well as CDC policies and other guidance. The SSP must be consistent with and detail the approach to IT security contained in the Contractor's bid or proposal that resulted in the award of this contract. The SSP must provide an overview of the system environment and security requirements to protect the information system as well as describe all applicable security controls in place or planned for meeting those requirements. It should provide a structured process for planning adequate, cost-effective security protection for a system. The Contractor must review and update the SSP at least **annually** thereafter and if requested, provide a copy of the updated SSP.

- **Risk Assessment Report (RAR)**- The initial security assessment shall be conducted by the Contractor in conjunction with the program's Information System Security Officer, consistent with NIST SP 800-53A, NIST SP 800-30, and HHS and CDC policies. The assessor will document and submit the assessment results in the RAR, in accordance with the process and formats described in the CDC SA&A SOP. The Contractor shall address all "High" deficiencies before submitting the package to the Government for acceptance. All remaining deficiencies must be documented in a system Plan of Actions and Milestones (POA&M) for CDC CSPO approval in accordance with the CDC SA&A SOP. Thereafter, the Contractor, in coordination with CDC, shall conduct an assessment of the security controls and update the RAR within 365 days.
- **POA&M** - The POA&M shall be documented consistent with the HHS Standard for Plan of Action and Milestones and CDC policies. Identified risks stemming from deficiencies related to the security control baseline implementation, assessment, continuous monitoring, vulnerability scanning, and other security reviews and sources, as documented in the Security or Risk Assessment Report (SAR/RAR), shall be documented and tracked by the Contractor for mitigation in the POA&M document. Depending on the severity of the risks, CDC may require designated POAM weaknesses to be remediated before an ATO is issued. Thereafter, the POA&M shall be updated at least **quarterly**.
- **Contingency Plan and Contingency Plan Test** - The Contingency Plan must be developed in accordance with NIST SP 800-34, *Contingency Planning Guide for Federal Information Systems*, and be consistent with HHS/CDC policies. Upon acceptance by the System Owner, the Contractor, in coordination with the System Owner, must test the Contingency Plan and prepare a Contingency Plan Test Report that includes the test results, lessons learned and any action items that need to be addressed. Thereafter, the Contractor must update and test the Contingency Plan at least **annually**.
- **E-Authentication Assessment** - The Contractor (and/or any

subcontractor) must collaborate with government personnel to ensure that the E- Authentication requirements are implemented in accordance with OMB 04- 04 and NIST SP 800-63-3, NIST SP 800-63A, NIST SP 800-63B, and NIST SP

800-63C. Based on the level of assurance determined by the E-Auth, the Contractor (and/or subcontractor) must ensure appropriate authentication to the system, including remote authentication, is in-place in accordance with the assurance level determined by the E-Auth (when required) in accordance with CDC *CSPO Standard for Electronic Authentication (E- Authentication)*, and the *CDC SA&A SOP*.

- ii. **Information Security Continuous Monitoring.** Upon the government issuance of an Authority to Operate (ATO), the Contractor (and/or subcontractor)-owned/operated systems that input, store, process, output, and/or transmit government information, must meet, or exceed, the information security continuous monitoring (ISCM) requirements in accordance with FISMA and NIST SP 800-137, *Information Security Continuous Monitoring (ISCM) for Federal Information Systems and Organizations*, HHS ISCM Strategy, and CDC IT Security Program implementation standard and Appendix K: CDC Organizationally Defined Minimum Numbers and Time Periods Derived from NIST SP 800-53 Revision 5.
- iii. **Annual Assessment/Penetration (Pen) Test** - Assess the system security and privacy controls (or ensure an assessment of the controls is conducted) at least annually to determine the implemented security and privacy controls are operating as intended and producing the desired results (this involves penetration testing conducted by the agency or independent third-party. In addition, review all relevant SA&A documentation (SSP, POA&M, Contingency Plan, etc.) and provide updates by specified due date.
- iv. **Asset Management** - Using any available Security Content Automation Protocol (SCAP)-compliant automated tools for active/passive scans, provide an inventory of all information technology (IT) assets for hardware and software, (computers, servers, routers, databases, operating systems, etc.) that are processing CDC- owned information/data. It is anticipated that this inventory information will be required to be produced at least annually. IT asset inventory information must include IP address, machine name, operating system level, security patch level, and SCAP-compliant format information. The Contractor must maintain a capability to provide an inventory of 100% of its IT assets using SCAP-compliant automated tools in accordance with the HHS Policy for Information Technology Asset Management (ITAM) and any other applicable HHS/CDC policy.
- v. **Configuration Management** - Use available SCAP-compliant automated tools as per NIST IR 7511 and CDC Organizationally-Defined Minimum Numbers and Time Periods Derived from NIST SP 800-53, to scan all IT assets, including but not

limited to: computers, servers, routers, databases, operating systems, application, etc., that store and process government information. Provide scan reports to CDC upon request. The Contractor must maintain a capability to provide security configuration compliance information for 100% of its IT assets using SCAP-compliant automated tools.

- vi. **Vulnerability Management** - Contractors must actively manage system vulnerabilities using automated tools and technologies where practicable and in accordance with *CDC Policy for Vulnerability Management*. Automated tools must be compliant with NIST-specified SCAP standards for vulnerability identification and management. The Contractor must maintain a capability to provide security vulnerability scanning information for 100% of IT assets using SCAP-compliant automated tools and report to the agency at least annually.
- vii. **Patching and Vulnerability Remediation** - Install vendor released security patches and remediate critical and high vulnerabilities in systems processing government information in an expedited manner, within vendor and agency specified timeframes *per CSPO Vulnerability Remediation Framework Standard*.
- viii. **Secure Coding** - Follow the *HHS Policy for Software Development Secure Coding Practices* and the *CDC Secure Software Development Standard* for secure coding best practice requirements, as directed by United States Computer Emergency Readiness Team (US-CERT) specified standards and the Open Web Application Security Project (OWASP), that will limit system software vulnerability exploits.
- ix. **Boundary Protection** - The Contractor must ensure that government information, other than unrestricted information, being transmitted from federal government entities to external entities is routed through a Trusted Internet Connection (TIC).

c. **Government Access for Security Assessment.** In addition to the Inspection Clause in the contract, the Contractor (and/or any subcontractor) must afford the Government access to the Contractor's facilities, installations, operations, documentation, information systems, and personnel used in performance of this contract to the extent required to carry out a program of security assessment (to include vulnerability testing), investigation, and audit to safeguard against threats and hazards to the confidentiality, integrity, and availability of federal data or to the protection of information systems operated on behalf of CDC, including but are not limited to:

- i. At any tier handling or accessing information, consent to and allow the Government, or an independent third party working at the Government's direction, without notice at any time during a weekday during regular business hours contractor local time, to access contractor and subcontractor installations, facilities, infrastructure, data centers, equipment (including but not limited to all servers, computing devices, and portable media), operations, documentation

(whether in electronic, paper, or other forms), databases, and personnel which are used in performance of the contract.

The Government includes but is not limited to the U.S. Department of Justice, U.S. Government Accountability Office, and the CDC Office of the Inspector General (OIG). The purpose of the access is to facilitate performance inspections and reviews, security and compliance audits, and law enforcement investigations. For security audits, the audit may include but not be limited to such items as buffer overflows, open ports, unnecessary services, lack of user input filtering, cross site scripting vulnerabilities, SQL injection vulnerabilities, and any other known vulnerabilities.

ii. At any tier handling or accessing protected information, fully cooperate with all audits, inspections, investigations, forensic analysis, or other reviews or requirements needed to carry out requirements presented in applicable law or policy. Beyond providing access, full cooperation also includes, but is not limited to, disclosure to investigators of information sufficient to identify the nature and extent of any criminal or fraudulent activity and the individuals responsible for that activity. It includes timely and complete production of requested data, metadata, information, and records relevant to any inspection, audit, investigation, or review, and making employees of the Contractor available for interview by inspectors, auditors, and investigators upon request. Full cooperation also includes allowing the Government to make reproductions or copies of information and equipment, including, if necessary, collecting a machine or system image capture.

- Segregate Government protected information and metadata on the handling of Government protected information from other information. Commingling of information is prohibited. Inspectors, auditors, and investigators will not be precluded from having access to the sought information if sought information is commingled with other information.
- Cooperate with inspections, audits, investigations, and reviews.

d. **End of Life Compliance.** The Contractor (and/or any subcontractor) must use Commercial off the Shelf (COTS) software or other software that is supported by the manufacturer. In addition, the COTS/other software need to be within one major version of the current version; deviation from this requirement will only be allowed via the CDC waiver process (approved by CDC CISO). The Contractor must retire and/or upgrade all software/systems that have reached end-of-life in accordance with *HHS End of Life Operating Systems, Software and Application Policy*.

e. **Desktops, Laptops, and Other Computing Devices Required for Use by the Contractor.** The Contractor (and/or any subcontractor) must ensure that all IT equipment (e.g., laptops, desktops, servers, routers, mobile devices, peripheral devices, etc.) used to process information on behalf of CDC are deployed and operated in accordance with approved security configurations and meet the following minimum requirements:

- i. Encrypt equipment and sensitive information stored and/or processed by such equipment in accordance with HHS/CDC encryption standard and current FIPS 140 validation certificate from the NIST CMVP;
  - ii. Configure laptops and desktops in accordance with the latest applicable United States Government Configuration Baseline (USGCB) and HHS Minimum Security Configuration Standards<sup>33</sup>;
  - iii. Maintain the latest operating system patch release and anti-virus software definitions;
  - iv. Validate the configuration settings after hardware and software installation, operation, maintenance, update, and patching and ensure changes in hardware and software do not alter the approved configuration settings; and
  - v. Automate configuration settings and configuration management in accordance with CDC security policies, including but not limited to:
    - Configuring its systems to allow for periodic CDC vulnerability and security configuration assessment scanning; and
    - Using Security Content Automation Protocol (SCAP)-validated tools with capabilities to scan its systems at least on a monthly basis and report the results of these scans to the CO and/or COR, Project Officer, and any other applicable designated POC.
- f. **Change Management.** Once a system is authorized, all changes must be approved by CDC in accordance with NIST SP 800-53, Security and Privacy Controls for Federal Information Systems and Organizations; the HHS IS2P; and the timeline, process and formats prescribed in the CDC CSPO Change Management Standard Operating Procedure.
- g. **Retirement / Decommissioning.** When the CDC program and Contractor determine the system is no longer required, it must be decommissioned in accordance with NIST SP 800- 88, Guidelines for Media Sanitization; the HHS IS2P; and the timeline, process and formats prescribed in the CDC CSPO System Retirement Standard Operating Procedure.<sup>34</sup>
- h. **Rights to Data.** All contracts that require data to be produced, furnished, acquired, or used in meeting contract performance requirements, must contain terms that delineate the respective rights and obligations of the Government and the Contractor regarding the use, reproduction, and disclosure of that data. Data rights clauses do not specify the type, quantity or quality of data that is to be delivered, but only the respective rights of the Government and the Contractor regarding the use, disclosure, or reproduction of the data. Accordingly, the contract must specify the data to be delivered.
- i. **Information and Communications Technology (ICT) Cybersecurity Supply Chain**

**Risk Management (C-SCRM) requirements.** The Contractor (and/or any subcontractor) must secure their ICT supply chain in compliance with *HHS Policy for Cyber Supply Chain Risk Management* and Public Law 115-232 § 889. At a minimum, they must implement the following:

- i. Develop rules for suppliers' development methods, techniques, or practices;
- ii. Use of secondary market components;
- iii. Prohibit counterfeit products;
- iv. Dispose and/or retain elements such as components, data, or intellectual property securely;
- v. Ensure adequate supply of components;
- vi. Require external providers handling federal information or operating systems on behalf of the federal government to meet the same security and privacy requirements as federal agencies;
- vii. Require external providers to express security and privacy requirements (including the controls for systems processing, storing, or transmitting federal information) in contracts or other formal agreements;
- viii. Establish Service Level Agreements (SLAs), patching vehicles and disclosure requirements in the case of a security incident or new vulnerability being discovered;
- ix. Ensure that the supplier applies same contractual requirements to any sub- contractors/suppliers that they involve in the provision of the product or service to the customer; and,
- x. Prohibit the use of covered telecommunications and video surveillance equipment or services.

1. HHS/CDC FedRAMP Privacy and Security Requirements:

The Contractor (and/or any subcontractor) must be responsible for the following privacy and security requirements:

- a. **FedRAMP Compliant ATO.** Comply with FedRAMP Security Assessment and Authorization (SA&A) requirements and ensure the information system/service under this contract has a valid FedRAMP compliant (approved) authority to operate (ATO) in accordance with Federal Information Processing Standard (FIPS) Publication 199 defined security categorization. If a FedRAMP compliant ATO has not been granted, the Contractor must submit a plan to obtain a FedRAMP compliant ATO.
  - i. Implement applicable FedRAMP baseline controls commensurate with the agency- defined security categorization and the applicable FedRAMP security control baseline ([www.FedRAMP.gov](http://www.FedRAMP.gov)). The *HHS Information Security and Privacy Policy (IS2P)* and *HHS Cloud Computing and Federal Risk and*

*Authorization Management Program (FedRAMP) Guidance* further define the baseline policies as well as roles and responsibilities. The Contractor must also implement a set of additional controls identified by the agency when applicable.

- ii. A security control assessment must be conducted by a FedRAMP third-party assessment organization (3PAO) for the initial ATO and **annually** thereafter or whenever there is a significant change to the system's security posture in accordance with the FedRAMP Continuous Monitoring Plan.

- b. **Data Jurisdiction.** The Contractor must store all information within the security authorization boundary, data at rest or data backup, within the Continental United States (CONUS) if so required.
- c. **Service Level Agreements.** When applicable, the Contractor must understand the terms of the service agreements that define the legal relationships between cloud customers and cloud providers and work with CDC to develop and maintain an SLA.
- d. **Interconnection Agreements/Memorandum of Agreements.** When applicable, the Contractor must establish and maintain Interconnection Agreements and or Memorandum of Agreements/Understanding in accordance with HHS/CDC policies.

## 2. Protection of Information in a Cloud Environment:

- a. If Contractor (and/or any subcontractor) personnel must remove any information from the primary work area, they must protect it to the same extent they would the proprietary data and/or company trade secrets and in accordance with HHS/CDC policies.
- b. HHS/CDC will retain unrestricted rights to federal data handled under this contract. Specifically, HHS/CDC retains ownership of any user created/loaded data and applications collected, maintained, used, or operated on behalf of HHS/CDC and hosted on Contractor's infrastructure, as well as maintains the right to request full copies of these at any time. If requested, data must be available to HHS/CDC within **one (1) business day** from request date or within the timeframe specified otherwise. In addition, the data must be provided at no additional cost to HHS/CDC.
- c. The Contractor (and/or any subcontractor) must ensure that the facilities that house the network infrastructure are physically and logically secure in accordance with FedRAMP requirements and HHS/CDC policies.
- d. The Contractor must support a system of records in accordance with NARA-approved records schedule(s) and protection requirements for federal agencies to manage their electronic records in accordance with 36 CFR § 1236.20 & 1236.22 (ref. a), including but not limited to the following:
  - i. Maintenance of links between records and metadata; and,

- ii. Categorization of records to manage retention and disposal, either through transfer of permanent records to NARA or deletion of temporary records in accordance with NARA-approved retention schedules.
- e. The disposition of all HHS/CDC data must be at the written direction of HHS/CDC. This may include documents returned to HHS/CDC control; destroyed; or held as specified until otherwise directed. Items returned to the Government must be hand carried or sent by certified mail to the COR.
  - i. If the system involves the design, development, or operation of a system of records on individuals, the Contractor must comply with the Privacy Act requirements.

### 3. Security Assessment and Authorization (SA&A) Process:

- a. The Contractor (and/or any subcontractor) must comply with CDC and FedRAMP requirements as mandated by federal laws, regulations, and CDC policies, including making available any documentation, physical access, and logical access needed to support the SA&A requirement. The level of effort for the SA&A is based on the system's FIPS 199 security categorization and HHS/CDC security policies and in accordance with the contract language herein related to "Security Requirements for GOCO or COCO Systems".
  - i. In addition to the FedRAMP compliant ATO, the Contractor must complete and maintain an agency SA&A package to obtain agency ATO prior to system deployment/service implementation prior to system deployment/service implementation in accordance with the contract language herein related to "Security Requirements for GOCO or COCO Systems". The agency ATO must be approved by the CDC authorizing official (AO) prior to implementation of system and/or service being acquired.
  - ii. CSP systems must leverage a FedRAMP accredited third-party assessment organization (3PAO).
  - iii. For all acquired cloud services, the SA&A package must contain the following documentation: SA&A package deliverables mentioned in the FedRAMP Standard Contract Language available on the FedRAMP site ([www.fedramp.gov](http://www.fedramp.gov)) and in the CDC Assessment and Authorization (A&A) Standard Operating Procedure (SOP). Following the initial ATO, the Contractor must review and maintain the ATO in accordance with HHS/CDC policies, using the FedRAMP templates (<http://www.fedramp.gov/>) or CDC A&A templates prior to ATO expiration.
- b. CDC reserves the right to perform penetration testing (pen testing) on all systems operated on behalf of agency. If CDC exercises this right, the Contractor (and/or any subcontractor) must allow CDC employees (and/or designated third parties) to conduct Security Assessment activities to include control reviews in accordance with CDC

requirements. Review activities include, but are not limited to, scanning operating systems, web applications, wireless scanning; network device scanning to include routers, switches, and firewall, and IDS/IPS; databases and other applicable systems, including general support structure, that support the processing, transportation, storage, or security of Government information for vulnerabilities.

c. The Contractor must identify any gaps between required FedRAMP Security Control Baseline/Continuous Monitoring controls and the Contractor's implementation status as documented in the Security Assessment Report and related Continuous Monitoring artifacts. In addition, the Contractor must document and track all gaps for mitigation in a Plan of Action and Milestones (POA&M) document. Depending on the severity of the risks, CDC may require remediation at the Contractor's expense, before CDC issues an ATO.

d. The Contractor (and/or any subcontractor) must mitigate security risks for which they are responsible, including those identified during SA&A and continuous monitoring activities. All vulnerabilities and findings must be remediated, in accordance with timelines specified in the CDC POA&M Standard, from discovery: (1) critical vulnerabilities no later than **fifteen**.

**(15) days** and (2) high within **thirty (30) days** (3) medium within **ninety (90) days** and (4) low vulnerabilities no later **than three hundred and sixty (360) days**. In the event a vulnerability or other risk finding cannot be mitigated within the prescribed timelines above, they must be added to the designated POA&M and mitigated within the newly designated timelines in accordance with the *Cybersecurity Weakness Management Standard* and *CSPO Vulnerability Remediation Framework Standard*. CDC will determine the risk rating of vulnerabilities using FedRAMP baselines.

e. **Revocation of a Cloud Service.** HHS and CDC/OCIO have the right to take action in response to the CSP's lack of compliance and/or increased level of risk. In the event the CSP fails to meet HHS and FedRAMP security and privacy requirements and/or there is an incident involving sensitive information, HHS and/or CDC may suspend or revoke an existing agency ATO (either in part or in whole) and/or cease operations. If an ATO is suspended or revoked in accordance with this provision, the CO and/or COR may direct the CSP to take additional security measures to secure sensitive information. These measures may include restricting access to sensitive information on the Contractor information system under this contract. Restricting access may include disconnecting the system processing, storing, or transmitting the sensitive information from the Internet or other networks or applying additional security controls.

#### 4. Reporting and Continuous Monitoring:

a. Following the initial ATOs, the Contractor (and/or any subcontractor) must perform the minimum ongoing continuous monitoring activities specified below, submit required deliverables by the specified due dates, and meet with the system/service owner and other relevant stakeholders to discuss the ongoing continuous monitoring activities, findings, and other relevant matters. The CSP will work with the agency to schedule

ongoing continuous monitoring activities.

b. At a minimum, the Contractor must provide the following artifacts/deliverables monthly and in accordance with SA&A package deliverables mentioned in the *FedRAMP Standard Contract Language* available on the FedRAMP site ([www.fedramp.gov](http://www.fedramp.gov)) and in the *CDC Assessment and Authorization (A&A) Standard Operating Procedure (SOP)*:

- i. Perform periodic Authenticated Vulnerability Scans and Application Scans (if applicable) according to CSPO ISCM guidance
- ii. Perform weekly scans (at a minimum) and provide results to CDC Component System Security and Privacy Officer (previously referred to as ISSO) and CSPO ISCM for systems with a FIPS 199 impact level of High, HVA, or if the system contains PII, and ensure scan results are submitted in either CSV or PDF format
- iii. Remediate vulnerabilities in accordance with CSPO Vulnerability Remediation Framework Policy
- iv. Advise the CDC Component System Security and Privacy Officer (previously referred to as ISSO) for any instance when critical/high vulnerabilities cannot be remediated as in accordance with the CSPO Vulnerability Framework Standard
- v. Submit monthly Authenticated Vulnerability scans and Application scans (if applicable) to CDC (business owner) and CDC Component System Security and Privacy Officer (previously referred to as ISSO) operating system, database, Web application, and network vulnerability scan results;
- vi. Updated POA&Ms;
- vii. Any updated authorization package documentation as required by the annual attestation/assessment/review or as requested by the System Owner or AO; and,
- viii. Any configuration changes to the system and/or system components or CSP's cloud environment, that may impact CDC's security posture. Changes to the configuration of the system, its components, or environment that may impact the security posture of the system under this contract must be approved by the agency.
- ix. CDC Component System Owner:
  - x. Confirm Vendor/Contractor is performing Authenticated Vulnerability Scans and Application Scans (if applicable) according to CSPO ISCM guidance
  - xi. Review monthly Authenticated Vulnerability Scans and Application Scans (if applicable); Develop POA&Ms as needed
  - xii. Submit monthly Authenticated Vulnerability Scans and Application Scans (if applicable) to CSPO ISCM

- xiii. Submit written waiver requests to the CISO when systems cannot comply with the provisions of this standard
- xiv. Track remediation/mitigation of security gaps to closure

#### 5. Configuration Baseline:

- a. The Contractor must certify that applications are fully functional and operate correctly as intended on systems using HHS *CDC Minimum Security Configurations Standards Guidance* and CDC *Cybersecurity Configuration Settings Management Standard*. The standard installation, operation, maintenance, updates, and/or patching of software must not alter the configuration settings from the approved HHS/CDC configuration baseline.
- b. The Contractor must use Security Content Automation Protocol (SCAP) validated tools with configuration baseline scanner capability to certify their products operate correctly with CDC and NIST defined configurations and do not alter these settings.

#### 6. Incident Reporting:

- a. The Contractor (and/or any subcontractor) must provide an Incident and Breach Response Plan (IRP) in accordance with HHS, CDC, OMB, and US-CERT requirements and obtain approval from the CDC Component. In addition, the Contractor must follow the incident response and US-CERT reporting guidance contained in the FedRAMP Incident Communications.
- b. The Contractor (and/or any subcontractor) must implement a program of inspection to safeguard against threats and hazards to the security, confidentiality, integrity, and availability of federal data, afford CDC access to its facilities, installations, technical capabilities, operations, documentation, records, and databases within 72 hours of notification. The program of inspection must include, but is not limited to:
  - i. Conduct authenticated and unauthenticated operating system/network/database/Web application vulnerability scans. Automated scans can be performed by CDC personnel, or agents acting on behalf of CDC, using agency-operated equipment and/or specified tools. The Contractor may choose to run its own automated scans or audits, provided the scanning tools and configuration settings are compliant with NIST Security Content Automation Protocol (SCAP) standards and have been approved by the agency. The agency may request the Contractor's scanning results and, at the agency discretion, accept those in lieu of agency performed vulnerability scans.
  - ii. In the event an incident involving sensitive information occurs, cooperate on all required activities determined by the agency to ensure an effective incident, or breach response and provide all requested images, log files, and event information to facilitate rapid resolution of sensitive information incidents. In addition, the Contractor must follow the agency reporting procedures and

document the steps it takes to contain and eradicate the incident, recover from the incident, and provide a post-incident report that includes at a minimum the following:

- Company and point of contact name;
- Contract information;
- Impact classifications/threat vector;
- Type of information compromised;
- A summary of lessons learned; and,
- Explanation of the mitigation steps of exploited vulnerabilities to prevent similar incidents in the future.

#### 7. Media Transport:

- a. The Contractor and its employees must be accountable and document all activities associated with the transport of government information, devices, and media transported outside controlled areas and/or facilities. These include information stored on digital and non-digital media (e.g., CD-ROM, tapes, etc.), mobile/portable devices (e.g., USB flash drives, external hard drives, and SD cards).
- b. All information, devices, and media must be encrypted with HHS/CDC-approved encryption mechanisms to protect the confidentiality, integrity, and availability of all government information transported outside of controlled facilities.

#### 8. Boundary Protection: Trusted Internet Connections (TIC):

- a. The Contractor must ensure that government information, other than unrestricted information, being transmitted from federal government entities to external entities using cloud services is inspected by Trusted Internet Connection (TIC) processes that are in compliance with the requirements of the Office of Management and Budget (OMB) Memorandum (M) 19-26: Update to the TIC Initiative, TIC 3.0.
- b. The Contractor must route all external connections through a TIC.
- c. **Non-Repudiation.** The Contractor must provide a system that implements encryption with current FIPS 140 validation certificate from the NIST CMVP that provides for origin authentication, data integrity, and signer non-repudiation.

**Card Readers.** The Contractor (and/or any subcontractor) must include [Federal Information Processing Standard \(FIPS\) 201-compliant](#) smart card readers (referred to as LACS Transparent Readers) with the purchase of servers, printers, desktops, and laptops.

**Mobile Devices.** The Contractor must follow NIST 800-124, Rev. 1, *Guidelines for Managing the Security of Mobile Devices in the Enterprise* and comply with Public Law 115-232 § 889, when purchasing mobile devices that process or store CDC data.

### **Data Rights for Federal Source Code**

As required by the Federal Source Code Policy set out in OMB Memo M-16-21, all computer software first produced in the performance of this contract shall be open source software and shall be available for Government-wide use and for use by the public with data use rights under FAR 52.227-14 Rights in Data - General, unless otherwise specified in writing by the contract officer. The Contractor (and/or any subcontractor) shall maintain, at all times, a working, current and fully-documented copy of all project or activity custom-developed source code in a repository from the CDC Recognized List of Source Code Repositories. The prior, express written permission of the Contracting Officer is required to assert copyright in all computer software first produced in the performance of this contract.

### **Non-Commercial and Open-Source Computer Software Procurements**

The Contractor (and/or any subcontractor) must follow secure coding best practice requirements, as directed by the United States Computer Emergency Readiness Team (US-CERT) specified standards and the Open Web Application Security Project (OWASP) that will limit system software vulnerability exploits. The Contractor will be liable for malicious or defective code or failure to reduce risk.

### **Information Technology Application Design, Development, or Support**

- j. The Contractor (and/or any subcontractor) must ensure IT applications designed and developed for end users (including mobile applications and software licenses) run in the standard user context without requiring elevated administrative privileges.
- k. The Contractor must consult the guidelines from NIST SP 800-160 volume 1, *Systems Security Engineering: Considerations for a Multidisciplinary Approach in the Engineering of Trustworthy Secure Systems*, NIST SP 800-160 volume 2, *Systems Security Engineering: Considerations for a Multidisciplinary Approach in the Engineering of Trustworthy Secure Systems*, and NIST SP 800-53 to implement security during the development of all applications and throughout the life cycle stages of software development.
- l. The Contractor (and/or any subcontractor) must follow secure coding best practice requirements, as directed by United States Computer Emergency Readiness Team (US- CERT) specified standards, the Open Web Application Security Project (OWASP), System Admin, Audit, Network and Security (SANS), *HHS Policy for Software Development Secure Coding Practices*, and *CDC Secure Software Development Standard* that will limit system software vulnerability exploits.
- m. The Contractor (and/or any subcontractor) must ensure that computer software developed on behalf of CDC or tailored from an open-source product, is fully functional and operates correctly on systems configured in accordance with government policy and federal configuration standards. The contractor must test applicable products and versions with all relevant and current updates and patches updated prior to installing in the CDC environment. No sensitive data must be used during software testing.

- n. The Contractor must, at a minimum, segregate physically or logically, all test and development systems from production systems as applicable in accordance with the *HHS Standard for Segregation of Dev/Test Environments from Production*.
- o. The Contractor (and/or any subcontractor) must protect information that is deemed sensitive from unauthorized disclosure to persons, organizations or subcontractors who do not have a need to know the information. Information which, either alone or when compared with other reasonably available information, is deemed sensitive or proprietary by CDC must be protected as instructed in accordance with the magnitude of the loss or harm that could result from inadvertent or deliberate disclosure, alteration, or destruction of the data. This language also applies to all subcontractors that are performing under this contract.

#### **SCHEDULE OF DELIVERABLES**

| <b>Deliverable Title/Description</b>                                                                                                                     | <b>Due Date</b>                                                                                                            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|
| Roster                                                                                                                                                   | By the effective date of this contract.                                                                                    |
| Contractor Employee Non- Disclosure Agreement (NDA)                                                                                                      | Prior to performing any work on behalf of HHS/CDC.                                                                         |
| Assist in the completion of a PTA/PIA form                                                                                                               | In conjunction with contract award.                                                                                        |
| Copy of training records for all mandatory training                                                                                                      | In conjunction with contract award and annually thereafter or upon request.                                                |
| Signed ROB for all employees                                                                                                                             | Initiation of contract and at least annually thereafter.                                                                   |
| Incident Report (as incidents or breaches occur)                                                                                                         | As soon as possible and without reasonable delay and no later than 1 hour of discovery.                                    |
| Incident and Breach Response Plan                                                                                                                        | Upon request from government.                                                                                              |
| List of Personnel with defined roles and responsibilities                                                                                                | Prior to performing any work on behalf of HHS/CDC.                                                                         |
| Off-boarding documentation, equipment and badge when leaving contract                                                                                    | After the Government's final acceptance of the work under this contract, or in the event of a termination of the contract. |
| Onboarding documentation when beginning contract.                                                                                                        | Prior to performing any work on behalf of CDC.                                                                             |
| Form or deliverables required by CDC.                                                                                                                    | At contract expiration.                                                                                                    |
| If the procurement involves a system or cloud service, additional documentation will be required, such as Disposition/Decommission Plan                  | At contract expiration.                                                                                                    |

## Section 508 Compliance

### **Electronic and Information Technology Accessibility Notice**

- (a) Section 508 of the Rehabilitation Act of 1973 (29 U.S.C. 794d), as amended by the Workforce Investment Act of 1998 and the Architectural and Transportation Barriers Compliance Board Electronic and Information (EIT) Accessibility Standards (36 CFR part 1194), require that when Federal agencies develop, procure, maintain, or use electronic and information technology, Federal employees with disabilities have access to and use of information and data that is comparable to the access and use by Federal employees who are not individuals with disabilities, unless an undue burden would be imposed on the agency. Section 508 also requires that individuals with disabilities, who are members of the public seeking information or services from a Federal agency, have access to and use of information and data that is comparable to that provided to the public who are not individuals with disabilities, unless an undue burden would be imposed on the agency.
- (b) Accordingly, any offeror responding to this solicitation must comply with established DHHS EIT accessibility standards. Information about Section 508 is available at <https://www.hhs.gov/web/section-508/>. The complete text of the Section 508 Final Provisions can be accessed at <https://www.access-board.gov/ict/>.
- (c) The Section 508 accessibility standards applicable to this contract are: 1194.

205 WCAG 2.0 Level A & AA Success Criteria  
302 Functional Performance Criteria  
502 Inoperability with Assistive Technology  
503 Applications  
504 Authoring Tools  
602 Support Documentation  
603 Support Services

In order to facilitate the Government's determination whether proposed EIT supplies meet applicable Section 508 accessibility standards, offerors must submit a DHHS Section 508 Product Assessment Template, in accordance with its completion instructions. The purpose of the template is to assist DHHS acquisition and program officials in determining whether proposed EIT supplies conform to applicable

Section 508 accessibility standards. The template allows offerors or developers to self-evaluate their supplies and document—in detail—whether they conform to a specific Section 508 accessibility standard, and any underway remediation efforts addressing conformance issues. Instructions for preparing the HHS Section 508 Evaluation Template are available under Section 508 policy on the HHS website <https://www.hhs.gov/web/section-508/>. Offerors may alternatively provide a Section 508 Accessibility conformance report (ACR) as described at [Home | Section508.gov](https://www.section508.gov) (<https://www.section508.gov>).

In order to facilitate the Government’s determination whether proposed EIT services meet applicable Section 508 accessibility standards, offerors must provide enough information to assist the Government in determining that the EIT services conform to Section 508 accessibility standards, including any underway remediation efforts addressing conformance issues.

(d) Respondents to this solicitation must identify any exception to Section 508 requirements. If an offeror claims its supplies or services meet applicable Section 508 accessibility standards, and it is later determined by the Government, i.e., after award of a contract or order, that supplies or services delivered do not conform to the accessibility standards, remediation of the supplies or services to the level of conformance specified in the contract will be the responsibility of the Contractor at its expense.

(e) Electronic content must be accessible to DHHS acceptance criteria. Checklist for various formats is available at <https://www.hhs.gov/web/section-508/>, or from the Section 508 Coordinator listed at [Accessibility Resources | HHS.gov](https://www.hhs.gov/web/section-508/additional-resources/index.html) (<https://www.hhs.gov/web/section-508/additional-resources/index.html>). Materials that are final items for delivery should be accompanied by the appropriate checklist, except upon approval of the CO or Representative.

#### **Confidentiality and Nondisclosure of Information.**

Any information provided to the contractor (and/or any subcontractor) by DHHS or collected by the contractor on behalf of DHHS shall be used only for the purpose of carrying out the provisions of this contract and shall not be disclosed or made known in any manner to any persons except as may be necessary in the performance of the contract. The Contractor assumes responsibility for protection of the confidentiality of Government records and shall ensure that all work performed by its employees and subcontractors shall be under the supervision of the Contractor. Each Contractor employee or any of its subcontractors to whom any DHHS records may be made available or disclosed shall be notified in writing by the Contractor that information disclosed to such employee or subcontractor can be used only for that purpose and to the extent authorized herein.

The confidentiality, integrity, and availability of such information shall be protected in accordance with DHHS and [CDC] policies. Unauthorized disclosure of information will be subject to the DHHS/[CDC] sanction policies and/or governed by the following laws and regulations:

- a. 18 U.S.C. 641 (Criminal Code: Public Money, Property or Records);
- b. 18 U.S.C. 1905 (Criminal Code: Disclosure of Confidential Information); and
- c. 44 U.S.C. Chapter 35, Subchapter I (Paperwork Reduction Act).

#### **Contractor Non-Disclosure Agreement (NDA).**

Each Contractor (and/or any subcontractor) employee having access to non-public Government information under this contract shall complete the CDC non-disclosure agreement, as applicable. A copy

of each signed and witnessed NDA shall be submitted to the CO and/or COR prior to performing any work under this acquisition.

## SECTION D – CONTRACT PROVISIONS AND CLAUSES

### D.1. CONTRACT PROVISIONS

#### **FAR 52.252-1 Solicitation Provisions Incorporated by Reference (Feb 1998)**

This solicitation incorporates one or more solicitation provisions by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. The offeror is cautioned that the listed provisions may include blocks that must be completed by the offeror and submitted with its quotation or offer. In lieu of submitting the full text of those provisions, the offeror may identify the provision by paragraph identifier and provide the appropriate information with its quotation or offer. Also, the full text of a solicitation provision may be accessed electronically at this/these address(es):

[Revolutionary FAR Overhaul | Acquisition.GOV](https://www.acquisition.gov/hhsar)  
<https://www.acquisition.gov/hhsar>

(End of provision)

#### **Provisions Incorporated by Reference:**

| <b>FAR SOURCE</b> | <b>TITLE AND DATE</b>                                                                                                                     |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| 52.203-11         | Certification and Disclosure Regarding Payments to Influence Certain Federal Transactions (Sep 2024)                                      |
| 52.203-18         | Prohibition on Contracting with Entities that Require Certain Internal Confidentiality Agreements or Statements-Representation (Jan 2017) |
| 52.204-7          | System for Award Management—Registration (Deviation) (RFO Aug 2025)                                                                       |
| 52.209-2          | Prohibition on Contracting with Inverted Domestic Corporations—Representation (Deviation) (RFO Aug 2025)                                  |
| 52.209-5          | Certification Regarding Responsibility Matters (Deviation) (RFO Aug 2025)                                                                 |
| 52.209-7          | Information Regarding Responsibility Matters (Deviation) (RFO Aug 2025)                                                                   |
| 52.209-11         | Representation by Corporations Regarding Delinquent Tax Liability or a Felony Conviction under any Federal Law (Deviation) (RFO Aug 2025) |
| 52.209-12         | Certification Regarding Tax Matters (Oct 2025)                                                                                            |
| 52.216-31         | Time-and-Materials/Labor-Hour Proposal Requirements—Commercial Acquisition (Nov 2021)                                                     |
| 52.217-5          | Evaluation of Options (Deviation) (RFO Aug 2025)                                                                                          |
| 52.229-11         | Tax on Certain Foreign Procurements—Notice and Representation (June 2020)                                                                 |
| 52.233-2          | Service of Protest (Deviation) (RFO Aug 2025)                                                                                             |
| 52.240-90         | Security Prohibitions and Exclusions Representations and Certifications (Deviation) (RFO Aug 2025)                                        |

System updates may lag policy updates. The System for Award Management (SAM) may continue to require entities to complete representations based on provisions that are not included in this solicitation. Contracting officers will rely on representations from offers based on provisions in the

solicitation. Entities are not required to, nor are they able to, update their entity registration to remove these representations in SAM.

**Provisions Incorporated in Full Text:**

**HHSAR 352.239-72 Information Technology Security Plan and Accreditation (FEB 2024) (Deviation)**

All offers submitted in response to this solicitation or request for quotation shall address the approach for completing the security plan and accreditation requirements in clause 352.239-71, Security Requirements for Information Technology Resources.

(End of provision)

**HHSAR 352.239-78 Information and Communication Technology Accessibility Notice (FEB 2024) (Deviation)**

(a) Any offeror responding to this solicitation must comply with established HHS Information and Communication Technology (ICT) accessibility standards. Information about Section 508 is available at <https://www.hhs.gov/web/section-508/index.html>.

(b) The Section 508 accessibility standards applicable to this solicitation are stated in the clause at 352.239-79 Information and Communication Technology Accessibility. In order to facilitate the Government's determination whether proposed ICT supplies, products, platforms, information, and documentation meet applicable Section 508 accessibility standards, offerors must submit an appropriate HHS Section 508 Accessibility Conformance Checklist (see <https://www.hhs.gov/web/section-508/accessibility-checklists/index.html>) or an Accessibility Conformance Report (ACR) (based on the Voluntary Product Accessibility Template (VPAT) see <https://www.itic.org/policy/accessibility/vpat>), in accordance with the completion instructions. The purpose of the checklists and conformance reports are to assist HHS acquisition and program officials in determining whether proposed ICT supplies, products, platforms, information, and documentation conform to applicable Section 508 accessibility standards. Checklists and ACRs evaluate—in detail—whether the ICT conforms to specific Section 508 accessibility standards and identifies remediation efforts needed to address conformance issues.

(c) If an offeror claims its supplies or services meet applicable Section 508 accessibility standards, and it is later determined by the Government, i.e., after award of a contract or order, that supplies, products, platforms, information, documentation, or services support delivered do not conform to the described accessibility standards, remediation of the supplies, products, platforms, information, documentation, or services support to the level of conformance specified in the contract will be the responsibility of the Contractor at its expense.

(d) In order to facilitate the Government's determination whether proposed ICT supplies meet applicable Section 508 accessibility standards, offerors must submit an Accessibility Conformance Report, in accordance with its completion instructions and tailored to the requirements in the solicitation. The purpose of the Report is to assist HHS acquisition and program officials in determining whether proposed ICT supplies conform to applicable Section 508 accessibility standards. The template allows offerors or developers to self-evaluate their

supplies and document, in detail, whether they conform to a specific Section 508 accessibility standard, and any underway remediation efforts addressing conformance issues. Instructions for preparing the HHS Section 508 Evaluation Template are available at <https://Section508.gov/>

(e) In order to facilitate the Government's determination whether proposed ICT services meet applicable Section 508 accessibility standards, offerors must provide enough information to assist the Government in determining that the ICT services conform to Section 508 accessibility standards, including any underway remediation efforts addressing conformance issues.

(f) Respondents to this solicitation must identify any inability to conform to Section 508 requirements. If an offeror claims its supplies or services meet applicable Section 508 accessibility standards, and it is later determined by the Government, i.e., after award of a contract or order, that supplies or services delivered do not conform to the described accessibility standards, remediation of the supplies or services to the level of conformance specified in the contract will be the responsibility of the Contractor at its expense.

(g) Items delivered as electronic content must be accessible to HHS acceptance criteria. Checklist for various formats are available at <http://508.hhs.gov/>. Materials, other than items incidental to contract management, that are final items for delivery should be accompanied by the appropriate checklist, except upon approval of the Contracting Officer or Contracting Officer's Representative.

(End of provision)

## **D.2. CONTRACT CLAUSES**

In addition to the contractor's GSA Alliant 2 contract, the following clauses are incorporated:

### **FAR 52.252-2 Clauses Incorporated by Reference (Feb 1998)**

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

[Revolutionary FAR Overhaul | Acquisition.GOV](https://www.acquisition.gov/hhsar)  
<https://www.acquisition.gov/hhsar>

(End of Clause)

### **Clauses Incorporated by Reference:**

| <b>FAR SOURCE</b>   | <b>TITLE AND DATE</b>                                           |

| 352.237-75 | Key Personnel (Dec 2015)                             |

**Clauses Incorporated in Full Text:**

**52.217-7 Option for Increased Quantity-Separately Priced Line Item (Mar 1989)**

The Government may require the delivery of the numbered line item, identified in the Schedule as an option item, in the quantity and at the price stated in the Schedule. The Contracting Officer may exercise the option by written notice to the Contractor within 30 days of contract expiration. Delivery of added items shall continue at the same rate that like items are called for under the contract, unless the parties otherwise agree.

(End of clause)

**52.217-8 Option to Extend Services (Nov 1999)**

The Government may require continued performance of any services within the limits and at the rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor within 30 days.

(End of clause)

**52.217-9 Option to Extend the Term of the Contract (Mar 2000)**

(a) The Government may extend the term of this contract by written notice to the Contractor within 30 days; provided that the Government gives the Contractor a preliminary written notice of its intent to extend at least 30 days before the contract expires. The preliminary notice does not commit the Government to an extension.

(b) If the Government exercises this option, the extended contract shall be considered to include this option clause.

(c) The total duration of this contract, including the exercise of any options under this clause, shall not exceed 60 months.

(End of clause)

**HHSAR 352.203-70 Anti-Lobbying (Dec 2015)**

Pursuant to the HHS annual appropriations acts, except for normal and recognized executive-legislative relationships, the Contractor shall not use any HHS contract funds for:

(a) Publicity or propaganda purposes;

(b) The preparation, distribution, or use of any kit, pamphlet, booklet, publication, electronic communication, radio, television, or video presentation designed to support or defeat the enactment of legislation before the Congress or any State or local legislature or legislative body, except in presentation to the Congress or any state or local legislature itself; or designed to support or defeat any proposed or pending regulation, administrative action, or order issued by the executive branch of any state or local government, except in presentation to the executive branch of any state or local government itself; or

(c) Payment of salary or expenses of the Contractor, or any agent acting for the Contractor, related to any activity designed to influence the enactment of legislation, appropriations, regulation, administrative action, or Executive order proposed or pending before the Congress or any state government, state legislature or local legislature or legislative body, other than for normal and recognized executive-legislative relationships or participation by an agency or officer of a state, local, or tribal government in policymaking and administrative processes within the executive branch of that government.

(d) The prohibitions in subsections (a), (b), and (c) above shall include any activity to advocate or promote any proposed, pending, or future federal, state, or local tax increase, or any proposed, pending, or future requirement for, or restriction on, any legal consumer product, including its sale or marketing, including, but not limited to, the advocacy or promotion of gun control.

(End of clause)

#### **HHSAR 352.204-73 Contractor Personnel Security and Agency Access (FEB 2024) (Deviation)**

(a) Definitions. As used in this clause—

Agency access means access to HHS facilities, sensitive information, information systems or other HHS resources.

Applicant means a contractor employee for whom the Contractor applies for an HHS identification card.

Contractor employee means a prime contractor and subcontractor employee who requires agency access to perform work under an HHS contract.

Identification card (or "ID card") means a government issued or accepted identification card such as a Personal Identity Verification (PIV) card, a PIV-Interoperable (PIV-I) card from an authorized PIV-1 issuer, or a non-PIV card issued by HHS, or a non-PIV card issued by another Federal agency and approved by HHS. PIV and PIV-1 cards have physical and electronic attributes that other (non-PIV) ID cards do not have.

Issuing office means the HHS entity that issues identification cards to contractor employees.

Local security servicing organization means the HHS entity that provides security services to the HHS organization sponsoring the contract.

(b) Risk and sensitivity level designations. For contracts requiring access to HHS facilities,

sensitive information, information systems or other HHS resources, contractor employees will be required to complete background investigations, identity proofing, and government identification card application procedures to determine suitability for access. HHS will assign a risk and sensitivity level designation to the overall contract and/or to contractor employee positions by category, group or individual. The risk and sensitivity level designations will be the basis for determining the level of personnel security processing required for contractor employees. The position sensitivity designation levels that apply will be identified in the contract. The following risk and sensitivity level designations and associated level of processing are required, and each level includes the prior levels—

(1) Low risk level: National Agency Check with Written Inquiries (NACI);

(2) Moderate risk level: Minimum Background Investigation (MBI); and

(3) High risk level: Background Investigation.

(c) Security clearances. Contractor employees may also be required to obtain security clearances (i.e., Confidential, Secret, or Top Secret). National Security work designated "special sensitive," "critical sensitive," or "non-critical sensitive," will determine the level of clearance required for contractor employees. Personnel security clearances for national security contracts in HHS will be processed according to the HHS Personnel Security and Suitability Program, HHS Instruction 731-1, and the Department of Defense National Industrial Security Program Operating Manual (NISPOM).

(d) Pre-screening of contractor employees. The Contractor must pre-screen individuals designated for employment under any HHS contract by verifying minimal suitability requirements to ensure that only candidates that appear to meet such requirements are considered for contract employment, and to mitigate the burden on the Government of conducting background investigations on objectionable applicants. The Contractor must exercise due diligence in pre-screening all employees prior to submission to HHS for agency access. HHS may decline to grant agency access to a contractor employee for reasons including, but not limited to—

(1) Conviction of a felony, a crime of violence, or a misdemeanor involving moral turpitude;

(2) Falsification of information entered on forms or of other documents submitted; (3) Improper conduct including criminal, infamous, dishonest, immoral, or notoriously disgraceful conduct or other conduct adverse to the Government regardless of whether the conduct is directly related to the contract; and

(4) Any behavior judged to pose a potential threat to HHS facilities, sensitive information, information systems or other resources.

(e) Citizenship status. The Contractor must monitor a non-citizen's continued authorization for employment in the United States. The Contractor must provide documentation to the Contracting Officer or the Contracting Officer's Representative (COR) during the background investigation process that validates that the E-Verify requirement has been met for each

contractor employee.

(f) Background investigation and adjudication. A contractor employee must have a favorable adjudication of background investigation before HHS will issue an ID card to the contractor employee granting access to HHS facilities, sensitive information, information systems or other HHS resources. HHS may accept favorable adjudications of background investigations from other Federal agencies when applicants have held PIV cards issued by those agencies with no break in service. HHS may also accept PIV-I (Interoperable) cards issued by an authorized PIV-1 issuer as evidence of identity. A favorable adjudication does not preclude HHS from initiating a new investigation when deemed necessary. At a minimum, the FBI National Criminal History Check (fingerprint check) must be favorably completed before an HHS identification card can be issued. Each Contractor must use the Office of Personnel Management's (OPM) e-QIP system, or successor system identified by HHS, to complete any required investigative forms. Instructions for obtaining fingerprints will be provided by the COR or Contracting Officer. The HHS Assistant Secretary for Administration, Program Support Center (PSC), or authorized HHS designee, is responsible for adjudicating the suitability of contractor employees.

(g) Agency access denied. Upon contract award, HHS will initiate the agency access procedure for all contractor employees requiring access to HHS facilities, sensitive information, controlled unclassified information, information systems, and other HHS resources for contract performance. HHS may deny agency access to any individual about whom an adverse suitability determination is made. Failure to submit the required security information or to truthfully answer all questions shall constitute grounds for denial of access. The Contractor must not provide agency access to contractor employees until the COR or Contracting Officer provides notice of approval, which is authorized only by the PSC, or authorized HHS designee. Where a proposed contractor employee is denied agency access by the Government or, if for any reason a proposed application is withdrawn by the Contractor during the agency access process, the additional costs and administrative burden for conducting additional background investigations caused by a lack of effective pre-screening or planning on the part of the Contractor may be considered as part of the Contractor's overall performance evaluation.

(h) Identification card application process. The COR will be the HHS ID card Sponsor and point of contact for the Contractor's application for an HHS ID card. The COR shall review and approve the HHS ID card application before an ID card is issued to the applicant. An applicant may be issued either a Personal Identity Verification (PIV) card that meets the standards of Homeland Presidential Security Directive (HSPD-12), or an applicant may be issued a non-PIV card. Generally, a non-PIV card will be issued for contracts that expire in six months or less, including option periods. The COR may request the issuing office to waive the six-month eligibility requirement when it is in HHS interest for contract performance. The following applies—

(1) PIV card. The applicant must complete an HHS on-line application for a PIV card;

(2) Non-PIV card. The applicant must complete and submit a hard copy of the necessary form(s) to be provided to Contractor by COR/Sponsor) to the COR/Sponsor; and

(3) Regardless of the type of card to be issued (PIV or non-PIV), the applicant must appear in person to provide two forms of identity source documents in original form to HHS. The identity source documents must come from the list of acceptable documents included in

Form F-9, OMB No. 1115-0136, Employment Eligibility Verification. At least one document must be a valid State or Federal government-issued picture identification. For a PIV card, the applicant may be required to appear in-person a second time for enrollment and activation.

(i) Identification card custody and control. The Contractor is responsible for the custody and control of all forms of government identification issued by HHS to contractor employees for access to HHS facilities, sensitive information, information systems and other HHS resources. The Contractor shall:

(1) Provide a listing of personnel for whom an identification (ID) card is requested to the COR who will provide a copy of the listing to the card issuing office. This may include Contractor and subcontractor personnel. Follow issuing office directions for submittal of an application package(s).

(2) While visiting or performing work on an HHS facility, as specified by the issuing office or COR, ensure that contractor employees prominently display their ID card.

(3) Immediately notify the COR or, if the COR is unavailable, the Contracting Officer when a contractor employee's status changes and no longer requires agency access (e.g., employee's transfer, completion of a project, retirement, removal from work on the contract, or termination of employment) that may affect the employee's eligibility for access to the facility, sensitive information, or resources.

(4) Promptly deliver to the issuing office: (a) all ID cards assigned to an employee who no longer requires access to the facility; and (b) all expired ID cards within five (5) days of their expiration or all cards at time of contract termination, whichever occurs first.

(5) Immediately report any lost or stolen ID cards to the issuing office and follow its instructions.

(i) The Contractor is responsible for maintaining and safeguarding the HHS ID card upon issuance to the contractor employee. The Contractor must ensure that contractor employees comply with HHS requirements concerning the renewal, loss, theft, or damage of an ID card. The Contractor must immediately notify the COR or, if the COR is unavailable, the Contracting Officer when an ID card is lost, stolen or damaged.

(ii) Failure to comply with the requirements for custody and control of HHS ID cards may result in withholding final payment or contract termination based on the potential for serious harm caused by inappropriate access to HHS facilities, sensitive information, information systems or other HHS resources.

(iii) Specific actions and activities are required in certain events—

(A) Renewal. A contractor employee's HHS issued ID card is valid for a maximum of three years or until the contract expiration date (including option periods), whichever occurs first. The renewal process should begin six weeks before the PIV card expiration date. If a PIV card is not renewed before it expires, the contractor employee will be required to sign-in daily for facility access and may have

limited access to information systems and other resources.

(B) Lost/stolen. Immediately upon detection, the Contractor or contractor employee must report a lost or stolen HHS ID card to the COR, or if the COR is unavailable, the Contracting Officer, the issuing office, or the local servicing security organization. The Contractor must submit an incident report within 48 hours, through the COR or, if the COR is unavailable, the Contracting Officer, the issuing office, or the local security servicing organization describing the circumstances of the loss or theft. The Contractor must also report a lost or stolen PIV card through the HHS online registration system. If the loss or theft is reported by the Contractor to the local police, a copy of the police report must be provided to the COR or Contracting Officer. From the date of notification to HHS, the Contractor must wait three days before getting a replacement ID card. During the 3-day wait period, the contractor employee must sign in daily for facility access.

(C) Replacement. An ID card will be replaced if it is damaged, contains incorrect data, or is lost or stolen for more than 3 days, provided there is a continuing need for agency access to perform work under the contract.

(D) Surrender of ID cards. Upon notification that routine access to HHS facilities, sensitive information, information systems or other HHS resources is no longer required, the Contractor must surrender the HHS issued ID card to the COR, or if the COR is unavailable, the Contracting Officer, the issuing office, or the local security servicing organization in accordance with agency procedures.

(j) Flow down of clause. The Contractor is required to include this clause in any subcontracts at any tier that require the subcontractor or subcontractor's employees to have access to HHS facilities, sensitive information, information systems or other resources.

(End of clause)

**HHSAR 352.239-71 Security Requirements for Information Technology Resources (FEB 2024)  
(Deviation)**

(a) Definitions. As used in this clause—

Information technology has the same meaning in FAR 2.101.

Information and communication technology (ICT) also means information technology (see FAR 2.101 for definitions).

Information system security plan means a formal document that provides an overview of the security requirements for an information system or an information security program and describes the security controls in place or planned for meeting those requirements.

(b) Responsibilities. The Contractor shall be responsible for information technology security for all systems connected to a Department of Health and Human Services (HHS) network or operated by the Contractor for HHS, regardless of location. This clause is applicable to all or any

part of the contract that includes information technology resources or services in which the Contractor has physical or other system access to HHS information that directly supports the mission of HHS. Examples of tasks that require security provisions include—

- (1) Hosting of HHS e-Government sites or other information technology operations;
- (2) Acquisition, transmission, or analysis of data owned by HHS with significant replacement cost should the contractor's copy be corrupted; and
- (3) Access to HHS general support systems/major applications at a level beyond that granted the general public, e.g., bypassing a firewall.

(c) Information system security plan. The Contractor shall develop, provide, implement, and maintain an Information System Security Plan. HHS information system and platform information technology systems must have a security plan that provides an overview of the security requirements for the system and describes the security controls in place or the plan for meeting those requirements. Generally, this plan shall describe the processes and procedures that the Contractor will follow to ensure appropriate security of information system resources developed, processed, or used under this contract. The security plan should include implementation status, responsible entities, resources, and estimated completion dates. Security plans may also include, but are not limited to, a compiled list of system characteristics or qualities required for system registration, and key security-related documents such as a risk assessment, privacy impact assessment (PIA), system interconnection agreements, contingency plan, security configurations, configuration management plan, incident response plan, and the system privacy plan, as determined by the Contracting Officer's Representative. The plan shall address the specific contract requirements regarding information systems or related support or services included in the contract, to include the PWS or SOW. The Contractor's Information System Security Plan shall comply with applicable Federal Laws that include, but are not limited to, 40 U.S.C. 11331, the Federal Information Security Modernization Act (FISMA) of 2014 and the E-Government Act of 2002. The plan shall meet information technology security requirements in accordance with Federal and HHS policies and procedures, and as amended during the term of this contract, and include, but are not limited to the following:

- (1) OMB Circular A-130, Managing Information as a Strategic Resource;
- (2) National Institute of Standards and Technology (NIST) Guidelines;
- (3) Federal Information Processing Standard (FIPS) 200; and
- (4) HHS Cybersecurity Program related to HHS information (including HHS sensitive information and information systems security and privacy), as well as those set forth in the contract specifications, statement of work, or performance work statement. These include, but are not limited to, the Cyber Security Checklist and Cyber Security Infographic at <https://www.hhs.gov/hipaa/for-professionals/security/guidance/cybersecurity/index.html>, which provides HHS procedures, responsibilities, and processes for complying with current Federal law, Executive Orders, policies, regulations, standards and guidance for protecting HHS information, information systems (see 302.101, Definitions), information technology, and ICT, security and privacy, and adhering to personnel security requirements when accessing HHS information or information systems.

(d) Submittal of plan. Within 60 days after contract award, the Contractor shall submit the Information System Security Plan to the Contracting Officer for review and approval.

(e) Authority to Operate (ATO). As required by current HHS policy, the Contractor shall submit written proof of information technology security accreditation with a valid ATO to the Contracting Officer. Such written proof may be furnished either by the Contractor or by a third party. Accreditation shall be in accordance with HHS policy available from the Contracting Officer upon request. The Contractor shall submit for acceptance by the Contracting Officer along with this ATO a final security plan, risk assessment, security test and evaluation, privacy

threshold analysis or privacy impact assessment, and a disaster recovery plan/continuity of operations plan.

(f) Annual validation. On an annual basis, the Contractor shall verify in writing to the Contracting Officer that the IT Security Plan remains valid.

(g) Banners. The Contractor shall ensure that the official HHS banners are displayed on all HHS systems (both public and private) operated by the Contractor that contain Privacy Act or other sensitive information before allowing anyone access to the system. The Office of Information Technology will make official HHS banners available to the Contractor.

(h) Screening and access. The Contractor shall screen all personnel requiring privileged access or limited privileged access to systems operated by the Contractor for HHS or interconnected to an HHS network in accordance with HHS policies referenced in paragraph (c).

(i) Training. The Contractor shall ensure that its employees performing services under this contract complete HHS security awareness and privacy training on an annual basis. This includes signing an acknowledgment on an annual basis that they have read, understand, and agree to abide by the HHS Rules of Behavior for the Use of HHS Information and IT Resources Policy as required; FAR 39.105, Privacy; clause 352.204-71, Information and Information Systems Security, and this clause.

(j) Government access. The Contractor shall provide the Government access to the Contractor's and subcontractors' facilities, installations, operations, documentation, information systems, databases, and personnel used in performance of the contract. The Contractor shall provide access to enable a program of information technology inspection (to include vulnerability testing), investigation and audit (to safeguard against threats and hazards to the integrity, availability and confidentiality of HHS data or to the function of information technology systems operated on behalf of HHS), and to preserve evidence of computer crime.

(k) Notification of termination of employees. The Contractor shall immediately notify the Contracting Officer when an employee who has access to HHS information systems or data terminates employment.

(l) Subcontract flow down requirement. The Contractor shall incorporate and flow down the substance of this clause to all subcontracts that meet the conditions in paragraph (a) of this clause.

(End of clause)

**HHSAR 352.239-74 Information System Hosting, Operation, Maintenance, or Use (FEB 2024)  
(DEVIATION)**

(a) Definitions. As used in this clause—

Assessment and Authorization (A&A) means the process used to ensure information systems including Major Applications and General Support Systems have effective security safeguards which have been implemented, planned for, and documented in an Information Technology Security Plan. The A&A process per applicable HHS policies and procedures is the mechanism by which HHS provides an Authorization to Operate (ATO), the official management decision given by the HHS to authorize operation of an information system.

Information system security plan means a formal document that provides an overview of the security requirements for an information system or an information security program and describes the security controls in place or planned for meeting those requirements.

(b) Hosting, operation, maintenance, or use at non-HHS facilities. For information systems that are hosted, operated, maintained, or used on behalf of HHS at non-HHS facilities, Contractors/subcontractors are fully responsible and accountable for ensuring compliance with all applicable Health Insurance Portability and Accountability (HIPAA) Act of 1996 (HIPAA) regulations, the Privacy Act and other required HHS confidentiality statutes included in HHS mandatory yearly training and privacy policy, Federal Information Security Modernization Act (FISMA), National Institutes of Standards and Technology (NIST), Federal Information Processing Standards (FIPS), and HHS security and privacy policy. This includes conducting compliant risk assessments, routine vulnerability scanning, system patching and change management procedures, and the completion of an acceptable contingency plan for each system.

The Contractor's security and privacy control procedures must be equivalent to or exceed, those procedures used to secure HHS systems. A Privacy Impact Assessment (PIA) (if the system includes Personally Identifiable Information (PII)) or a Privacy Threshold Analysis (to determine if the system includes PII) must also be provided to the Contracting Officer Representative (COR) and approved by HHS Senior Agency Official for Privacy (SAOP) or designee prior to ATO. All external Internet connections to HHS network involving HHS information must be in accordance with the Trusted Internet Connections (TIC) Reference Architecture and reviewed and approved by HHS prior to implementation. For Cloud Services hosting, the Contractor shall also ensure compliance with the Federal Risk and Authorization Management Program (FedRAMP).

(c) Collecting, processing, transmitting, and storing of PII. Adequate security and privacy controls for collecting, processing, transmitting, and storing of PII, as determined by the HHS SAOP or designee, must be in place, tested, and approved by HHS prior to hosting, operation, maintenance, or use of the information system, or systems by or on behalf of HHS. These security and privacy controls are to be assessed and stated within the PIA, Information System Security Plan, Information System Privacy Plan, Security Control Assessment Report, and/or Privacy Control Assessment Report, as agreed upon by the Contractor, COR, and the Operating Division Senior Official for Privacy. If these controls are determined not to be in place, or inadequate, a Plan of Action and Milestones (POA&M) must be submitted and approved prior to the collection of PII.

(d) Annual FISMA security controls assessment. The Contractor/subcontractor's system must adhere to all FISMA, FIPS, and NIST standards related to the annual FISMA security controls assessment and review and update the PIA. Any deficiencies noted during this assessment must be provided to the Contracting Officer for entry into HHS Plan of Action & Milestones (POA&M) management process. The Contractor/subcontractor must use HHS POA&M process to document planned remedial actions to address any deficiencies in information security policies, procedures, and practices, and the completion of those activities. Security deficiencies must be corrected within the timeframes specified by the HHS in the performance work statement or statement of work, or in the approved remediation plan through the HHS POA&M process. Contractor/subcontractor procedures are subject to periodic, unannounced assessments by HHS officials, including the HHS Office of Inspector General. The physical security aspects associated with Contractor/subcontractor activities must also be subject to such assessments. The results of an annual review or a major change in the cybersecurity posture at any time may indicate the need for reassessment and reauthorization of the system. If major changes to the system occur that may affect the privacy or security of the data or the system, the A&A of the system may need to be reviewed, retested and re-authorized per HHS Rules of Behavior for the Use of HHS Information and IT Resources Policy. Major changes introducing new privacy risks require an updated and reapproved PIA.

(e) Annual self-assessment. The Contractor/subcontractor must conduct an annual self-assessment on all systems and outsourced services as required. Both hard copy and electronic copies of the assessment must be provided to the COR. HHS reserves the right to conduct such an assessment using government personnel or another Contractor/subcontractor. The Contractor/subcontractor must take appropriate and timely action, as may be specifically addressed in the contract, to correct or mitigate any weaknesses discovered during such testing, at no additional cost to the Government to correct Contractor/subcontractor systems and outsourced services.

(f) Prohibition of installation and use of personally-owned or Contractor-owned equipment or software on HHS networks. HHS prohibits the installation and use of personally-owned or Contractor/subcontractor-owned equipment or software on HHS networks. If non-HHS owned equipment must be used to fulfill the requirements of a contract, it must be stated in the service agreement, performance work statement, statement of work, or contract. All of the security controls required for government furnished equipment must also be utilized in approved other equipment (OE) at the Contractor's expense. All remote systems must be equipped with, and use, an HHS-approved antivirus software and a personal (host-based or enclave based) firewall that is configured with an HHS-approved configuration. Software must be kept current, including all critical updates and patches. Owners of approved OE are responsible for providing and maintaining the anti-viral software and the firewall on the non-HHS owned OE.

(g) Disposal or return of electronic storage media on non-HHS leased or non-HHS owned IT equipment. All electronic storage media used on non-HHS leased or non-HHS owned IT equipment that is used to store, process, or access HHS information must be handled in adherence with disposition instructions upon—

(1) Completion or termination of the contract; or

(2) Disposal or return of the IT equipment by the Contractor/subcontractor or any person

acting on behalf of the Contractor/subcontractor, whichever is earlier. Media (e.g., hard drives, optical disks, CDs, back-up tapes) used by the Contractors/ subcontractors that contain HHS information must be returned to the HHS for sanitization or destruction or the Contractor/subcontractor must self-certify that the media has been disposed of per disposition instructions. This must be completed within 30 days of termination of the contract.

(h) Bio-Medical devices and other equipment or systems. Bio-Medical devices and other equipment or systems containing media (e.g., hard drives, optical disks) with HHS sensitive information will not be returned to the Contractor at the end of lease, for trade-in, or other purposes. For purposes of these devices and protection of HHS sensitive information the devices may be provided back to the Contractor under one of three scenarios—

(1) The Contractor must accept the system without the drive;

(2) A spare drive must be installed in place of the original drive at time of turn-in if HHS initial medical device purchase included a spare drive; or

(3) The Contractor may request reimbursement for the drive at a reasonable open market replacement cost to be separately negotiated by the Contracting Officer and the Contractor at time of contract closeout.

(End of clause)

#### **HHSAR 352.239-75 Security Controls Compliance Testing (FEB 2024) (Deviation)**

On a periodic basis, HHS, including the Office of Inspector General, reserves the right to evaluate any or all of the security controls and privacy controls implemented by the Contractor under the clauses contained within the contract. With 10 working-days' notice, at the request of the government, the Contractor must fully cooperate and assist in a government-sponsored security controls assessment at each location wherein HHS information is processed or stored, or information systems are developed, operated, maintained, or used on behalf of HHS, including those initiated by the Office of Inspector General. The government may conduct a security control assessment on shorter notice, to include unannounced assessments, as determined by HHS in the event of an incident or a breach, or at any other time.

(End of clause)

#### **HHSAR 352.239-79 Information and Communication Technology Accessibility (FEB 2024) (Deviation)**

(a) Pursuant to Section 508 of the Rehabilitation Act of 1973 (29 U.S.C. 794d), as amended by the Workforce Investment Act of 1998, all information and communication technology (ICT) supplies, products, platforms, information, documentation, and services support developed, acquired, maintained or delivered under this contract or order must comply with the Revised 508 Standards, which are located at 36 C.F.R. 1194.1 and Appendices A, B, and C, and are available at <https://www.access-board.gov/ict/>. Information about Section 508 is available at <https://www.hhs.gov/web/section-508/index.html>.

(b) Additional Section 508 accessibility standards applicable to this contract or order may be

identified in the specification, statement of work, or performance work statement. If it is determined by the Government that ICT supplies, products, platforms, information, documentation, and services support provided by the Contractor do not conform to the described accessibility standards in the contract, remediation of the supplies, products, platforms, information, documentation, or services support to the level of conformance specified in the contract will be the responsibility of the Contractor at its own expense.

(c) In the event of a modification(s) to this contract or order, which adds new ICT supplies or services or revises the type of, or specifications for, supplies, products, platforms, information, documentation, or services support, the Contracting Officer shall require that the Contractor submit a completed HHS Section 508 Accessibility Conformance Checklist (see <https://www.hhs.gov/web/section-508/accessibility-checklists/index.html>) or an Accessibility Conformance Report (ACR) (based on the Voluntary Product Accessibility Template (VPAT) see <https://www.itic.org/policy/accessibility/vpat>), and any other additional information necessary to assist the Government in determining that the ICT supplies or services conform to Section 508 accessibility standards. If it is determined by the Government that ICT supplies, products, platforms, information, documentation, and services support provided by the Contractor do not conform to the described accessibility standards in the contract, remediation of the supplies, products, platforms, information, documentation, or services support to the level of conformance specified in the contract will be the responsibility of the Contractor at its own expense.

(d) If this is an Indefinite-Delivery type contract, a Blanket Purchase Agreement or a Basic Ordering Agreement, the task/delivery order requests that include ICT supplies, products, platforms, information, documentation, or services support will define the specifications and accessibility standards for the order. In those cases, the Contractor shall be required to provide a completed HHS Section 508 Accessibility Conformance Checklist (see <https://www.hhs.gov/web/section-508/accessibility-checklists/index.html>) or an ACR (based on the VPAT see <https://www.itic.org/policy/accessibility/vpat>), and any other additional information necessary to assist the Government in determining that the ICT supplies, products, platforms, information, documentation, or services support conform to Section 508 accessibility standards. If it is determined by the Government that ICT supplies and services provided by the Contractor do not conform to the described accessibility standards in the provided documentation, remediation of the supplies, products, platforms, information, documentation, or services support to the level of conformance specified in the contract will be the responsibility of the Contractor at its own expense.

(e) The contractor shall identify to the Contracting Officer any perceived exception or exemption to Section 508 requirements.

(End of clause)

#### **CDCG.02 Contracting Officer's Representative (COR) (Jul 2017)**

Performance of the work hereunder shall be subject to the technical directions of the designated COR for this contract.

As used herein, technical directions are directions to the Contractor which fill in details, suggests

possible lines of inquiry, or otherwise completes the general scope of work set forth herein. These technical directions must be within the general scope of work and may not alter the scope of work or cause changes of such a nature as to justify an adjustment in the stated contract price/cost, or any stated limitation thereof.

In the event that the Contractor believes full implementation of any of these directions may exceed the scope of the contract, he or she shall notify the originator of the technical direction and the Contracting Officer, immediately or as soon as possible, in a letter or e-mail separate of any required report(s). No technical direction, nor its fulfillment, shall alter or abrogate the rights and obligations fixed in this contract.

The Government COR is not authorized to change any of the terms and conditions of this contract. Contract changes shall be made only by the Contracting Officer by properly written modification(s) to the contract.

The Government will provide the Contractor with a copy of the COR delegation memorandum upon request.

### **CDCG.03 Contracting Officer (Jul 1999)**

The Contracting Officer is the only individual who can legally commit the Government to the expenditure of public funds. No person other than the Contracting Officer can make any changes to the terms, conditions, general provisions, or other stipulations of this contract.

No information, other than that contained in an authorized modification to this contract, duly issued by the Contracting Officer, received from any person employed by the United States Government, or otherwise, shall be considered grounds for deviation from any stipulation of this contract.

### **CDCG.07 Payment by Electronic Funds Transfer (Jan 2026)**

The Government shall use electronic funds transfer to the maximum extent possible when making payments under this contract. FAR 52.232-33, Payment by Electronic Funds Transfer –System for Award Management, requires the contractor to designate in writing a financial institution for receipt of electronic funds transfer payments.

In the case that EFT information is not within the System of Award Management, FAR 52.232-34, Payment by Electronic Funds Transfer-Other than System for Award Management, requires mandatory submission of Contractor's EFT information directly to the office designated in this contract to receive that information (hereafter: "designated office"); see below. The contractor shall submit the EFT information within the form titled "ACH Vendor/Miscellaneous Payment Enrollment Form" to the address indicated below. Note: The form is either attached to this contract (see Section J, List of Attachments) or may be obtained from the CDC Office of Financial Resources at 678-475-4500 or [cpbapinv@cdc.gov](mailto:cpbapinv@cdc.gov).

In cases where the contractor has previously provided such information, i.e., pursuant to a prior contract/order, and been enrolled in the program, the form is not required unless the designated financial institution has changed.

The completed form shall be mailed or sent via facsimile after award, but no later than 15 calendar days before an invoice is submitted, to the following address:

The Centers for Disease Control and Prevention Office of Financial Resources (OFR)  
P.O. Box 15580 Atlanta, GA 30333

#### **CDCH.04 Key Personnel (Jan 2026)**

The key personnel cited below are considered essential to the work performed under the contract. Pursuant to the terms of HHSAR Clause 352.237-75, Key Personnel, the Contractor shall not replace or divert any of these individuals without the written consent of the Contracting Officer.

| Personnel | Title |
|-----------|-------|
|           |       |
|           |       |
|           |       |

#### **CDCH.08 Smoke Free Working Environment (May 2009)**

In compliance with Department of Health and Human Services (DHHS) regulations, all contractor personnel performing work within CDC/ATSDR facilities shall observe the CDC/ATSDR smoke-free working environment policy at all times. This policy prohibits smoking in all CDC/ATSDR buildings and in front of buildings which are open to the public. This policy is also applicable to contractor personnel who do not work full-time within CDC/ATSDR facilities, but are attending meetings within CDC/ATSDR facilities.

#### **CDCH.12 Observance of Legal Holidays and Unscheduled Facility Closures (On-site Performance) (Jan 2026)**

(a) Holidays – The Government observes the holidays as listed by the Office of Personnel Management, as well as:

Any other day designated by Federal Statute

Any other day designated by Executive Order

Any other day designated by Presidential proclamation

For purposes of contract performance, the Contractor shall observe the above holidays on the date observed by the Government. Observance of such days shall not be cause for an additional period of performance or entitlement to compensation except as otherwise set forth in the contract.

No form of holiday or other premium compensation will be reimbursed; however, this does not preclude reimbursement for overtime work authorized in advance and in writing by the Contracting Officer.

(b) **Unscheduled Facility Closures**

In the event Government facilities are closed due to inclement weather, potentially hazardous or unsafe conditions, or other special circumstances, contractor personnel assigned to work within those facilities are automatically dismissed. Notwithstanding the terms herein, the contractor shall comply with any specific contract terms that require a level of ongoing support for critical operations during times of facility closure. The contractor may also continue to provide support under a scheduled telework arrangement in accordance with the terms of the contract if the contract expressly authorizes telework in writing.

(c) **Cost Impact**

Accounting for costs associated with an unscheduled facility closure is unique to each contract, but the contractor shall mitigate costs to the degree it is reasonably possible.

**CDCH.13 Government Property (Jul 2017)**

(a) **Government-Furnished Property (GFP).** In accordance with the terms of FAR 52.245-1, Government Property, the Government reserves the right to supply the Contractor, as Government-furnished property, any additional supplies, equipment, and materials determined by the Contracting Officer to be necessary and in the best interest of the Government.

(b) **Contractor-Acquired Property (CAP).** The Contractor must receive written consent from the Contracting Officer prior to purchase of any CAP not expressly identified in the contract, and as defined in FAR 52.245-1.

(c) **Accountable and Sensitive Government Property.** The Government will provide property labels and other identification for contractor-acquired Government property that is considered Accountable as defined in the HHS Logistics Management Manual (LMM) or considered Sensitive as defined in CDC's Sensitive Items List (<http://intranet.cdc.gov/ofr/documents/contracts/Authorized-Prohibited-List.pdf>)

(d) The contractor shall be responsible for the control and accountable record keeping of any Government property used in the performance of this contract predominately outside the confines of a Government controlled workspace in accordance with the HHS Contracting Guide found on the OSSAM Government Property and Contractors Property intranet page.

(a) The Chief of the Office of Safety, Security and Asset Management (OSSAM), Asset Management Services Office, Centers for Disease Control and Prevention (CDC), is hereby designated as the Property Administrator for this contract. The Contractor shall identify each item of equipment furnished by the Government to the Contractor or acquired by the Contractor using contract funds, with a suitable decal, tag, or other marking, as prescribed by the Property Administrator, and shall follow the guidance set forth in the HHS Contracting Guide.

## **CDCH.14 Records Management Obligations (Jun 2020)**

### **A. Applicability**

The following applies to all Contractors whose employees create, work with, or otherwise handle Federal records, as defined in Section B, regardless of the medium in which the record exists.

### **B. Definitions**

“Federal record” as defined in 44 U.S.C. § 3301, includes all recorded information, regardless of form or characteristics, made or received by a Federal agency under Federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the United States Government or because of the informational value of data in them.

The term Federal record:

1. includes Centers for Disease Control and Prevention (CDC) records.
2. does not include personal materials.
3. applies to records created, received, or maintained by Contractors pursuant to their CDC contract.
4. may include deliverables and documentation associated with deliverables.

### **C. Requirements**

1. Contractor shall comply with all applicable records management laws and regulations, as well as National Archives and Records Administration (NARA) records policies, including but not limited to the Federal Records Act (44 U.S.C. chs. 21, 29, 31, 33), NARA regulations at 36 CFR Chapter XII Subchapter B, and those policies associated with the safeguarding of records covered by the Privacy Act of 1974 (5 U.S.C. 552a). These policies include the preservation of all records, regardless of form or characteristics, mode of transmission, or state of completion.
2. In accordance with 36 CFR 1222.32, all data created for Government use and delivered to, or falling under the legal control of, the Government are Federal records subject to the provisions of 44 U.S.C. chapters 21, 29, 31, and 33, the Freedom of Information Act (FOIA) (5 U.S.C. 552), as amended, and the Privacy Act of 1974 (5 U.S.C. 552a), as amended and must be managed and scheduled for disposition only as permitted by statute or regulation.
3. In accordance with 36 CFR 1222.32, Contractor shall maintain all records created for Government use or created in the course of performing the contract and/or delivered to, or under the legal control of the Government and must be managed in accordance with Federal law. Electronic records and associated metadata must be accompanied by sufficient technical documentation to permit understanding and use of the records and data.
4. CDC and its contractors are responsible for preventing the alienation or unauthorized destruction of records, including all forms of mutilation. Records may not be removed from the legal custody of CDC or destroyed except for in accordance with the provisions of the agency records schedules and with the written concurrence of the Head of the Contracting Activity. Willful and unlawful destruction, damage or alienation of Federal records is subject to the fines and penalties imposed by 18 U.S.C. 2701. In the event of any unlawful or accidental removal, defacing, alteration, or destruction of records, Contractor must report to the Contracting Officer and the Contracting Officer’s Representative. The agency must report promptly to NARA in accordance with 36 CFR 1230.
5. The Contractor shall immediately notify the appropriate Contracting Officer upon discovery of any inadvertent or unauthorized disclosures of information, data, documentary materials, records or equipment. Disclosure of non-public information is limited to authorized personnel with a need-to-know

as described in the contract. The Contractor shall ensure that the appropriate personnel, administrative, technical, and physical safeguards are established to ensure the security and confidentiality of this information, data, documentary material, records and/or equipment is properly protected. The Contractor shall not remove material from Government facilities or systems, or facilities or systems operated or maintained on the Government's behalf, without the express written permission of the Head of the Contracting Activity. When information, data, documentary material, records and/or equipment is no longer required, it shall be returned to CDC control, or the Contractor must hold it until otherwise directed. Items returned to the Government shall be hand carried, mailed, emailed, or securely electronically transmitted to the Contracting Officer or address prescribed in the contract. Destruction of records is EXPRESSLY PROHIBITED unless in accordance with Paragraph (4).

6. The Contractor is required to obtain the Contracting Officer's approval prior to engaging in any contractual relationship (sub-contractor) in support of this contract requiring the disclosure of information, documentary material and/or records generated under, or relating to, contracts. The Contractor (and any sub-contractor) is required to abide by Government and CDC guidance for protecting sensitive, proprietary information, classified, and controlled unclassified information.

7. The Contractor shall only use Government IT equipment for purposes specifically tied to or authorized by the contract and in accordance with CDC policy.

8. The Contractor shall not create or maintain any records containing any non-public CDC information that are not specifically tied to or authorized by the contract.

9. The Contractor shall not retain, use, sell, or disseminate copies of any deliverable that contains information covered by the Privacy Act of 1974 or that which is generally protected from public disclosure by an exemption to the Freedom of Information Act.

10. Training. All Contractor employees assigned to this contract who create, work with, or otherwise handle records are required to take CDC-provided records management training. The Contractor is responsible for confirming training has been completed according to agency policies, including initial training and any annual or refresher training.

#### D. Flowdown of requirements to subcontractors

1. The Contractor shall incorporate the entire substance of the terms and conditions herein, including this paragraph, in all subcontracts under this contract, and must require written subcontractor acknowledgment of same.

2. Violation by a subcontractor of any provision set forth herein will be attributed to the Contractor.

#### **CDCH.16 Non-Disclosure Agreement for Contractor and Contractor Employees (Jun 2020)**

(a) The contractor and contractor employees shall prepare and submit Non-Disclosure Agreements (NDA) to the Contracting Officer prior to access of government information or the commencement of work at CDC.

(b) The NDAs, at Exhibit I and II, are required in service contracts where contractor's employees will have access to non-public and procurement-sensitive information while performing functions in support of the Government. The NDA also requires contractor's employees properly identify themselves as employees of a contractor when communicating or interacting with CDC employees, employees of other governmental entities, and members of the public (when communication or interaction relates to the contractor's work with the CDC). The Federal Acquisition Regulation (FAR) 37.114 (c), states "All contractor personnel attending meetings, answering Government telephones, and working in other situations where their contractor status is not obvious to third parties are required to identify

themselves as such to avoid creating an impression in the minds of members of the public or Congress that they are Government officials, unless, in the judgment of the agency, no harm can come from failing to identify themselves. They must also ensure that all documents or reports produced by contractors are suitably marked as contractor products or that contractor participation is appropriately disclosed.”

(c) The contractor shall inform contractor employees of the identification requirements by which they must abide and monitor employee compliance with the identification requirements.

(d) During the contract performance period, the contractor is responsible to ensure that all additional or replacement contractors’ employees sign an NDA, and it is submitted to the Contracting Officer prior to commencement of their work with the CDC.

(e) Contractor employees in designated positions or functions that have not signed the appropriate NDA shall not have access to any non-public, procurement sensitive information or participate in government meetings where sensitive information may be discussed.

(f) The Contractor shall prepare and maintain a current list of employees working under NDAs and submit to the Contracting Officer upon request during the contract period of performance. The list should at a minimum include: contract number, employee’s name, position, date of hire and NDA requirement.

**EXHIBIT I**  
Centers for Disease Control and Prevention (CDC)  
Contractor Non-Disclosure Agreement

**I. Non-public Information**

**[Name of contractor]** understands that in order to fulfill the responsibilities pursuant to **[contract name and number]** between the Centers for Disease Control and Prevention and **[Name of CDC contractor]** dated **[date]**, employees of **[contractor]** will have access to non-public information, including confidential and privileged information contained in government-owned information technology systems. For purposes of this agreement, confidential information means government information that is not or will not be generally available to the public. Privileged information means information which cannot be disclosed without the prior written consent of the CDC.

In order to properly safeguard non-public information, **[contractor]** agrees to ensure that prior to being granted access to government information or the commencement of work for the CDC, whichever is applicable, all contractor employees will sign a Non-Disclosure Agreement (NDA) provided by the CDC prior to beginning work for the CDC. Contractor agrees to submit to the Contracting Officer the original signed copies of NDAs signed by the contractor's employees in accordance with the instructions provided by the Contracting Officer. Failure to provide signed NDAs in accordance with this agreement and instructions provided by the Contracting Officer could delay or prevent the employee from commencing or continuing work at the CDC until such agreement is signed and returned to the Contracting Officer.

Contractor further agrees that it will not cause or encourage any employee to disclose, publish, divulge, release, or make known in any manner or to any extent, to any individual other than an authorized Government employee any non-public information that the employee may obtain in connection with the performance of the employee's responsibilities to the CDC.

**II. Procurement-Sensitive Information**

Contractor further agrees that it will not cause or encourage any employee to disclose, publish, divulge, release, or make known in any manner or to any extent, to any individual, other than an authorized Government employee, any procurement-sensitive information gained while in connection with fulfilling the employee's responsibilities at the CDC. For purposes of this agreement, procurement-sensitive information includes, but is not limited to, all information in Statements of Work (SOW), Procurement Requests (PR), and Requests for Proposal (RFP); Responses to RFPs, including proposals, questions from potential offerors; non-public information regarding procurements; all documents, conversations, discussions, data, correspondence, electronic mail (e-mail), presentations, or any other written or verbal communications relating to, concerning, or affecting proposed or pending solicitations or awards; procurement data; contract information plans; strategies; source selection information and documentation; offerors' identities; technical and cost data; the identity of government personnel involved in the solicitation; the schedule of key technical and procurement events in the award determination process; and any other information that may provide an unfair competitive advantage to a contractor or potential contractor if improperly disclosed to them, or any of their employees.

Contractor understands and agrees that employee access to any procurement-sensitive information may create a conflict of interest which will preclude contractor from becoming a competitor for any

acquisition(s) resulting from this information. Therefore, if an employee participates in any discussions relating to procurement-sensitive information, assists in developing any procurement-sensitive information, or otherwise obtains any procurement-sensitive information while performing duties at the CDC, contractor understands and agrees that contractor may be excluded from competing for any acquisition(s) resulting from this information.

### **III. Identification of Non-Government Employees**

Contractor understands that its employees are not agents of the Government. Therefore, unless otherwise directed in writing by the CDC, contractor agrees to assist and monitor employee compliance with the following identification procedures:

**A.** At the beginning of interactions with CDC employees, employees of other governmental entities, and members of the public (when such communication or interaction relates to the contractor's work with the CDC), contractors' employees will identify themselves as an employee of a contractor.

**B.** Contractors' employees will include the following disclosures in all written communications, including outgoing electronic mail (e-mail) messages, in connection with contractual duties to the CDC:

Employee's name  
Name of contractor  
Center or office affiliation  
Centers for Disease Control and Prevention

**C.** At the beginning of telephone conversations or conference calls, contractors' employees will identify themselves as an employee of a contractor.

**D.** Contractors' employees should not wear any CDC logo on clothing, except for a CDC issued security badge while carrying out work for CDC or on CDC premises. The only other exception is when a CDC management official has granted permission to use the CDC logo.

**E.** Contractors' employees will program CDC voice mail message to identify themselves as an employee of a contractor.

I understand that federal laws including, 18 U.S.C. 641 and 18 U.S.C. 2071, provide criminal penalties for, among other things, unlawfully removing, destroying or converting to personal use, or use of another, any public records. Contractor acknowledges that contractor has read and fully understands this agreement.

Name of contractor: \_\_\_\_\_

Signature of Authorized Representative of Contractor: \_\_\_\_\_

Date: \_\_\_\_\_

Copies retained by: Contracting Officer and Contractor

**EXHIBIT II**  
Centers for Disease Control and Prevention (CDC)  
Contractors' Employee Non-Disclosure Agreement

**I. Non-Public Information**

I understand that in order to fulfill my responsibilities as an employee of **[Name of CDC contractor]**, I will have access to non-public information, including confidential and privileged information contained in government-owned information technology systems. For purposes of this agreement, confidential information means government information that is not or will not be generally available to the public. Privileged information means information which cannot be disclosed without the prior written consent of the CDC.

I, **[Name of Employee]**, agree to use non-public information only in performance of my responsibilities to the CDC. I agree further that I will not disclose, publish, divulge, release, or make known in any manner or to any extent, to any individual other than an authorized Government employee, any non-public information that I may obtain in connection with the performance of my responsibilities to the CDC.

**II. Procurement-Sensitive Information**

I further agree that unless I have prior written permission from the CDC, I will not disclose, publish, divulge, release, or make known in any manner or to any extent, to any individual other than an authorized Government employee, any procurement-sensitive information gained in connection with the performance of my responsibilities to the CDC. I specifically agree not to disclose any non-public, procurement-sensitive information to employees of my company or any other organization unless so authorized in writing by the CDC. For purposes of this agreement, procurement-sensitive information includes, but is not limited to, all information in Statements of Work (SOW), Procurement Requests (PR), and Requests for Proposal (RFP); Responses to RFPs, including proposals, questions from potential offerors; non-public information regarding procurements; all documents, conversations, discussions, data, correspondence, electronic mail (e-mail), presentations, or any other written or verbal communications relating to, concerning, or affecting proposed or pending solicitations or awards; procurement data; contract information plans; strategies; source selection information and documentation; offerors' identities; technical and cost data; the identity of government personnel involved in the acquisition; the schedule of key technical and procurement events in the award determination process; and any other information that may provide an unfair competitive advantage to a contractor or potential contractor if improperly disclosed to them, or any of their employees.

I understand and agree that my access to any procurement-sensitive information may create a conflict of interest which will preclude me, my current employer, or a future employer from becoming a competitor for any resulting government acquisition derived from this information. Therefore, if I participate in any discussions relating to procurement-sensitive information, assist in developing any procurement-sensitive information, or otherwise obtain any procurement-sensitive information while performing my duties at the CDC, I understand and agree that I, my current employer, and any future employer(s) may be excluded from competing for any resulting acquisitions.

**III. Special Non-Disclosure Agreement for Contractors with Access to CDC Grants Management and Procurement-Related Information Technology Systems**

In addition to complying with the non-disclosure requirements and safeguards stated above, I understand that my authorization to use CDC's grants management and procurement systems is strictly limited to the access and functions necessary for the performance of my responsibilities to the CDC and which have been approved in advance by the CDC. I understand that I am not authorized to enter procurement requests for any requirements pertaining to contracts or subcontracts held by me or my employer.

#### **IV. Identification as a Non-Government Employee**

I understand that as an employee of a government contractor, I represent an independent organization and I am not an agent of the Government. Therefore, I agree that unless I have prior written authorization from the CDC, I will, at the beginning of interactions with CDC employees, employees of other governmental entities, members of the public (when such communication or interaction relates to the contractor's work with the CDC), identify myself as an employee of a contractor. I further agree to use the following identification procedures in connection with my work at the CDC:

**A.** I will include the following disclosures in all written communications, including outgoing electronic mail (e-mail) messages:

Employee's name  
Name of contractor  
Center or office affiliation  
Centers for Disease Control and Prevention

**B.** I will identify myself as an employee of a contractor at the beginning of telephone conversations or conference calls;

**C.** I will not wear any CDC logo on clothing, except for a CDC issued security badge while carrying out work for CDC or on CDC premises; the only other exception is when a CDC management official has granted permission to use the CDC logo.

**D.** I will program my CDC voice mail message to identify myself as a contractors' employee.

I understand that federal laws including, 18 U.S.C. 641 and 18 U.S.C. 2071, provide criminal penalties for, among other things, unlawfully removing, destroying or converting to personal use, or use of another, any public records. I acknowledge that I have read and fully understand this agreement.

Name of contractor: \_\_\_\_\_

Name of Employee: \_\_\_\_\_

Date: \_\_\_\_\_

Copies retained by: Contracting Officer, contractor, and Contractor Employee

#### **CDCH.20 Non-Personal Services (Jun 2020)**

(a) Personal services shall not be performed under this contract. Although the Government may provide sporadic or occasional instructions within the scope of the contract, the Contractor is responsible for control and supervision of its employees. If the Contractor (including its employees) believes any Government action or communication has been given that would create a personal services relationship between the Government and any Contractor employee, the Contractor shall promptly notify the Contracting Officer of this communication or action.

(b) The Contractor shall comply with, and ensure their employees and subcontractors comply with, CDC Policy titled Contractor Identification and Safeguarding of Non-Public Information (Policy No. CDC-IS-2006-01). No Contractor employee shall hold him or herself out to be a Government employee, agent, or representative. No Contractor employee shall state orally or in writing at any time that he or she is acting on behalf of the Government. In all communications with third parties in connection with this contract, Contractor employees shall identify themselves as Contractor employees and specify the name of the company for which they work. The Contractor is limited to performing the services identified in the contract statement of work and shall not interpret any communication with anyone as a permissible change in contract scope or as authorization to perform work not described in the contract. All contract changes will be incorporated by a modification signed by the Contracting Officer.

(c) The Contractor shall ensure that all its employees and subcontractor employees working on this contract are informed of the terms and conditions herein. The Contractor agrees that this is a non-personal services contract; and that for all the purposes of the contract, the Contractor is not, nor shall it hold itself out to be an agent or partner of, or joint venture with, the Government. The Contractor shall notify its employees that they shall neither supervise nor accept supervision from Government employees. The substance of the terms herein shall be included in all subcontracts at any tier.

(d) The terms and conditions above do not limit the Government's rights under other terms of the contract, including those related to the Government's right to inspect and accept or reject the services performed under this contract.

#### **CDCH.23 Evaluation of Contractor Performance Utilizing CPARS (Apr 2026)**

In accordance with FAR 42.11, Centers for Disease Control and Prevention (CDC) will review and evaluate contract performance. FAR 42.802 and 42.1102 requires agencies to prepare evaluations of contractor performance and submit them to the Contractor Performance Assessment Reporting System (CPARS). CDC utilizes this web-based system to prepare and report contractor performance evaluations. All information contained in these assessments may be used by the Government, within the limitations of FAR 42.11, for future source selections in accordance with FAR 15.104 where past performance is an evaluation factor.

The CPARS system requires a contractor representative to be assigned so that the contractor has appropriate input into the performance evaluation process. The CPARS contractor representative will be given access to CPARS and will be given the opportunity to concur or not-concur with performance evaluations before the evaluations are complete. The CPARS contractor representative will also have the opportunity to add comments to performance evaluations.

The assessment is not subject to the Disputes clause of the contract, nor is it subject to appeal beyond the review and comment procedures described in the guides on the CPARS website. Refer to: [www.cpars.gov](http://www.cpars.gov) for details and additional information related to CPARS, CPARS user access, how contract performance assessments are conducted, and how contractors participate. Access and training for all persons responsible for the preparation and review of performance assessments is also available at the CPARS website.

The contractor must provide the CDC contracting office with the name, e-mail address, and phone number of their designated CPARS representative who will be responsible for logging into CPARS and reviewing and commenting on performance evaluations. The contractor must maintain a current representative to serve as the contractor representative in CPARS. It is the contractor's responsibility to notify the CDC contracting office, in writing (letter or email), when their CPARS representative information needs to be changed or updated. Failure to maintain current CPARS contractor representative information will result in the loss of an opportunity to review and comment on performance evaluations.

#### **CDCH.28 Requirements for Contractor Performance or Travel OCONUS (Jan 2026)**

This contract requires contractor performance or travel internationally, (Outside Contiguous United States (OCONUS), and outside of Alaska, Hawaii, Puerto Rico, and United States territories). As a result, the following requirements shall apply to all of the above, hereafter expressed as "OCONUS" unless the contracted individual is a lawful permanent resident or citizen of the country in which the work is to be performed. Contracted lawful permanent residents or citizens of the United States must fully comply with applicable foreign travel training requirements, regardless of the country in which they agree to the contract terms:

##### **A. Training**

1) Contractor must provide written verification to the Contracting Officer (CO) that contractor employees performing under this contract have completed the following Department of State (DOS) or equivalent trainings. At a minimum, all training must be completed within 90 days of contract award and/or before any OCONUS travel where specific foreign travel security training requirements would apply.

a) Prior to all OCONUS travel:

- i. Foreign Travel Security Brief (FTSB)/Foreign Travel Security Brief Refresher (FTSBR) provided by CDC Global Security Team (GST) or HHS Learning Management System (LMS). (Annual requirement)
- ii. Foreign Affairs Counter Threat eLearning (eFACT): previously Counter Threat Awareness Training (CTAT); online training provided via DOS Foreign Service Institute (FSI) or HHS LMS. (Valid for 6 years)
- iii. Country Specific Briefs (CSBs) provided by CDC's GST as needed for High Threat Countries. (Annual requirement)
- iv. Intro to Working in an Embassy (PN113) HHS LMS. (Once in a career requirement)
- v. Counterintelligence Travel Brief provided by CDC Counterintelligence Team or HHS LMS. (Annual requirement)

b) For OCONUS travel longer than 44 cumulative days in a calendar year, in addition to the trainings above:

- i. Security Overseas Seminar (SOS) /Overseas Security Awareness Training (OSAT) provided via Department of State FSI/CDC University (CDC-U). (Once in a career requirement)

- c) For OCONUS travel longer than 89 cumulative days in a calendar year, in addition to the trainings above:
    - i. Foreign Affairs Counter Threat course (FACT) provided in-person by DOS. (Valid for 6 years)
- 2) CDC's Public Health Intelligence Office will be the coordinating authority with DOS to determine training equivalency for the training requirements identified above.
- 3) As available to contractor employees based on State Department policy, contractors must require contractor employees to attend a briefing by the Regional Security Officer within 7 days of arrival at post or the next offered briefing as specified by Chief of Mission/Regional Security Office.

#### **B. Medical Clearance**

1. Contractor must provide documentation to the CO that contractor employees performing or traveling OCONUS under this contract have undergone country specific medical clearance by a licensed clinician with experience in travel medicine or occupational health within the past twelve (12) months.
2. Documentation of medical clearance must be provided within 30 days of contract award and/or prior to any OCONUS travel. If contract employees performing under this contract are OCONUS-based, documentation of their medical clearance must be provided prior to the start of any performance under this contract.
3. The CO will review the medical clearance documentation provided by the Contractor within 30 days of contract award and prior to any OCONUS travel and determine if the documentation and/or medical clearance provided demonstrates that they were seen by a travel medicine or occupational health clinic.
4. Contractor must consider, and provide as appropriate, what medical supplies, including medication, is necessary in order for contractor employees to work in the duty location.

#### **C. Insurance**

1. Contractor is responsible for providing adequate Traveler Health Insurance, Medical Evacuation (Medevac) Insurance and Evacuation/Repatriation Insurance coverage for contractor employees performing or traveling OCONUS under this contract. Contractor is encouraged to meet the minimum standards outlined by the US Department of State.
2. Proof of the above insurance must be provided to the CO within 30 days of contract award and/or prior to any OCONUS travel.
3. By accepting this contract, the Contractor is made aware that Kidnap and Ransom Insurance is an available type of insurance, and it is the Contractor's responsibility to purchase this insurance if the Contractor deems appropriate.

#### **D. Safety and Security**

1. Prior to any OCONUS travel, the Contractor must provide written and signed confirmation that the Contractor accepts full responsibility for the safety and welfare of the contractor employees performing or traveling OCONUS under this contract until their return to home of record.

The following standard or similar language should be used to ensure compliance:

***[Insert Name of Contractor]** understands that in order to fulfill the responsibilities pursuant to contract **[insert Contract Number]** between the Centers for Disease Control and Prevention and **[Insert Name of Contractor]** dated **[Insert Date]**, employees of **[Insert Name of Contractor]** will be required to perform services or travel internationally, overseas, Outside Contiguous United States (OCONUS). **[Insert Name of Contractor]** agrees to accept full responsibility for the safety and welfare of its employees performing or traveling OCONUS under this contract for the entire period of performance and until their return to their home of record.*

*Name of Contractor:*

*Name and Position Title of Authorized Representative of Contractor:*

*Signature of Authorized Representative of Contractor:*

*Date:*

2. Prior to any OCONUS travel, the Contractor must provide written and signed confirmation by contractor employees performing or traveling OCONUS under this contract that the Contractor has thoroughly explained that the security and safety responsibilities are the sole responsibility of the contractor, and the contractor employee fully understands the consequences this can present for a private US based entity to provide the security and safety of contractor employees while OCONUS. Contractor must also provide signed acknowledgement from the contractor employee that the Contractor has provided them with an explanation of the State Department's threat levels for Crime, Terror, and Political Stability for the country in which the contractor employee is performing services under this contract, along with mitigation practices the Contractor is able to provide to protect the contractor employee while in country.

The following standard or similar language should be used to ensure compliance:

*I, **[Insert Name of Employee]**, understand that in order to fulfill my responsibilities as an employee of **[Insert Name of Contractor]**, I will be required to perform services or travel internationally, overseas, Outside Contiguous United States (OCONUS) under CDC Contract **[insert contract number]**.*

*I certify that **[Insert Name of Contractor]** has thoroughly explained that the security and safety responsibilities are the sole responsibility of **[Insert Name of Contractor]** and I fully understand the consequences this can present for a private US based entity to provide the safety and security of its employees while OCONUS.*

*I also certify that **[Insert Name of CDC contractor]** has provided me with an explanation of the State Department's threat levels for crime, terror and political stability for the country in which I will be performing services or traveling under the aforementioned CDC contract, along with the mitigation practices **[Insert Name of Contractor]** is able to provide to protect me while in country.*

*Name of Contractor:*

*Name of Contractor Employee:*

*Signature of Contractor Employee:*

*Date:*

3. Within 30 days of contract award and/or prior to any OCONUS travel, the Contractor must provide a detailed written explanation of the following to the CO and COR:
  - a. The level of safety and security that will be provided to contractor employees in the specific OCONUS location where they are performing services or traveling under this contract.
  - b. The communications plan and list of equipment that will be provided by the Contractor to contractor employees performing or traveling OCONUS under this contract. At a minimum, the Contractor must provide two communication devices with international service or local internet access. Communication devices may include cell phone, radio, satellite phone, laptop, or pad/tablet.
4. Contractor must provide contract employees performing or traveling OCONUS under this contract with instructions to report all safety and security concerns and incidents to their employer and to their home country's closest embassy Regional Security Officer (RSO), the CDC Regional/Country Office, and CDC Office of Safety, Security, and Asset Management (OSSAM) for situational awareness.
5. Contractor must require contractor employees who are U.S. citizens to enroll in the Department of State's Smart Traveler Enrollment Program (STEP).
6. Contractor must serve as sole point of contact for incidents involving their contract employees performing services or traveling OCONUS under this contract. Upon contract award, the Contractor must provide an executive level point of contact responsible for safety and security with contact information to the contractor employee and the CDC Contracting Officer Representative.

#### **E. Travel Plans**

1. Contractor must ensure thorough travel plans for travelers are prepared, reviewed and approved in accordance with the Contractor's internal procedures and before being executed.
2. CDC recommends that travel plans should include an itinerary that includes "A to Z and back to A." Travel plans should include each leg specifics, mode of travel, departure and arrival times, airline flight number, train schedules, private car company pick-ups and layover information, if applicable, and lodging arrangements throughout the entire trip. Reservation numbers and phone numbers for each conveyance of travel should also be provided. Travel plans should include emergency phone numbers for each stop in the itinerary, as well as, medical facilities available along the route. Plans should include 24/7 reach back contacts and phone numbers. Points of contact and contact information for arrival destinations should also be provided. CDC also recommends a daily check-in plan with either the Contractor, family member, or contract supervisor throughout the trip.

## SECTION E – INSTRUCTIONS TO OFFERORS

(a) Offerors are invited to submit a proposal in response to this solicitation. All proposals received will become part of the official file.

(b) Your proposal must be prepared in two separate volumes as instructed herein. (Part I - Technical Volume, Part II - Business Volume) Each volume shall be separate and complete in itself so that evaluation of one may be accomplished independently of evaluation of the other. **The technical volume shall not contain reference to price; however, resource information, such as data concerning labor hours and categories, material, subcontracts, etc., must be contained in the technical volume so that your understanding of the Performance Work Statement can be evaluated.** The technical volume must disclose your approach in sufficient detail to provide a clear and concise presentation that addresses, but is not limited to, the requirements of the technical volume instructions.

**NOTE: THE TECHNICAL VOLUME SHALL NOT EXCEED 35 PAGES, TIMES NEW ROMAN EQUIVALENT AT 11 POINT FONT OR LARGER WITH MARGINS OF .75" OR LARGER. THE DHHS SECTION 508 PRODUCT ASSESSMENT TEMPLATE DOES NOT COUNT TOWARD THE PAGE LIMIT. THE BUSINESS VOLUME DOES NOT HAVE A PAGE LIMIT.**

### **(c) Questions and Point of Contact (POC) Information:**

All questions must be submitted electronically via email to: Denedra Hardy at [gfa5@cdc.gov](mailto:gfa5@cdc.gov) and Sherrie Randall at, **no later than 2:00 p.m. Eastern Time, May 12, 2026.**

Questions shall identify the pertinent RFP Section, page number and paragraph number. Questions shall be submitted utilizing the attached Q&A Template (Attachment 1). Questions received after the question due date will not be answered.

### **(d) Proposal Submission Instructions:**

The proposal must be submitted electronically via email to: Denedra Hardy at [gfa5@cdc.gov](mailto:gfa5@cdc.gov) and Sherrie Randall at, **no later than 2:00 p.m. Eastern Time, June 1, 2026.**

### **(d) Proposal Format:**

The electronic copy of your quotation (Technical and Business Volume) shall be in MS Word.doc (or .docx) file format; business volume quantitative data shall be provided in a spreadsheet in MS Excel.xls (or .xlsx) format. Files shall be unprotected. Cells in spreadsheets shall include formulas used to derive values.

## **Volume I – Technical Volume**

The Offeror shall number each page to eliminate any confusion. If the Offeror creates an ambiguity in the numbering of pages, the Government will exercise its own discretion in the counting of pages. Pages more than the above limitation will not be evaluated.

The offeror shall not submit any AI products, services, tools, software, or solutions (collectively "AI

products") as part of its proposal. After award, any use of AI products, tools, or solutions for performance of this contract is prohibited except for AI products that are explicitly provided, approved, and made available by CDC. Use of any unapproved AI products after award is a material breach of the contract

### **Technical Evaluation Criteria**

#### **52.212-2 Evaluation—Commercial Products and Commercial Services (Deviation) (RFO Aug 2025)**

(a) Evaluation factors. The Government will award a contract resulting from this solicitation to the responsible Offeror whose offer conforming to the solicitation will be most advantageous to the Government, price and other factors considered. The following factors, listed in order of importance, will be used to evaluate offerors:

- 1. Technical Approach**
- 2. Staffing Plan**
- 3. Management Approach**
- 4. Similar Experience**

(b) Options (if applicable). The Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. The Government may determine that an offer is unacceptable if the option prices are significantly unbalanced. The evaluation of options does not obligate the Government to exercise the option(s).

(c) Notice of award. A written notice of award or acceptance of an offer furnished to the successful Offeror within the time for acceptance specified in the offer, shall result in a binding contract without further action by either party. Before the offer's specified expiration time, the Government may accept an offer (or part of an offer), whether or not there are negotiations after its receipt, unless a written notice of withdrawal is received before award.

(End of provision)

### **Evaluation Factors**

#### **1. Technical Approach**

- a. The Offeror shall provide a comprehensive narrative describing its approach, capabilities, and relevant experience in meeting the technical requirements outlined in the Performance Work Statement (PWS). This narrative shall demonstrate a clear understanding of the task requirements, overall contract objectives, and anticipated challenges, along with practical and effective solutions to address those challenges.
- b. The Offeror shall submit a detailed Work Plan that outlines the proposed technical approach and methodology for accomplishing each task specified in the PWS. The Work Plan must align with the Business Proposal and shall include milestone charts that clearly illustrate the sequence of events. The proposed technical approach must demonstrate the Offeror's ability to achieve timely, efficient, and acceptable performance outcomes.

## 2. Staffing Plan

- a. The Offeror shall provide a comprehensive staffing plan that clearly outlines the labor resources required to successfully fulfill the requirements of the solicitation. The plan shall include proposed labor categories, descriptions of services to be performed, and estimated labor hours for each category. Additionally, the Offeror shall identify potential staffing challenges and provide effective mitigation strategies to ensure uninterrupted and high-quality performance.
- b. The Offeror shall demonstrate the availability of adequately qualified technical resources necessary to execute the requirements of the contract. This demonstration shall include, at a minimum:
  - i. A detailed staffing matrix that identifies the number and types of personnel proposed, along with their assigned roles and responsibilities. The matrix shall also include each individual's relevant skill sets, certifications, security clearances, professional experience, education, and overall qualifications as they relate to the project requirements.
- c. The Offeror shall propose Key Personnel roles using the format below, in accordance with CDCH.04 Key Personnel (Jan 2026).

| Personnel | Title |
|-----------|-------|
|           |       |
|           |       |
|           |       |

### Minimum Qualifications

Each member of this contract shall:

1. Be knowledgeable of CDC IT Service Priority definitions and related matrix (see [Table 2: Priority Definition Matrix](#)).

The Contractor shall ensure employees have all required professional certifications/licenses (current and valid) for each applicable occupation category before commencement of work.

1. Project Management
  - a. Hold an industry-recognized project management certification.
  - b. 4+ years of experience working directly with clients, developing, and executing project plans, and demonstrated experience managing projects of similar size, scope, and complexity in the Federal space, using Agile methodologies.
  - c. PMs require experience implementing Agile methodologies and best practices (for example, running daily standup meetings, bi-monthly sprint review meetings, maintaining user story backlogs, and so on). Sprint cycles will occur in 2 to 4-week intervals.

2. IT Service Desk Services (ITSDS)
  - a. ITIL certification (preferred)
3. Global Customer Support Services
  - d. Prior experience with international travel requirements (for example, passports, visas, high- and low-threat country travel).
  - e. Ensure engineering and technical support personnel have an active Cisco Certified Network Associate certification.
  - f. Ensure engineering and technical support personnel have, at minimum, a combination of 3-5 years of experience installing, configuring, and troubleshooting network switches, routers, and firewalls.
4. IT Asset Management Services (ITAMS)
  - a. Contractor shall have proper coverage for certified forklift services for the Depot.

### **3. Management Approach**

- a. The Offeror shall provide a comprehensive management plan describing its approach to effectively managing all aspects of the project. This plan shall clearly define roles and responsibilities, lines of authority, and processes for coordinating and overseeing subcontractors, if applicable.
- b. The Offeror shall include, at a minimum:
  - i. An organizational structure and management strategy that defines reporting relationships, communication protocols, timelines, and decision-making authority.
  - i. A structured approach for monitoring Performance Work Statement (PWS) metrics, tracking performance outcomes, and managing contract modifications or changes in scope.
  - ii. Identification of potential management challenges, barriers, and risks, along with a proactive risk management strategy that includes mitigation and contingency planning.
  - iii. A draft Quality Control Plan (QCP) that outlines the processes, procedures, and standards the Offeror will implement to ensure all performance requirements are met or exceeded. The QCP shall include clearly defined and measurable performance metrics.
  - iv. A draft Transition-In Plan that details the Offeror's approach to assuming full performance responsibility. This plan shall include transition schedules, task dependencies, key milestones, and strategies for minimizing disruption to operations while effectively managing transition-related risks.

At a minimum, the Transition-In Plan shall include:

1. A structured transition approach outlining all activities required to assume contract performance, including coordination with the incumbent contractor.
2. A staffing plan for transition, including onboarding of personnel, verification of qualifications, security clearance processing, and training requirements.
3. A knowledge transfer strategy to capture and integrate existing processes, procedures, and institutional knowledge.
4. A communication and coordination plan with Government stakeholders to ensure transparency and alignment throughout the transition period.
5. Procedures for receiving, inventorying, and assuming accountability for Government-Furnished Equipment (GFE), data, and other Government property.

**vi.** The Offeror shall provide a comprehensive Transition-Out Plan that details its approach for the orderly and efficient transfer of contract responsibilities at the conclusion or termination of the contract. The plan shall ensure continuity of operations, preservation of institutional knowledge, and minimal disruption to Government activities.

At a minimum, the Transition-Out Plan shall include:

- a. A structured approach for knowledge transfer, including documentation of processes, procedures, and key operational information.
- b. A staffing transition strategy addressing the reassignment or release of personnel and support for incoming staff, if applicable.
- c. A detailed schedule identifying transition activities, milestones, and task dependencies leading up to contract completion.
- d. Procedures for the return, transfer, and accountability of Government-Furnished Equipment (GFE).
- e. A data management and transfer plan ensuring all contract-related data, files, and records are delivered in accordance with contract requirements and security protocols.
- f. Risk identification and mitigation strategies to address potential transition challenges and ensure uninterrupted service.
- g. Coordination and communication protocols with the Government and any follow-on contractor to facilitate a seamless transition.

**vii.** A defined approach for the accountability, tracking, maintenance, and proper use of Government-Furnished Equipment (GFE), ensuring compliance with all applicable requirements and safeguarding protocols.

#### **4. Similar Experience**

- a. The Government will evaluate the offeror's narrative description of three (3) relevant contracts similar in scope, size, and complexity performed within the last three (3) years. The Government will evaluate the suitability of the offeror's similar experience descriptions to determine whether this experience exhibits the ability to successfully support the requirements of the solicitation and the offeror's quoted technical approach. The following information shall be provided for each project reference:
  - i. Contract number, customer/agency name and contract title.
  - ii. Brief narrative description of the work performed for each of those contracts, including a discussion of any problems encountered/corrective actions and significant accomplishments.
  - iii. Dollar value, contract type, period of performance, place of performance, and the number and types of personnel used in the performance of the contract; and
  - iv. Name, address, and phone number of at least two (2) customer contacts (for example, COR, CO, Program POC, Project Officer) for each of the identified contracts.

## Volume II - Business Volume

**The Government respectfully requests any discount that would be offered to an offeror's most favored customer.**

The business volume shall be comprised of the following elements:

(a) Contract Form, Section B, and Representations and Certifications

The contract form (items 12 through 16 of this SF18), a completed copy of Section B: Line Items, and the completed Representations and Certifications contained in Section D.2. Provisions, of this solicitation. The contract form and the Representations and Certifications must be executed in the indicated places by an official authorized to bind the offeror. If the Offeror is proposing additional Other Direct Costs other than what is provided in table (a) Other Direct Costs (ODCs), the offeror shall also submit an itemized list.

Labor rates: Labor rates proposed shall be in accordance with the terms of the offeror's GSA Alliant 2 basic contract, and inclusive of all direct costs, indirect costs and profit associated with performing the services.

Travel: Travel costs proposed shall not include labor. Provide the cost of travel including destination, duration, purpose, per diem, transportation, and the basis for the proposed costs. A copy of your corporate travel policy shall be submitted with your proposal if travel costs have been proposed.

Other Direct Costs (ODC): Provide a breakdown of all other costs not otherwise included in the categories listed above (e.g., computer services, consultant services, photocopying costs) and provide the basis for these proposed costs. ODC costs must be in alignment with the contractor's GSA Alliant 2 basic contract.

(b) Staffing Plan

The staffing plan included in the technical volume shall be included in the business volume, along with the proposed hourly rate for each proposed labor category.

(c) Other Administrative Data

- (1) Your proposal must stipulate that it is predicated upon all the terms and conditions of this RFP. In addition, it must contain a statement to the effect that it is firm for a period of at least 60 days from the date of receipt by the Government.
- (2) Your proposal must list any current commitments with the Government relating to the work or services and indicate whether these commitments will or will not interfere with the completion of work and services as contemplated under this solicitation.
- (3) Your proposal must identify any former HHS employee(s) to be utilized on this project by providing the individual's name when employed by HHS, where employed, and the capacity in which employed.

- (4) It is HHS policy that contractors provide all equipment and facilities necessary for performance of contracts; however, in some instances, an exception may be granted to provide Government furnished property or to authorize purchase with contract funds. If additional equipment must be acquired, you must include in your proposal a description and the estimated cost of each item, and state whether you propose to furnish the item with your own funds. You must identify all Government-owned property in your possession that you propose to use in performing the prospective contract.
- (5) The offeror, prior to being awarded a contract, must submit an acceptable subcontracting plan (see FAR 52.219-9) or demonstrate that no subcontracting opportunities exist. (Note: This requirement does not apply to small business concerns or to offers which do not exceed \$900,000.00 (\$2 million for construction) or to offers from non-domestic concerns.)

**(d) Estimated Level of Effort**

The table below shows the historical and estimated level of effort requirements and labor categories for the period of performance and is for estimation purposes only. The Offeror should propose the necessary categories they deem appropriate to meet the requirement.

**Historical Labor and Level of Effort**

| Contract Line Item Description                                                   | Transition | Base Period | Option Period 1 | Option Period 2 | Option Period 3 | Option Period 4 |
|----------------------------------------------------------------------------------|------------|-------------|-----------------|-----------------|-----------------|-----------------|

#### (a) Other Direct Costs (ODCs)

Offerors may use the following estimates when quoting ODCs cost line items.

| ODC's                                               | Transition Period | Base Period   | Option Year 1 | Option Year 2 | Option Year 3 | Option Year 4 |
|-----------------------------------------------------|-------------------|---------------|---------------|---------------|---------------|---------------|
| CEO Non Global Travel                               | \$ -              | \$ 18,326.00  | \$ 20,000.00  | \$ 20,000.00  | \$ 20,000.00  | \$ 10,000.00  |
| CEO Global Activities Travel                        | \$ 16,666.00      | \$ 183,326.00 | \$ 200,000.00 | \$ 200,000.00 | \$ 200,000.00 | \$ 100,000.00 |
| DSO ISB Travel                                      | \$ -              | \$ 30,000.00  | \$ 30,000.00  | \$ 30,000.00  | \$ 30,000.00  | \$ 30,000.00  |
| VCC Licenses                                        | \$ 29,166.00      | \$ 320,826.00 | \$ 350,000.00 | \$ 350,000.00 | \$ 350,000.00 | \$ 175,000.00 |
| Materials - Hardware/Spare Parts needed for repairs | \$ 12,500.00      | \$ 137,500.00 | \$ 150,000.00 | \$ 150,000.00 | \$ 150,000.00 | \$ 75,000.00  |

#### (b) Additional Information

Although fluctuating somewhat, a snapshot of recent ticket volume by type of customer service requests is summarized in tables E(f).1 and E(f).2 below.

Table E(f).1 IT Services/Support Top Incidents Period (October 2023 through December 2024)

| Service Offering            | Incident Count | Percentage  |
|-----------------------------|----------------|-------------|
| (empty)                     | 9,846          | 23.32%      |
| Outlook                     | 4,357          | 10.32%      |
| Laptop                      | 3,590          | 8.50%       |
| Smart Card                  | 3,172          | 7.51%       |
| CITGO Virtual Desktop       | 2,335          | 5.53%       |
| Teams                       | 2,278          | 5.40%       |
| Listed in SRT               | 1,903          | 4.51%       |
| MFA                         | 1,704          | 4.04%       |
| ZScaler Zero-Trust Services | 1,466          | 3.47%       |
| OneDrive                    | 1,029          | 2.44%       |
| Mailbox                     | 1,015          | 2.40%       |
| PRINTER                     | 888            | 2.10%       |
| Other                       | 8,630          | 20.44%      |
| <b>Total</b>                | <b>42,213</b>  | <b>100%</b> |

Table E(f).2 IT Services/Support Top Tasks Period (October 2023 through December 2024)

| Task Short Description                                      | Task Count    | Percentage  |
|-------------------------------------------------------------|---------------|-------------|
| Network Password Reset                                      | 11,459        | 41.82%      |
| Provision UserID if requirements are met for Network Access | 6,137         | 22.40%      |
| Complete PIV Card Exception Request                         | 3,087         | 11.27%      |
| other                                                       | 1,605         | 5.86%       |
| Request                                                     | 1,363         | 4.97%       |
| PIV Exception - Verification Required                       | 698           | 2.55%       |
| Fulfillment for OCIO Tools Out Processing SD                | 641           | 2.34%       |
| Mailbox Fullfillment                                        | 475           | 1.73%       |
| Temporary Admin Rights                                      | 216           | 0.79%       |

## **SECTION F – EVALUATION**

This task order will be awarded to an offeror whose proposal is most advantageous and the best value to the Government as evaluated under the criteria described in this solicitation and in accordance with FAR 15.2. In determining Best Value, the Technical Factors and Past Performance when combined will be more important than Price. The Technical Factor includes Technical Approach, Staffing Plan, Management Approach, and Similar Experience. When Volume I Technical merit portion of proposals are considered technically equal, price will then become the significant factor. Offerors will be evaluated on their understanding of and approach to managing and coordinating multiple tasks as described in the PWS. When Volume I Technical merit portion of proposals are considered technically equal, price will then become the significant factor.

### **Evaluation of Options:**

The Government will evaluate the total price of the base and all option periods inclusive of the optional period prescribed by 52.217-8, Option to Extend Services. The Government will calculate and evaluate the price for the option covered under 52.217-8 by utilizing the pricing of the last option period for six months of continued performance. The offering contractor is not required to provide pricing for this calculation.

### **Past Performance:**

CDC will evaluate the past performance of the quoter using CPARS. Past performance will be evaluated on a pass/fail basis.
